Subject: COM PSD Team fires eleven rounds into an aggressive vehicle

Reporting Office: RSO TOC - Baghdad

Summary: On May 30, 2006, at approximately 0953 hrs, a COM PSD Advance Team engaged an aggressive vehicle with small arms fire (SAF) while enroute from the International Zone to the Ministry of Culture. As the Team approached a major four-way intersection the lead vehicle assumed a blocking position to stop oncoming traffic. While other traffic came to a halt the Well-gunner observed a Silver, Mercedes Sedan occupied by one Military Aged Male (MAM) driving aggressively towards the motorcade. As the vehicle weaved through stopped traffic team members gave repeated hand and verbal signals for the driver to stop. The Well-gunner then fired a Pen Flare at the vehicle followed by two well aimed shots into the vehicle’s grill. The vehicle continued its direction of movement and at this time, the Right-Rear and Left-Rear gunners each fired two aimed shots into the grill of the vehicle. This also failed to stop the vehicle or gain the attention of the driver. At this point, the Well, Right-Rear, and Left-Rear gunners each fired two aimed shots into the windshield of the vehicle. The vehicle came to an immediate controlled stop within twenty meters of the motorcade. The driver appeared to be uninjured. There were no principals in the motorcade and no COM personnel were injured. The motorcade continued to its venue without further incident.
RSO Action: RSO is investigating the shooting. PSD Team members are completing their written statements.

Subject: COM PSD fires on an aggressive vehicle.

Reporting Office: REO Al Hillah.

Summary: On 5 June 2006, at approximately 1000, a COM PSD team departed the Regional Embassy Office, Al Hillah. While stopped in heavy traffic, a silver sedan approached the motorcade at a high rate of speed. Hand signals, a pen flare, and smoke canister were employed to stop the vehicle but the driver ignored the warnings. The well gunner then fired three rounds into the grill and the vehicle came to a stop. The driver appeared not to have been injured. The PSD team and principle continued to venue without further incident. No COM personnel were injured.

RSO Action: ARSO is investigating the shooting; ARSO will obtain statements upon the teams return to the REO.

Subject: COM PSD Team Fires on Aggressive Vehicle.

Reporting Office: RSO TOC - Basrah

Summary: On June 5, 2006 at approximately 0945 hrs, a Triple Canopy COM PSD Team en route to a venue in Basrah encountered an aggressive motorcycle. The motorcade was stopped in traffic when a motorcycle with 2 males onboard with a large box broke out of stopped traffic. PSD members in the follow car gave hand and verbal signals to stop which were ignored by the driver. As the motorcycle continued its approach the left rear fired one round into the front fork of the motorcycle. The vehicle came to a stop and no injuries were evident. The motorcade continued to the venue without incident. No COM personnel were injured during the incident.

RSO Action: RSO conducting investigation. Statements will be forwarded separately.

Location: Basrah, Iraq

Subject: 6 June PSD shoot

<< File: 6 June 2006 PSD Shoot.doc >>

Gentlemen,

Enclosed is my report from the shooting incident. I interviewed all parties involved, I had them diagram the event and use matchbox cars to recreate the events. Everyone told similar stories and I was not able to find any real flaws in their stories to “unravel” what they claimed happen. A point that came out of this is the need for a bigger flashlights, this team in the past has used a high candle power spot light that plugs into a cigarette light (I know this because I have seen them use it in the past). That piece of equipment blew a bulb and was not operable during their move. We are in the process of getting more to use in all of our CAVs as a signaling device. The shooter has been taken off the team and is working a desk for a week as per SOP.

Respectfully,
Eric Jagels
SPOT REPORT – 071806-07

SUBJECT: IDF REO Basrah

REPORTING OFFICE: RSO Basrah, Iraq

SUMMARY: At approximately 0530 hrs, the U.S. Regional Embassy Office (REO) Basrah was attacked by 3 rounds of mortar fire. The rounds landed in the vicinity of the front gate. The REO’s emergency response protocols were enacted. All personnel were accounted for. One Triple Canopy guard suffered shrapnel wounds to both legs and scalp. The REO’s guard towers continue to observe SAF and explosions in the neighborhood 1500-2000 meters northwest of the REO.

RSO ACTION: The wounded guard was brought to the REO’s medical clinic and medevac was requested. At 0640 the guard was transported in a British helicopter to the trauma facility at Shaibah Logistics Base. An initial sweep of the compound was conducted in accordance with SOP, no UXO was discovered. The REO remains on an increased alert status with restricted movement for all personnel. Local national workers were turned away at 0630 due to the ongoing incident.

LOCATION: Basrah, Iraq
SUBJECT: DOS IRM Contract Employee Killed By Rocket Attack on Regional Embassy Office Basrah

REPORTING OFFICE: RSO TOC Baghdad Iraq

SUMMARY: On 09/22/06 at approximately 1220 hours, one rocket was launched against the Basrah REO and impacted in the housing area striking trailer K-7. The rocket (NFI) detonated, collapsed the trailer, and killed the occupant instantly. The victim was an American Citizen Department of State contractor serving as the Acting Information Programs Officer (IPO). (Name withheld pending next of kin notification.)

RSO ACTION: The imminent danger notification alarm was activated. All personnel were restricted to the REO compound, directed to hard cover, and instructed to don personal protective equipment (PPE). All staff were accounted for except the victim. Once the debris was lifted, an RSO PSD medical doctor and physician assistant determined the identity and confirmed the death of the employee. Charge', Consul General, and command centers immediately notified. REO Basrah is currently holding an EAC meeting, after which the Charge' will convene Embassy Baghdad's EAC. RSO Baghdad Air Wing will provide medium lift helicopters to transport an IMS employee and RMO-P personnel (if needed) to REO Basrah. RSO Basrah will secure IPC until replacement IMS employee arrives.

SPOT REPORT – 093006-01

SUBJECT: One Shot Fired at Threatening Pedestrian at the US REO CAC

REPORTING OFFICE: RSO Basrah, Iraq

SUMMARY: On 09/30/06 at approximately 1815 hours, a single shot was fired at a threatening civilian who approached the US REO CAC. The individual was carrying a bag in his hands in a suspicious manner as he walked towards the gate. The guards gave several verbal and hand signal warnings for the man to stop but he continued to advance towards the guards. The guard displayed his weapon, and then fired a single shot to stop the threat. The round missed the man but impacted slightly in front of him and lodged in a HESCO sand barrier without exiting.

An Iraqi local national who lives near the CAC and is known to the fixed site guards approached the man and attempted to talk to him before removing him from the area. He reported to the guards that the man was a mentally disturbed person. There were no casualties or injuries as a result of this incident.
RSO ACTION: RSO is investigating the shooting and the circumstances around the incident. It remains to be determined if the person was mentally disturbed, or if this was an insurgent probe. RSO is requesting photographs from the British CCTV system. It is possible that this same disturbed individual has approached the CAC previously. REO Fixed Site Guard Command is reviewing Use of Force procedures and Department of State Rules of Engagement policy with the entire guard force. Initial indications appear to be no negligence or malfeasance on the part of the Fixed Site guard who fired the shot. All guards remain on high alert for any suspicious individuals approaching the US REO CAC. All guards have been recently briefed on the suicide bomber vest threat.

Subject: COM PSD Team Deploys Smoke on Aggressive Vehicles

Reporting Office: RSO TOC - Kirkuk

Summary: On 02 November 2006, at approximately 0920 hours, a COM PSD unit enroute from the Kirkuk REO to the USAID compound in Erbil encountered a Black BMW and White Opel that appeared to be following and probing the motorcade. For over nine miles, these vehicles approached the motorcade in an aggressive manner and failed to keep a satisfactory distance from the rear of the motorcade. The suspected vehicles moved around each other trying to gain ground on the motorcade. After one vehicle slowed down, the other would speed up and take its place. The follow vehicle's well gunner had the back windshield up, while the right rear had their door open. Both the well gunner and the right rear made several attempts to communicate with the drivers of both vehicles by signaling with flashlights, hand signals, and eventually muzzling the vehicles with their long guns.

After the drivers of the suspected vehicles failed to heed the warnings of PSD personnel, the Shift Leader instructed the right rear to prepare a smoke grenade in the event either vehicle made another attempt to close in on the motorcade. When the Black BMW came around the White Opel, and approached the rear of the motorcade at a high rate of speed, the right rear deployed a green smoke grenade.
on the road. At this point, the suspected vehicles finally backed off and remained 150 meters from the motorcade. Both vehicles have appeared on the Kirkuk TOC BOLO list.

**RSO Action:** PSD members were debriefed and provided a statement. No further investigation is necessary.

**Location:** Approximately 38 kilometers south of Erbil, Iraq

SUBJECT: Escalation of Force by TC Guard Force REO Basrah.

REPORTING OFFICE: RSO Basrah, Iraq

SUMMARY: On November 27, 2006 at approximately 2135 hrs, Triple Canopy Security Personnel who were guarding the front gate at REO Basrah engaged a local Iraqi with small arms fire. An automobile approached at a high speed and stopped and discharged an unidentified male carrying a white bag. The car then sped off. The unidentified male individual carrying a white bag then approached the REO front gate. Guards gave verbal warnings for the individual to stop. The individual failed to comply with verbal warnings. The Guard Force Supervisor threw a non-lethal flash grenade in an effort to stop the individual from approaching the gate. Despite the use of the flash grenade the individual continued to approach front gate. At approximately four (4) meters from the front gate, with the apparent "suicide probe" individual continuing to ignore all commands, security guards engaged the individual with their rifles, stopping his approach. Local police and medical services were contacted and responded. At approximately 2220 hrs an Iraqi ambulance carried the individual away for medical aid. No COM personnel were injured during the incident.
RSO ACTION: RSO is conducting an investigation. ROI, statements and photos will be forwarded separately.

Title of Person Releasing Report: Operations Chief

Date of Incident: 30 December 2006
Time of Incident: 2000
Contractor Involved: Blackwater
Detail Location of Incident: Al Hillah REO
Personnel Involved: TCN Guard Force

Incident Synopsis: On 30 December 2006, at approximately 2000 hours and explosion of unknown origin occurred approximately 100 meters outside the Al Hillah compound. The explosion was followed by small arms fire (SAF) being fired from the same location as the explosion. Upon accessing the incident a TCN tower guard observed an individual in the same area of the explosion and SAF. The tower guard fired two rounds at the individual, observed the rounds strike the dirt, reassessed the situation and was unable to relocate the individual. There was no damage to the compound or injuries sustained by any individuals.

Outline injuries if applicable: None

Subject: COM PSD Team fires one round into an aggressive vehicle

Reporting Office: RSO TOC - Baghdad

Summary: On 18 May, 2006 at approximately 1034 hrs, a COM PSD Advance Team was enroute from the Ministry of Industry and Minerals to the International Zone (IZ). The Team was located in a [insert] in front of IZ Check Point [insert](CP) in order to stop oncoming traffic while the remainder of the [insert] convoy entered the CP. While all other traffic adhered to the teams instructions to stop, a Gray, four-door, sedan occupied by one Military Aged Male (MAM) continued driving toward the CP. Team members gave repeated hand and verbal signals to the driver and an attempt was made to fire a pen flare but it malfunctioned. At this time the Left-Rear then fired one shot into the engine block of the vehicle. The vehicle continued forward in a slow roll and came to a stop 40 meters from the CP. The lone occupant appeared to be uninjured. There were no principals in the motorcade and no COM personnel were injured. The motorcade continued on without further incident into the International Zone.

RSO Action: RSO is investigating the shooting; PSD Team members are completing their written statements.

**USE OF LETHAL FORCE**

- Approximately 25 meters from Checkpoint

**On Thursday, May 18th, at 0830, ______ staged and conducted an operational briefing for the day's mission in direct support of ______, PSD mission to MO Industry and Minerals.**

The brief was conducted per ______ SOP and included the overall situation in Baghdad, mission brief and rules of engagement. The intelligence portion of the brief highlighted venue and route specific threats of direct and indirect fire, as well as possible multiple VBIED's.

The Vehicle load plan was as follows:

---

**Upon departure from ______ via the ______ route, ______ was traveling in a motorcade heading West towards ______. As ______ arrived at checkpoint ______, the first ______ vehicles of the motorcade made the left turn into the checkpoint, while the following ______ vehicles remained static on the main roadway waiting to enter the checkpoint. While waiting static on the roadway a grey in color 4-door sedan occupied by one male driver was approaching the follow vehicle from the direction of bridge. The vehicle was seen maneuvering around stopped traffic that was adhering to our commands. My two rear gunners and my well gunner were giving verbal and visual commands including flashing a spot light to signal for the vehicle to stop. With consideration to the threatening manner in which the driver was operating the vehicle and the fact that the driver repeatedly ignored multiple less lethal warnings, the vehicle was considered a direct threat to the motorcade. The vehicle continued to maneuver around stopped traffic as my well gunner attempted to fire off one pen flare, but the pen flare malfunctioned and would not fire. With no time to reload the pen flare again, and the subject vehicle continuing its approach - despite warnings, my left rear door gunner, ______, fired one well-placed round from his ______ into the engine block of the aggressive vehicle. The driver appeared uninjured. After the round impacted the sedan the vehicle did not stop and continued to roll towards our motorcade. Both...**
door gunners and well gunner used good restraint while an Iraqi National Guard soldier from checkpoint ran out toward the vehicle and signaled the individual to stop his vehicle. Upon seeing the ING soldier the individual immediately stopped his vehicle in the middle of the roadway and continued into checkpoint without further incident or injury.

It should be noted that there has been recent direct threats against All Green Zone Checkpoints. There have been several successful and unsuccessful attempts to either breach or blow up Green Zone Checkpoints. It also should be noted that on the rear of our, black in color, fighting follow vehicle it says in big, bold white letters "Warning stay back 100 meters" in both English and in Arabic.

_SL immediately notified RSO/TOC of the incident.

Upon return to ________________ SL, left rear Door Gunner and the __________ Detail Leader reported to the RSO/TOC for a debrief and spot report.

No injuries or additional property damage was observed. For further information see attached DS Sworn Statements by listed Operator's involved. -END-

Approx. 1034 hours One Round Fired from an __________ into the front right corner of the engine block.

None at this time- pending any other action taken by the RSO's investigative unit.

I, __________ , hereby make the following statement at the request of _______________________, who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

I have served in the United States Marine Corps from __________ .
I have been with Blackwater Security Consulting supporting the Diplomat Security Mission since. Since my time with Blackwater I have been on PSD Team where I was Front Right Door Gunner. I then moved to Advance Team where I conducted missions for appointed officials in Saddam Hussein's Trail as well as conducting Tactical Site Surveys for various venues in the Baghdad area. Our Mission is to

and being the advance element on venue to establish and ensure the security of the venue prior to the Protective Security Detail's arrival. While on Team we have trained with aggressor vehicles to practice our escalation of force standard operating procedures. We also train on emergency tactics, to best prepare for any situation that might arise while conducting a mission. I have been in numerous situations where I was able to mitigate the threat without firing a shot. During my military
On Thursday May 18th 2006, at 0815 I staged and conducted an operational briefing for the day’s mission in direct support of the mission to the Ministry of Industry and Minerals. The brief was conducted in accordance with standard operating procedures and included the overall situation in Baghdad, mission brief and rules of engagement. The intelligence portion of the brief highlighted venue and route specific threats of direct and indirect fire, as well as possible and multiple VBIED’s (vehicle borne improvised explosive device).

I was the Left Rear Gunner in the suburban in a car motorcade. This vehicle is equipped with a , which allows the to interact with traffic to the rear. This Suburban is black in color. On each rear door, in big white letters, it says “WARNING - Stay back 100 meters”. This is written in both English and Arabic. There were other personnel in this vehicle. I was armed with a U. S. Department of State issued rifle the . During my military service I received extensive training in the use of this weapon, to include firing at known and unknown distances and at multiple targets both stationary and moving. I have also trained with this weapon in close combat and urban combat environments. I last qualified as expert with this weapon in April 2006 and performed additional live-fire training with this weapon, in April 2006.

Our mission today was an advance for at the Ministry of Industry and Minerals. This mission required us to leave the relative safety of the U.S. military controlled International Zone and travel for several kilometers through a part of Baghdad where para-military forces hostile to the U.S. presence in Iraq routinely conduct insurgent operations. Attacks on American military and contractors are prevalent in this area.

On the 18th day of May 2006 at 1034 hours, team was on our way back to coming from supporting Team at the Ministry of Industry and Minerals. was traveling West in a motorcade coming from the direction of bridge arrived at where the motorcade was at a short halt due to the motorcade having to make a hard left U turn into Check Point. I observed a Red Car stopped at Haifa Street to our rear approximately 50 meters away. I then observed A Gray/Silver four door sedan, driven by one male occupant making a right turn off of Haifa Street, the individual accelerated past the stopped Red Car and continued toward our Motorcade. I, sitting in the Left Rear and sitting in the right Rear cracked our doors and began to give the proper Hand and Arm Signals for the 4-door sedan.
to stop. During this time my Well Gunner, ___, was shining the Spot light at the incoming vehicle as a signal for him to stop. The single male occupant showed no sign of compliance to our Hand and Arm Signals or the Spot Light and continued to proceed toward the rear of our Motorcade. The Well Gunner, ___, immediately attempted to fire one Pen Flare but the Pen Flare misfired. While realizing that the Pen Flare misfired I kept my eyes on the Gray/Silver four door Sedan. As the vehicle continued to approach our motorcade, and knowing that there was not enough time to for the Well Gunner to try and reload the Pen Flare. The vehicle continued to ignore our directions to stop. The driver's actions were consistent with methods used by VBIED suicide bombers. I perceived the vehicle's actions to be a threat to our motorcade based on my training, experience and recent intelligence reports. I placed one well Aimed Shot to the front of the vehicle to disable the threat. Once I engaged the Vehicle, the Vehicle did not come to a complete stop. The vehicle was at a slow roll until an Iraqi National Guard Soldier came out yelling at the single male driver to come to a complete stop. Once the driver noticed the Soldier, the driver came to an immediate stop. Only One shot was fired with no apparent injuries. Our motorcade continued on to ___, with no further incidents or injuries. -END-

SPECIAL AGENT, UNITED STATES DEPARTMENT OF STATE, DIPLOMATIC SECURITY SERVICE

Page 6 of 6 Pages
1, _______________________________________, hereby make the following statement at the request of _______________, who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.
I attended the DSS sponsored course. After passing that successfully, I then deployed to Iraq under a Blackwater/Dept. of State contract. For my first in country I was a for the Iraqi Protective Detail's (IPD) advance team (Team ). Following that, I spent on the Ambassador's Protective Detail (APD) as a . Upon the start of my second contract I resumed duties supporting IPD as a serving on Team from until the . At which time I was attached permanently to Team as its . Additional duties included concurrent training while leadership was away during most of November on the Nasiriyah mission. Both with the U.S. Army and With BSC, I have received extensive training in use of lethal and non lethal force, the continuum of force, static as well as mobile security, and marksmanship of the .

I have been with Blackwater Security Consulting, supporting the Diplomat Security Mission, since . During my time with Blackwater I have been on Team , Team , Team , and APD Advance. I have been slotted in every door gunner slot during my time with Blackwater. And I have had extensive time in both the Left Rear and the Right Rear of my team’s Follow vehicle.

Our mission today was an advance for at the Ministry of Industry and Minerals . This mission required us to leave the relative safety of the U.S. military controlled International Zone and travel for several kilometers through a part of Baghdad where para-military forces hostile to the U.S. presence in Iraq routinely conduct insurgent operations. Attacks on American military and contractors are prevalent in this area.

While returning to from supporting Team at the Ministry of Industry and Minerals on the 18th of May 2006 at 1034 at I, was seated in the right rear of the vehicle. I observed a gray, four door sedan turning onto our street approaching our motorcade from the direction of bridge . I opened my door and waved my
hand in the local "stop" motion while yelling "Kiff". As the vehicles to
the front of the gray sedan stopped, I proceeded to close my door. As I
closed my door, the gray sedan bypassed the stopped vehicles and
continued to make its way towards our motorcade. At which time I re-
opened my door so that I could orient on a vehicle that was now becoming
a significant threat. As the gray vehicle continued to roll towards us
ignoring our attempts to stop it, I lost the angle of view on it. I
yelled to my vehicle "I’ve lost the angle!" I then heard a single shot
fired from the other side of my vehicle. As I re-entered the vehicle, I
was able to see the vehicle through the left side window. It had a
single hole in the right front of the hood, right above the head light.
The vehicle continued a slow roll for a few seconds after the shot. The
vehicle was occupied by one male driver. He appeared to be uninjured. I
head the SL call the TOC and report the incident as we continued to turn
into Checkpoint 1 without further incident or injury.-END-
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

SPECIAL AGENT, UNITED STATES DEPARTMENT OF STATE, DIPLOMATIC SECURITY SERVICE
I, ________________, hereby make the following statement at the request of _________________________________, who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

I, _________________________________ served in the United States Marine Corps from ________________.
I was hired by Blackwater Security Consultants and was trained on performing personal security in high threat areas for the U.S. Department of State. In I arrived to Baghdad Iraq and was assigned to Team ___ which is a Technical Site Survey (TSS)/Advance team. The TSS/Advance team is responsible for being the advance element on venue to establish and ensure the security of the venue prior to the Protective Security Detail’s arrival. While on Team ___ we have trained with aggressor vehicles to practice our escalation of force standard operating procedures. We also train on emergency tactics, to best prepare for any situation that might arise while conducting a mission.

Our mission today was an advance for ___ at the Ministry of Industry and Minerals ___. This mission required us to leave the relative safety of the U.S. military controlled International Zone and travel for several kilometers through a part of Baghdad where para-military forces hostile to the U.S. presence in Iraq routinely conduct insurgent operations. Attacks on American military and contractors are prevalent in this area.

Our vehicle was the ___/vehicle in a ___ motorcade. I utilize a spotlight and pen flares to ensure cars and other threats keep a safe distance away from our motorcade. I also use voice commands such as "kiff", meaning patience/stop in the Iraqi language and physical gestures to keep these same threats at a safe distance away from our motorcade. Most Iraqi drivers heed all of these signs and keep a safe distance away from the motorcade. The motorcade was traveling to the International Zone via checkpoint ___ on a two lane road. About 45 meters before the entrance of Checkpoint ___ I observed a grey 4-door sedan occupied by one Male driver pulling out approximately eighty meters behind us. The vehicle accelerated past stopped traffic that was adhering to the hand and arms signals and verbal commands to stop coming
from the follow door gunners and well gunner. The driver of the sedan
began gaining rapidly on us. I shined my spotlight on his face and
flashed it on and off to try to gain his attention while giving the hand
signal to stop. When he didn't slow down further both door gunners open
their doors and shout the verbal command to stop, "kiff." The vehicle
continued to speed closer so I attempted several times to fire my pen
flare in his direction but it misfired. The driver continued to close
the gap on our motorcade, ignoring our repeatedly directions to stop.
Based on my experience, training and recent intelligence reports, I
determined that the vehicles actions were a threat to our motorcade. The
left gunner was already sighting in on the vehicle and telling me to
fire off a pen flare. I replied it won't fire and the left door gunner
fired one well aimed shot to the vehicles engine block. At that time the
vehicle had gotten within 20-30 meters of our motorcade the round
impacted the hood a few inches above the right head light in an effort
to disable it. It immediately slowed but did not stop it; the vehicle
continued to roll slowly towards our motorcade and eventually came to a
stop with no apparent injuries. The shift leader was informed that the
pen flare misfired and the left door gunner fired one shot. The Shift
Leader sent a situation report to the Tactical Operations Center.

[continued to enter checkpoint -] without further incident or injury.

END-

Rodney,

Attached are TM BW Incident Report and DOS Statements for their shooting incident today. I have reviewed them and determined that they are suitable for delivery to DOS to have State witness their signatures.

Thanks,

Dave -

At your earliest convenience, please review the above PSD Serious Incident Reports from Baqubah.

Summary:

As of 23 March 2006, during motorcade operations in Baqubah, it appears that approximately nine (9) disabling rounds were fired (simultaneous efforts from different dismounted areas of responsibilities) into the engine compartment in efforts to stop a potential threat.

According to the report, it appears the motorcade was waiting to clear traffic (team members deployed to support traffic facilitation) when the rear security officers observed a white four door sedan (suspect vehicle recently on a BOLO list) swiftly and aggressively approached the motorcade from the rear. The security officers immediately deployed verbal and non-verbal (pen flare) warning signs to stop, slow or divert the suspect vehicle away from the motorcade.

According to the report, the suspect vehicle failed to comply with all warning signs and continued to approach the motorcade presenting what appeared to be at a real threat. At this time, the rear security officers fired nine disabling rounds (simultaneous efforts) into the engine compartment in efforts to stop the potential threat.

The suspect vehicle came to an immediate stop and the driver was seen uninjured. There were no injuries or collateral damage to report. The motorcade continued without further incident.

Subject: COM PSD Team Fires Multiple Rounds into an Aggressive Vehicle

Reporting Office: RSO TOC - Baghdad

Summary: On May 23, 2006, at approximately 1400 hrs, a COM PSD Team stopped traffic to facilitate the movement of their motorcade. The TC and two rear gunners were directing traffic outside of the Counter Assault Team (CAT) vehicle when a white four-door sedan abruptly drove around stopped traffic. The rear gunners attempted to gain the attention of the driver through verbal and hand signals. The sedan continued to approach and at meters, both rear gunners fired two, 2-3 round bursts, into the front and hood of the sedan. The sedan came to an immediate controlled stop. The driver, sole occupant, exited and stood near his vehicle and appeared to be uninjured. No COM personnel were injured and the motorcade continued on without further incident. There were two principals in the convoy at the time of the shooting.

RSO Action: RSO is investigating the shooting; PSD Team members are completing their written statements.

Location: Baqubah, Iraq

Drafted By: Roque Salas, Watch Officer, RSO TOC Baghdad

SYNOPSIS
Summary: On May 23, 2006, at approximately 1415 hrs, a COM PSD, (Team in Baqubah, fired on a vehicle after determining that the vehicle posed an immediate threat to their motorcade. This use of force was appropriate and within the parameters of DS use-of-force policy. Injury to the single occupant in the threat vehicle was possible but not observed. End Summary.

The following chain of events is derived from the statements provided by the team members involved in the shooting:

1. The Counter Assault Team exited the venue and took up a position before the rest of the motorcade pulled onto the roadway. Traffic responded to their presence and at least six vehicles came to a stop in both travel lanes between 30 and 50 meters from the CAT vehicle.
2. A single, white in color, sedan, occupied by one male, drove around and through the stopped traffic and headed towards the motorcade.
3. The PSD team yelled for the driver to stop and waved their rifles in the air in an effort to get his attention. The vehicle continued towards the motorcade.
4. Two team members fired into the lower front of the vehicle in an effort to get the vehicle to stop. The vehicle continued to drive towards the motorcade.
5. The shooters raised their point-of-aim higher on the front of the car and fired again. This time the vehicle swerved to the side and came to a stop. The driver was seen to be holding up his hands. He did not appear to be injured but a wound to his lower extremities is quite possible based on the shooting pattern.

**Type of Incident**: Use of Lethal Force

**Location of Incident**: At the intersection of Venue (Blue Dome) Gate

**Entrance and Exit**:

**Description of Incident**: I, have served in various duty positions within the US Army, Army Reserves, and Army National Guard.
CAT Team

On 23 May 2006 at 1410, rolled out of the venue (Blue Dome). Grid...

My position on the CAT is the ___our task was: ___

the UP Gunner, ___fired pin flares in each
direction to warn oncoming traffic, I could visually see the pin flare that was
shot in the direction of my sector, the remaining CAT members deployed from
the vehicle to continue to visually signal, by extending our rifles in an
180 degree arch to our fronts, and verbally signal traffic, by yelling KIF and
STOP to halt. The TC, __________ and I were on the right front of the
vehicle to halt traffic coming from the west, the left rear door gunner,___
deployed the vehicle while the

Traffic halted on the West approximately 25 to 30 meters away from the CAT
when a white sedan came from behind the stopped traffic at a high rate of
speed, weaving through at least 6 stopped vehicles with at least two vehicles
that had begun to reverse out of the intersection to the west. At that point I
moved further toward the center median of the road with ___about 10
feet to my left, closer to the center median, and continued to visually signal
the vehicle by waving my rifle, an ___in a 180 degree arch to my front and
verbally yelled KIF and STOP, in an attempt to get the vehicle to stop. The
driver ignored all the warning indications, and continued to approach our
vehicle at 25 to 30 miles per hour. At that time, and with the knowledge of at
least three white sedan VBIE'D'S on the BOLO List, I feared for my life and
the life of my teammates who were also exposed. Meanwhile I could see the
motorcade out of my peripheral vision had pulled through the gate of the
venue and the Lead Vehicle was halted at the intersection preparing to enter
onto route ___ At that instance as a last resort, I engaged the moving
vehicle that I perceived as a direct threat, with deadly force firing three rounds
at the grill area of the vehicle. After my initial engagement I paused very
briefly, remaining sighted in on the vehicle, and reassessed the situation (this
happened within seconds). The vehicle continued moving forward, toward my
position and was within ___meters of the ___ I engaged the vehicle again a
second time, with two more rounds, wherein the vehicle came to a complete
stop. The threat vehicle was approximately 15 meters from the front of the
CAT vehicle, and was angled "sharp" right almost perpendicular to my
position. The driver put his hands in the air, and appeared to be moving
under his own power once the motorcade had exited onto Rte ___ The
CAT TC, issued the verbal command to recover. The
DAT assumed its position, ___ and returned to FOB
without further incident.

On May 23, 2006 team X escorted two Department of State officials to one of our regular but most dangerous venues, the Blue Dome at grid ___________.

Riding in the CAT vehicle during this movement was seat). When departing this venue, the Counter Assault Team is tasked with____.

When leaving the venue on this day, we stopped traffic by exiting the vehicle. Vehicles to east stopped at around 30 meters from the clearing team and approximately 50 meters to the west with the assistance of the turret gunner, _______ firing a flare in this direction. I turned to ensure the road was clear before calling out the motorcade. When I turned to face our direction of travel (west), a white four door sedan quickly and aggressively drove around two lanes of stopped traffic (westbound) to the east, picking up speed, heading directly towards our vehicle (parked in the middle of the roadway). I waved the muzzle of my rifle with a vigorous and obvious movement up and down yelling "STOP," knowing that in the past 45 days, we have had 3 white four door sedans on our BOLO list. The threat vehicle did not attempt to brake. Hearing my teammate, _______ to my right yelling "KEEP" and "STOP" also. I then shot a group of three shots to the front of the vehicle. When the vehicle still failed to yield to the side of the road, I shot another three round group working them slowly towards the driver. When my sight picture made it to the driver, he had his hands outside of his vehicle, and the vehicle stopped on the far side (south) of the road, approximately 15 meters from the CAT. I had a clear view of the drivers' hands and called the motorcade out to the road to return to base.

End of Statement.

Date of Incident: 23 May 06

Type of Incident:
Distraction Device Deployed
Pen Flare

Location of Incident:
Baqubah, Iraq
Route: Blue Dome

Description of Incident:
I served in the Marine Corps from

I was accepted and completed the High Threat Protection Operations Course #20, Blackwater Training Facility. The training standards mirrored those used to train Special Agents in the US Department of State's Diplomatic Security Service. From

I was stationed in

While there I was the rear gunner in the counter assault vehicle. I also worked as an observer on rooftops. From

until present I have work for team

as a part of the counter assault team.

Counter Assault Team is assembled as follows.

When departs a venue the Counter Assault team is tasked with

While exiting the blue dome, at above stated time and date, I was tasked as the
Assault Team (CAT) Vehicle.

The Cat vehicle is a US Military HUMMVV, painted Desert Tan with a Turret and a bright red, 3' X 3', Warning sign that states in both Arabic and English, "Convoy Ahead, Stay back 100 meters".

As the motorcade came to the intersection to leave the Blue dome the vehicle was facing south, and dismounted the vehicle to help stop traffic, to the east and to the west. I turned the turret to the west and fired a pen flare to stop traffic. All the vehicles stopped two lanes wide and about three cars deep approximately 75 meters to the west. I then turned the turret to the east to scan for other
threats. As I got in position I heard both yelling for a car to stop. I then heard approximately seven shots. I turned the turret back to the west, leaving with security to the east and saw a car turned in the middle of the road facing south about 20 feet to our west. The driver was showing his hands and was no longer perceived as a threat. The motorcade then passed us, the team mounted back into the vehicle. We then pulled away and continued with our movement.

Subject: Baqubah Serious Incident Report

To all,

On 23 May 06 at 1415, location __________, Blackwater PSD team __________ was departing from the venue Blue Dome, Baqubah to FOB Warhorse. The motorcade consisted of

Prior from departing venue __________, loaded the passengers and established positive communication with the team's TOC __________ departed the venue in the order of the __________. The motorcade exited the main gate onto a side road that runs north to south and intersects with route __________. This side road is solely used for vehicles planning on entering/exiting the compound. To the north, the road is blocked off from traffic by jersey barriers. At the south end, the road intersects with route __________ and has alternating jersey barriers used to slow entering traffic. At the entrance/exit is a static Iraqi Army truck that is used to block traffic from entering this side road. Iraqi soldier's man this position and are responsible for security and moving the truck to allow authorized vehicles in.

It was at this time the motorcade was exiting the venue onto the side road that the CAT vehicle pushed forward onto route __________. As the CAT team signaled traffic to halt on route __________ a white sedan sped past halted vehicles in the east bound lane and proceeded in the direction of the CAT. There has been a white sedan on the Bolo list for several weeks leading up to this mission. Ignoring all their warnings (verbal, hand signals and one pen flare), the CAT TC __________ and right rear gunner, began engaging the vehicle with their DoS approved rifles and authorized ammo. __________ began engaging with three rounds to the grill area. __________ also engaged the vehicle with three rounds into the grill. The vehicle continued to move in the direction of the motorcade and both __________ and __________ continued to engage the threat with three rounds from __________ and 2 rounds from __________. The vehicle swerved and came to a halt on the south side of the east bound lane. It was clear the driver of the vehicle had opened his door and placed his hands in the air using his own power. The CAT TC assessed the situation and called the motorcade out. The motorcade proceeded south on the side road and exited onto route __________. The motorcade then turned west on route __________ and continued on to FOB Warhorse without further incident.

I have attached the reports from the personnel involved. Please review this and let me know if you need any thing else form me. I also want to reiterate that the team has not and will not provide any statements to any other organization other than BW management and to the RSO.

V/R,
Dave -

I apologize for the delay in sending this report. Please review the above OJD, Serious Incident Reports from Baqubah.

Summary:

As of 27 May 2006, the rear security officer fired two (2) disabling rounds into the engine compartment area in efforts to stop a potential threat.

During motorcade operations to/from the Governance Center in Baqubah (second incident in the last month at this venue), the rear security officer observed a silver mini van (suspect vehicle) swiftly and aggressively approaching the motorcade from the rear through stopped traffic. The suspect vehicle maneuvered in and out of traffic as it advanced towards the departing motorcade. (Field Note: Traffic was stopped by the to support the motorcade.)

The rear security officer immediately deployed verbal and non-verbal warning signs to stop, slow or divert the suspect vehicle away from the motorcade. According to the report, the suspect vehicle failed to comply with all warning signs and continued to approach the motorcade with aggressive actions.

At this time, the rear security officer fired two disabling rounds from his into the engine compartment area in efforts to stop the potential threat. The suspect vehicle immediately stopped and pulled off the roadside. It appears that two (2) Iraqi Police Officers approached the mini van - the driver did not appear to be injured. The motorcade continued without further incident.

**Description of Incident**
- Disabling Shoot (Overview)

After departing the Army, I joined Blackwater USA in 2003 and have been part of a protective detail working out of Baqubah since. During this time, I have spent time as a door gunner, the lead vehicle driver, Counter Assault Team (CAT) driver, and currently the...
On May 27, 2006, an [redacted] team escorted a Department of State official to the Governance Center at grid [redacted] for a meeting with the Governor of the Diyala Province. Riding in the CAT vehicle during this movement was [redacted].

When leaving the venue on this day, we stopped traffic by show of force with our up-armored M114. When our vehicle came to a stop on the roadway, the team exited the vehicle to show a presence in order to allow an easy flow of the motorcade exiting the venue. While I was getting the attention of the vehicles traveling eastbound, I heard [redacted] yelling "KEEP" in a very clear and commanding manner towards the westbound traffic, followed by two consecutive rounds. At that moment both lanes of traffic came to a halt and I called [redacted] Tactical Commander, [redacted] to let him know that the road was clear for a safe and fluid departure. I then immediately sent a situation report to the Shift Leader, [redacted].

Subject: COM PSD fires on an aggressive vehicle.

Summary: On 27 May 2006, at 1241 hrs, a COM PSD team was departing from the Baqubah Governance Center (venue) in a convoy enroute to FOB Warhorse. The motorcade departed the venue through the main gate and onto a side road which intersects with route . As the motorcade entered the side road, the Counter Assault Team (CAT) vehicle halted on the side road and waited for traffic to halt on route . A silver mini-van sped towards the CAT vehicle from the east, in the south lane. The left rear gunner began signaling the vehicle with both verbal and visual signals. The vehicle then pulled over and came to a stop. Without warning the vehicle accelerated towards the CAT vehicle, at this time the left rear gunner engaged the vehicle with two rounds from his rifle. The vehicle came to an immediate halt and then began reversing to the east. The vehicle once again came to a halt and was approached by two Iraqi Police officers. The driver appeared to be unharmed. The CAT vehicle commander assessed the situation and called the motorcade out. The motorcade proceeded south on the side road and exited onto route . The motorcade continued on to FOB Warhorse without further incident. There were three principals in the motorcade. No COM personnel were injured during this incident.
RSO Action: RSO is investigating the shooting; PSD Team members are completing their written statements.

Location: Baqubah, Iraq

Drafted By: Mike Duke, Watch Officer, RSO TOC, Baghdad, Iraq.
SUBJECT: Blackwater Aircraft Attacked by SAF

REPORTING OFFICE: RSO Baghdad

SUMMARY: On May 28, 2006, at approximately 1954 hours, a Blackwater aircraft (helicopter) returning from a training mission was hit by small arms fire (SAF) from multiple shooters near Bridge. Two rounds hit the aircraft. The door gunner returned fire and one insurgent was reportedly KIA according to an Iraqi Army element that subsequently responded to the scene. The Blackwater aircraft and crew returned safely to base.

RSO ACTION: Notified the 4th ID who deployed to the attack site. Pending further investigation by RSO investigation section.

LOCATION: Baghdad, Iraq

DECLASSIFIED
I, _______ 66 . hereby make the following statement at the request of State Department ___________ , who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

Introductory Paragraph:
WPPS weapons qualification prior to Iraq assignment.

Report: At approximately 1945 hours local time, 28 May 2006 Blackwater aircraft with a crew consisting of pilots and myself, and gunners , were conducting a local area orientation flight. We were the aircraft in a flight of 7. At vicinity grid two personnel in dark clothing and wearing hoods were observed by our crew engaging the lead aircraft with AK47's. As I flew in to cover the aircraft the two observed personnel began engaging our aircraft. I maintained a steady platform while both and returned fire to the individual engaging us on the South side of the building of the above grid. The aircraft broke contact due to rounds received. I turned the aircraft to the East to cover the lead aircraft, and then we were re-engaged by the second individual on the East side of the building. My
gunner, returned fire on the individual until he broke contact and disengaged. I then reformed on the aircraft and returned to LZ. The aircraft received damage from two observed rounds while our aircraft received no noticeable damage from initial inspection.
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

I, hereby make the following statement at the request of [Name], who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

Introductory Paragraph: I served in the US Army for [Number] years. I received extensive training in the use of weapons to include rifles and machine guns. This training included the specific responsibility of soldiers to safe-guard civilians and the proper use of the force continuum. While serving in Army Aviation, I received advanced training in the use of weapons and small unit tactics. This training was in small groups with little or no guidance from higher authority. In [Year], I attended Blackwater Security Consultant's Department of State class [Number]. After successfully completing the course requirements, I deployed to Baghdad, Iraq in [Date] as part of the Department of State, Diplomatic Security Service, Iraqi Protective Detail - Blackwater Aviation. I have worked in Baghdad, Iraq for [Number] years as a member of a protective detail. During this time I have flown over [Number] hours in support of protective detail assignments.

Report: On Sunday, May 28th, at 1925, Blackwater Aviation Mission brief conducted at flight ops, all crewmembers briefed on route of flight and venues. Departure time was set and crews went to aircraft. Aircraft departed [LZ] and began orientation. Initial route was west to 14 July South, East Bridge, Al Rasheed airfield, Route north to Min of Transportation, City Hall, Min of Finance, Min of Health.
Bridge to the SEU. At approx 1945, Aircraft was approx 125' agl and 85 knots, as aircraft flew in vicinity of, all crew members heard gunfire from the left side of aircraft. I was on the controls but had no visual contact with the shooter on the ground, began to maneuver aircraft in right break turn to orient on the fire, made visual contact and took control of aircraft to orient left side on the shooters on the ground. Two personnel were id'd as shooters and they continued to fire at the aircraft. returned fire, hitting one. felt a vibration in the aircraft and contact was broke. Base was notified of the incident and the flight returned to LZ. Post flight inspection revealed two impacts on the aircraft, one in the nose, and one in the tail.
Dave -

Please review the above PSD Serious Incident Report, Sworn Statements and the PowerPoint presentation from Baghdad.

As of Sunday 28 May 2006, it appears that BWA encountered automatic fire (AK-47's) on the north side of Baghdad while conducting a flight orientation brief for all new pilots and door gunners. According to the report, the aircraft encountered automatic fire and then maneuvered to provide the door gunners an opportunity to observe and suppress the ground fire. The aircraft was hit with two (2) rounds, one in the windscreen and one in the fuselage just forward of the tail boom.

According to the report, crew members in both aircrafts observed 2 to 3 armed individuals running in the street; one of those individuals raised his weapon towards the helicopter. The left door gunner of aircraft ___ and co-pilot of their sister craft observed the threats, acquired the target and suppressed fire for escape.

It appears that one of the insurgents who was observed firing at the aircraft may have been injured (by suppressive fire) according to several Sworn Statements [_______ and _______]. There were no Blackwater injuries to report.

Should you require additional information please do not hesitate to contact me via email.

Best Regards -

Sincerely,

Victor Esposito

I, hereby make the following statement at the request of , who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting therefrom may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

Introductory Paragraph:

I, served in the US Army for years from
contractor for Blackwater Aviation (Presidential Airways) and arrived in Baghdad, Iraq on _______. After arriving, I was designated an MD 530F performing security for naval forces under DOD contract then later the U.S. Embassy in Iraq under contract with DOS. I am responsible for the safe and professional operation of my aircraft and welfare of my crew while conducting aerial reconnaissance and security for convoy and static positions in a combat zone.

Report:

On 28 May, 2006 at approximately 1945 hours, I was the in the aircraft (tail number ). I was flying in the position seat) and my was in the seat. I had gunners onboard, on the left side, and on the right side. Our mission was to conduct a local area orientation for our four newest gunners. This flight was briefed and the objective was to fly a route that would provide the gunners exposure and orientation to the major routes venues (Ministries) in the Baghdad area of operations.

As we were approaching the north side of Baghdad, at grid I heard automatic AK-47 gunfire coming from the left side of the aircraft, while simultaneously observing one individual in the middle of the north/south running street pointing an AK-47 at my aircraft and firing on full automatic.

Since I had visual contact with the individual on the ground, I immediately took the flight controls from and maintained visual sight of the individual firing at my aircraft. I then maneuvered the aircraft back to the south running along the west side of the street in a position so the left side gunner could observe the individual who was firing at our aircraft and return fire. I then observed three individuals with weapons. One individual was running down an alleyway to the east and two individuals were in the street firing at the aircraft with AK-47s. My left side gunner returned fire at the individual to the left which was dressed in black clothing. I observed the second individual to the right shooting at the aircraft, at which time we received a round in the windscreen on the left pilot's side. I then felt a vibration in the aircraft and called the flight to return to base.

Upon arrival to LZ, we inspected the aircraft and found one bullet entry point on the left pilot's side windscreen and exiting out on the right side windscreen after going through the corner of the instrument panel. Another bullet entry point was found in the aircraft fuselage just forward of the tail boom and exiting the other side of the fuselage.
I, hereby make the following statement at the request of , who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting therefrom may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

Introductory Paragraph: I served in the US Army for .

I received extensive training in the use of weapons to include hand held, assault, long range weapon systems and machine guns. I have also received training on fighting in an urban environment. This training included the specific responsibility of soldiers to safeguard civilians and the proper use of the force continuum. In , I attended Blackwater Security Consultant's Department of State WPPS-2 class. After successfully completing the course requirements, I deployed to Baghdad, Iraq in as part of the Department of State, Diplomatic Security Service, Blackwater Aviation Section. I have been working in the Iraqi region since not only with Blackwater but with other agencies as well.

Report: At approximately 1945 hours local time, 28 May 2006 Blackwater aircraft with a crew consisting of pilots and 
and gunners and I were conducting a local area orientation flight. We were the aircraft in a flight of. At vicinity grid, two personnel in dark clothing and wearing hoods were observed by our crew engaging the lead aircraft with AK47's. As we flew to cover the lead aircraft the two observed personnel began engaging our aircraft. Both and I returned fire to the individual engaging us on the South side of the building of the above grid. The aircraft broke contact due to rounds received. Our aircraft turned to the East to cover the egress when we were re-engaged by the second individual on the East side of the building. I returned fire on the individual until he broke contact and disengaged. We then reformed on the aircraft and returned to LZ. The aircraft received damage from two observed rounds while our aircraft received no noticeable damage from initial inspection.

/------------------------Nothing Follows-------------------------/
I hereby make the following statement at the request of [ ], who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

I enlisted in the [ ]
I have been with Blackwater Security consulting, supporting the diplomatic mission in Iraq since 2004. Since my time with Blackwater, I have been assigned to Team _ in Al-Hillah, Iraq, where I was assigned a left observer/door gunner. I was also assigned as a rear observer/gunner in the counter assault vehicle, as well as the counter support of the Ambassadors Detail, our Mission is to

and being the element on venue to establish and ensure the security of the venue prior to the Ambassadors Protective Security Detail’s arrival. While assigned to both team _ and the Ambassadors Advance Team, we trained with aggressor vehicles to practice our escalation of force, standard operating procedures. We also train on emergency tactics, to best prepare for any situation that might arise while conducting a mission. I have been in numerous situations where I was able to mitigate the threat without firing a shot.

On Thursday May 28th 2006, at 1845 Blackwater Aviation staged and conducted an operational briefing for the evenings mission a local area orientation for Blackwater Aviation Personnel. The brief was conducted in accordance with Blackwater Aviations standard operating procedures and included the overall situation in Baghdad, mission brief and rules of engagement. The intelligence portion of the brief highlighted venue and route specific threats, or direct and indirect fire, as well as
possible and multiple VBIED's (vehicle borne improvised explosive device).

Our mission this evening was to conduct a local area orientation for the newly appointed observers/gunners. I was assigned as the right observer/gunner for aircraft number [ ] which was the [ ] aircraft. As we were approaching the vicinity of bridge number [ ] I heard automatic AK-47 fire, this fire subsequently impacted our aircraft. The pilot immediately conducted maneuvers for the overall safety of the crew and the aircraft. At that point right observer/gunner, [ ] began to engage and return fire with approximately eight to ten rounds. I observed gunner [ ] return fire, at an individual dressed in all black, holding a weapon that was firing at the aircraft. I observed a minimum of two rounds possibly hit the shooter, this individual then fell to the ground and appeared to crawl to the side of the road and take up a crouching position.

Pilot [ ] then stated, that he began to feel a strange vibration in the controls of the aircraft and called for the flight to return to [ ] Landing Zone. Upon arrival to the landing zone, a visual inspection of the aircraft was conducted, one hole in both the right and left pilot windscreen was observed. One hole in the aircraft's fuselage was also observed.

Nothing follows.

I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

Jeff and Tony,

On Sunday, May 28th, at 1915, Blackwater Aviation conducted a day Baghdad flight orientation briefing for our new pilots and gunners.

The flight crews are as follows, in aircraft

At approximately 1925 Blackwater Aviation a flight of departed LZ along the briefed route. When the flight reached the north side of Baghdad at grid at approximately 1945 the flight heard automatic AK-47 gunfire. While conducting evasive maneuvers the crew spotted at least three individuals with AK-47 shooting at both aircraft on full automatic. The aircraft were maneuvered to provide the gunners an opportunity to suppress the ground fire.

Aircraft was hit with two rounds, one in the windscreen and one in aircraft fuselage just forward of the tailboom. Aircraft sustained no damage. Both aircraft and crews returned to LZ safely.

No crewmember was injured while conducting this mission.

Upon return to LZ and securing all equipment crew members prepared sworn statements.

No further information at this time.
Please see attached DS Sworn Statements by listed Operator's involved.

Let me know if you have any questions or comments.

V/R,
Dave

Note: forwarded message attached.
I, ____________________________, hereby make the following statement at the request of ____________________________, who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting therefrom may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

I, ____________________________, served in the United States Marine Corps from ___________.
I was hired by Blackwater Security Consultants and was trained on performing personal security in high threat areas for the U.S. Department of State. In I arrived to Baghdad, Iraq and was assigned to Team which is a Technical Site Survey (TSS)/Advance team. The TSS/Advance team is responsible for being the advance element on venue to establish and ensure the security of the venue prior to the Protective Security Detail's arrival. While on Team, we have trained with aggressor vehicles to practice our escalation of force standard operating procedures. We also train on emergency tactics, to best prepare for any situation that might arise while conducting a mission.

Our mission today was an advance for at the Ministry of Culture. This mission required us to leave the relative safety of the U.S. military controlled International Zone and travel for several kilometers through a part of Baghdad where para-military forces hostile to the U.S. presence in Iraq routinely conduct insurgent operations. Attacks on American military and contractors are prevalent in this area.

Our vehicle was the vehicle in a motorcade. I utilize a spotlight and pen flares to ensure cars and other threats keep a safe distance away from our motorcade. I also use voice commands such as "kiff", meaning patience/stop in the Iraqi language and physical gestures to keep these same threats at a safe distance away from our motorcade. Most Iraqi drivers heed all of these signs and keep a safe distance away from the motorcade. The motorcade was traveling to the Ministry of Culture on a two lane road. We were held at an intersection in dead lock traffic near all traffic behind us adhered to our commands and formed two single file rows of cars which were pulled off to the right side of the road approximately 80 meters behind our motorcade. I observed a grey Mercedes 4-door sedan make an aggressive
left lane change behind all the stopped traffic and accelerate toward our Motorcade at a very high rate of speed. At that time I shined my 2,000,000 candle spot light at the driver in the Mercedes and flashed it on and off to gain his attention while giving the hand and arm signals in an attempt to get him to stop in which he did not. Drivers of the stopped vehicles also observed the Mercedes attempting to bypass the stopped traffic, Individuals leaned out of their windows holding out their hands signaling for the Mercedes to stop along with the pedestrians standing on the median waved their hands to signal for the vehicle to stop. The Mercedes ignored all signs and accelerated past the stopped traffic. The vehicle approached from the rear I fired one pen flare which went straight for the vehicle and passed within two feet of the roof and at that time I could clearly see the vehicle was occupied by one Male driver. The vehicle accelerated past stopped traffic that was adhering to the hand signals and verbal command "kiff" coming from the follow door gunners and well gunner. The driver continued to close in on our motorcade, ignoring our repeated directions to stop. Based on my experience, training and recent intelligence reports, I determined that the vehicles actions were a threat to our motorcade. At that time, I the well gunner, fired first, two shots to the vehicles engine block in an attempt to disable the vehicle. The vehicle was not disabled and the driver did not slow but continued towards our motorcade when the right and left door gunners fired two rounds apiece to the engine block this had no affect on the vehicle or the driver. At that time the vehicle was still approaching at a high rate of speed and had closed to within [ ] meters of our motorcade when I fired two shots to the driver side of the windshield which also had no affect on the speed or direction of travel to the Mercedes. Then the right and left door gunner also engaged the windshield of the vehicle with 1 to 2 rounds apiece. The vehicle finally slowed to a stop approximately 20 meters behind us. Traffic cleared in front of us and we were able to proceed and put distance between our motorcade and the threat. I did not observe any injury to the driver of the vehicle. The shift leader was then informed of the situation and sent a situation report to the Tactical Operations Center. [ ] continued to Ministry of Culture without further incident or injury.-END-
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.
I have been with Blackwater Security Consulting since May 30th, 2006, when I was a Door Gunner and Acting... I conducted tactical site surveys for various venues in the Baghdad area. Our Mission is to...

advance element on venue to establish and ensure the security of the venue prior to the Protective Security Detail’s arrival. While on Team..., we have trained with aggressor vehicles to practice our escalation of force standard operating procedures. We also train on emergency tactics, to best prepare for any situation that might arise while conducting a mission. I have been in numerous situations where I was able to mitigate the threat without firing a shot.

On Tuesday May 30th, 2006, at 0915, that staged and conducted an operational briefing for the day’s mission in direct support of mission to the Ministry of Culture. The brief was conducted in accordance with standard operating procedures and included the overall situation in Baghdad, mission brief and rules of engagement. The intelligence portion of the brief highlighted venue and route specific threats of direct and indirect fire, as well as possible and multiple VBIED’s (vehicle borne improvised explosive device) I was the Right Rear Gunner in the Vehicle, a Suburban, of a motorcade. On each rear door, in big white letters, it says “WARNING – Stay back 100 meters”. This is written in both English and Arabic. There were four other personnel in this vehicle. I was armed with a U. S. Department of State issued rifle, . During my military service I received extensive training in the use of this weapon, to include firing at known and unknown distances and at multiple targets both stationary and moving. I have also trained with this weapon in close combat and urban combat environments. I last zeroed and qualified with this weapon in early May 2006 and performed additional live-fire training, to include firing from a Suburban vehicle, on...

Our mission today was an advance for at the Ministry of Culture. This mission required us to leave the relative safety of the U.S. Military-controlled International Zone and travel for several kilometers through a part of Baghdad where para-military / Insurgent forces hostile to the U.S. presence in Iraq routinely conduct terrorist and guerrilla operations. Attacks on American military and civilians are prevalent in this area.
On the 30th day of May 2006 at 0950 hours, _______ was in route to the Ministry of Culture _______ to conduct an Advance for _______. _______ was traveling in the vicinity of _______ in a motorcade.

The congestion of the area created stop-and-go traffic, making the motorcade extremely vulnerable to a VBIED attack. The traffic trailing the motorcade was adhering to commands to maintain a standoff from our motorcade at about 30 meters. As the Right Door Gunner, I observed a silver Mercedes sedan maneuver around the halted traffic and continue toward our motorcade. The Well Gunner, _______ shined the spotlight at the Mercedes. I could see drivers from the halted vehicles signaling, with the common hand signal to yield, for the Mercedes to stop.

There was a single occupant, the driver in the vehicle. I assessed the Mercedes as a possible threat. I observed a non-lethal flare fired from the Well Gunner fly directly over the suspect vehicle. The vehicle did not slow its approach to our motorcade and had closed to about _______ meters. In past incidents, non-threat vehicles would slam on their brakes when they saw the flares. I assessed the Mercedes as a possible VBIED and imminent threat. I opened my door, simultaneously hearing a shot fired from the Well Gunner and seeing impact in the grill of the threat vehicle. The threat was not disabled and continued to close on the motorcade, without slowing, now at less than _______ meters. I assessed the situation as the Mercedes being a hostile. I aimed and fired 2 well-placed shots at the grill of the Mercedes in an attempt to disable the vehicle and threat. I could hear other shots fired from the Well gunner and the Left Door Gunner, _______. I observed rounds impacting the grill of the Mercedes. I reassessed the threat and saw that the Mercedes still had not slowed its closure with our motorcade at all, closing to about _______ meters. I fired two more well-placed shots in the grill of the Mercedes to further attempt to disable the threat. I reassessed the situation and observed rounds impacting the grill and the windshield of the threat vehicle. The threat vehicle seemed to finally be disabled and slow to a stop. It did not appear the driver stopped the vehicle himself. I am confident all four of my rounds impacted the grill of the Mercedes. I did not observe any casualties. _______ Shift Lead, _______ immediately reported the incident to the TOC as we continued mission to _______ END-

I, ___________, hereby make the following statement at the request of __________, who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department’s Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.
In 2004, I was honorably discharged from the United States Army. In 2006, I was hired by Blackwater Security Consultants and was trained on performing personal security in high threat areas for the U.S Department of State. In 2007, I arrived to Baghdad, Iraq and was assigned to Team __ which is a Technical Site Survey (TSS)/Advance team. The TSS/advance team is responsible for and ensure the security of the venue prior to the Protective Security Detail's arrival. While on Team __, we have trained with aggressor vehicles to practice our escalation of force standard operating procedures. We also train on emergency tactics, to best prepare for any situation that might arise while conducting a mission. During my time in Baghdad, Iraq from 2007 to present day I have never discharge my weapon to mitigate a threat to our motorcade. I have been in numerous situations where I was able to mitigate the threat without firing a shot.

On Tuesday, May 30th, at 0915, I staged and conducted an operational briefing for the day's mission in direct support of __ mission to the Ministry Culture of __. The brief was conducted in accordance with __ standard operating procedures and included the overall situation in Baghdad, mission brief and rules of engagement. The intelligence portion of the brief highlighted venue and route specific threats of direct and indirect fire, as well as possible multiple VBIED's (vehicle borne improvised explosive device) Past intelligence reports have stated a direct VBIED threat on Coalition Forces and Suburban Vehicles.

I was the Left Rear Gunner in the fighting__ suburb in a __ motorcade. This vehicle is equipped with a ____, which allows the Well Gunner to interact with traffic to the rear. There were four other personnel in this vehicle. I was armed with a U. S. Department of State issued rifle designated as the ____. During my military service I received extensive training in the use of this weapon, to include firing at known and unknown distances and at multiple targets both stationary and moving. I have also trained with this weapon in close combat and urban
combat environments. I last qualified as expert with this weapon in April 2006 and performed additional live-fire training with this weapon in April 2006.

Our mission today was to advance for the Ministry of Culture. This mission required us to leave the relative safety of the U.S. military controlled International Zone and travel for several kilometers through a part of Baghdad where para-military forces hostile to the U.S. presence in Iraq routinely conduct insurgent operations. Attacks on American military and contractors are prevalent in this area.

Our vehicle was the sedan make vehicle. Our Well gunner utilizes a spotlight and pen flares to ensure cars and other threats keep a safe distance away from our motorcade. I use voice commands such as "kiff", meaning patience/stop in the Iraqi language and physical gestures to keep these same threats at a safe distance away from our motorcade. Most Iraqi drivers heed all of these signs and keep a safe distance away from the motorcade. The motorcade was traveling to the Ministry Of Culture on a two lane road.

We were held at an intersection in dead lock traffic near the motorcade. All traffic behind us adhered to our commands and formed two lanes of cars which were pulled off to the right and left side of the road approximately 80 meters behind our motorcade. I observed a Gray Mercedes 4-door sedan make an aggressive lane change behind all the stopped traffic and accelerate toward us at a very high rate of speed. At that time I noticed the well gunner shining his spot light at the driver of the Mercedes and flashed it on and off to gain his attention while giving the hand and arm signals in an attempt to get him to stop which he did not. At this time I opened my door and was also given hand and arm signals to the driver of the Mercedes to try and get him to stop his vehicle. The Drivers of the stopped vehicles also observed the Mercedes attempting to bypass the stopped traffic. They leaned out of there windows holding out there hands signaling for the Mercedes to stop along with the pedestrians standing along the median signaled for the vehicle to stop. The Mercedes ignored the signals and accelerated past the stopped traffic coming toward us at a very high rate of speed. The well gunner fired one pen flare aimed straight at the vehicle and passed just above the roof of the vehicle.

At this time I could here the verbal command "kiff" (to stop), coming from the right door gunner, the well gunner and myself. The driver continued to close the gap on our motorcade, ignoring our repeated directions to stop. Based on my experience, training and recent intelligence reports, I determined that the vehicles actions were a threat to our motorcade. At that time I could hear the well gunner fire two shots in an attempt to disable the vehicle. The vehicle was not disabled and the driver did not slow but continued towards our motorcade. At this time I yelled that I was taking a shot and fired two shots into the grill of the vehicle which was now about meters from our convoy. The Vehicle was still not disabled and continued towards or motorcade. I then fired one shot into the windshield of the vehicle in hopes of stopping the threat to our motorcade.

At this time the vehicle had gotten within meters and eventually came to a stop. I did not observe any injuries to the driver at this time. I immediately notified my Shift Leader and gave him a situation report. The Shift Leader sent a situation report to the Tactical Operations Center. continued mission to the Ministry of Culture without further incident or injury.
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

Please review the above Incident Reports from Baghdad.

**Summary**

As of 30 May 2006, the rear security officers fired approximately six (6) disabling rounds into the engine compartment area in efforts to stop a potential threat.

During motorcade operations to the Ministry of Culture in Baghdad, the rear security officers observed a silver four door Mercedes sedan (suspect vehicle) with a single male occupant rapidly and aggressively approaching the motorcade from the rear. The suspect vehicle maneuvered in and out of traffic as it move forward towards the motorcade.

(Field Note: The Operational Pre-brief included an intelligence portion that highlighted venue and route specific threats of direct and indirect fire, as well as possible and multiple VBIED's for this particular venue plus - recent Intel reports within the last week indicated that there were specific threats to SUV's departing the International Zone and there were specific threats of two VBIED's roving in the vicinity.)

The rear security officers immediately deployed verbal and non-verbal (spot light and pen flares) warning signs to stop, slow or divert the suspect vehicle away from the motorcade. According to the report, the suspect vehicle failed to comply with all warning signs and continued to approach the motorcade with aggressive actions.

At this time, the rear security officers fired approximately six disabling rounds into the engine compartment area in efforts to stop the potential threat. The suspect vehicle immediately stopped. There were neither injuries nor collateral damage to report. The motorcade continued without further incident.

DECLASSIFIED
To all,

On Tuesday, May 30th, at 0915, staged and conducted an operational briefing for the day's mission in direct support of PSD mission to MO Culture. The brief was conducted per SOP and included the overall situation in Baghdad, mission brief and rules of engagement. The intelligence portion of the brief highlighted venue and route specific threats of direct and indirect fire, as well as possible multiple VBIED's.

The Follow Vehicle load plan was as follows:

Vehicle is a ________________________________ which allows us access to the rear from a ________

Upon departure from ______ via the ______ was traveling in a ________ motorcade heading Northeast towards ______ As ______ approached ______ a suspicious silver Mercedes was spotted by the TC. This vehicle was acting very suspicious towards the motorcade by not stopping, or moving out of the way despite multiple signals from the driver, and driving slowly and attempting to turn into our motorcade. The vehicle finally moved over to the right side of the road and the motorcade passed the vehicle on the left. As we were approaching ______ it was noticed the intersection was very congested so we created some stand off from the front and the rear. As the motorcade was waiting for traffic to clear, the same Silver Mercedes was approaching from the rear. The vehicle was seen maneuvering around stopped traffic that was adhering to our commands. It was also noticed that civilian vehicles that were stopped and adhering to our commands were attempting to signal to the driver of the Silver Mercedes to stop. With no success, the Silver Mercedes continued around the stopped traffic and accelerated towards the motorcade. The two rear gunners and my well gunner were giving verbal and visual commands including flashing a spot light to signal for the vehicle to stop. With consideration to the threatening manner in which the driver was operating the vehicle and the fact that the driver repeatedly ignored multiple less lethal warnings, the vehicle was considered a direct threat to the motorcade. As the vehicle continued to approach our motorcade, the well gunner fired one pen flare. The pen flare was aimed directly at the vehicle and sailed right over the hood. The vehicle continued its approach - despite multiple warnings. The well gunner fired one well-placed round from his ______ into the engine block of the aggressive vehicle. The vehicle did not stop or attempt to slow down. The well gunner fired another well-placed round to the vehicles engine block. The vehicle continued to come towards the rear of the motorcade at the same rate of speed. Both door gunners then placed two well aimed rounds to the subjects' engine block and hood area. When the Gunners reassessed the situation, they noticed the vehicle was still approaching at the same high rate of speed. Both Door
gunners and Well gunner transitioned to the windshield and placed two more well-aimed rounds to the passenger side and driver side windshields. The vehicle then stopped in the middle of the roadway as we continued the mission. [___] SL called the incident to the TOC as [___] continued mission to [___]. After the incident was reported, Big Army went to the scene and reported nothing found. No injuries were observed to the driver.

*Intel reports within the last week indicated that there were specific threats to Suburbans leaving the International Zone and there were specific threats of 2-VBIEDs roving in the vicinity of [___]. It should be noted that on the rear of our black fighting follow, it says in big, bold white letters "Warning stay back 100 meters" in both English and in Arabic.*

[___] SL immediately notified RSO/TOC of the incident. [___] SL notified the [___] Detail Leader.

Upon return to [___] SL, LR Door Gunner, RR door Gunner and Well gunner reported to the RSO/TOC for a debrief and spot report.

No injuries or additional property damage was observed. For further information see attached DS Sworn Statements by listed Operator's involved.

If you have any additional questions please contact me directly.

Spot Report – 053106-02

Subject: Sniper Attack on COM PSD in Tikrit

Reporting Office: REO Kirkuk – Regional Security Officer

Summary: Two shots were fired at a BW[ ] while he maintained an observation post at the Tikrit Provincial Council Center during a PRT visit. The protectees were evacuated without incident and there were no casualties.

Report: On May 31, 2005, ~ 1340hrs, a COM Blackwater PSD[ ] was fired upon by an unidentified sniper as he stood [ ] at the Tikrit Provincial Council building. Two aimed rounds impacted on a wall adjacent to the [ ] position. The direction of the fire or identity of the sniper could not be determined. The second round appeared to be a tracer. The protectees were immediately evacuated and left the venue 15 minutes prior to their scheduled departure. There were no injuries.

RSO Action: Movements to the Provincial Building on hold until more site security can be initiated. Awaiting PSD debrief and will pass details for exploitation to RSO Baghdad TOC. This is at least the second time this venue has received SAF since November.

Location: Tikrit, Iraq

<td>sniper fire from unknown element</td>
<td>Provincial Council Building GRID</td>
<td>On 31 May 2006 at approximately 1230 hrs. I received sniper fire directed at me while manning an unknown position of the Provincial Council Building in Tikrit, Iraq. While in my position, I received sniper fire from an unknown element. There were 2 shots fired at me, the first round impacted the wall approximately 6 inches to the left of my head. The second round impacted the wall approximately 4 to 5 ft below my position. After the first shot was fired I ducked down as low as I could but tried to locate where the shot came from. When the second round impacted I got down completely out of sight and waited for the attack to stop. I over heard the radio traffic from the PSD element on the ground and they were thinking the shots were fired by IP's stopping traffic. I advised my shift leader by radio that the two shots were directed at me and had impacted very close me and they were not fired by IP's. The TC advised all positions to stay down and relocate. Then moved to another position, out of the line of fire. The motorcade left the venue and returned to FOB Speicher. When the motorcade cleared the intersection in front of the Provincial Council Building the advance shift leader radioed for the advance team to collapse and load into the vehicles to depart the venue. We left the venue and returned to FOB Speicher with out any further incidents. Nothing follows.</td>

PSS, Tikrit SET Team
DSS Iraq Mission
Subject: Non-COM PSD Team involved in an incident.

Reporting Office: REO Al Hillah

Summary: On June 2, 2006, at approximately 1015 hours, a Triple Canopy non-COM PSD Team comprised of non-tactical vehicles with three passengers (KBR employees), was involved in an incident involving a black BMW occupied by an unknown number of individuals. As the convoy approached the entrance to FOB Charlie the rear vehicle in the convoy was struck, pushed off the road, and became disabled by the BMW. The lead and limo proceeded onto FOB Charlie while the BMW backed up and attempted to ram the disabled vehicle again. PSD personnel exited the vehicle and immediately came under SAF from an unidentified location. The PSD team then engaged the BMW with SAF. The lead vehicle returned and safely removed the PSD personnel from the scene. No casualties were reported.

RSO Action: Dispatched Army assets to secure the site and requested a military escort be provided for the teams return to REO Al Hillah.

Location: FOB Charlie, South Central, Iraq

Drafted By: Mike Duke, Watch Officer, RSO TOC Baghdad, Iraq.
Summary:

As of 05 June 2006, during motorcade operations in Al-Hillah, it appears that three (3) disabling rounds was fired into the engine compartment in efforts to stop a potential threat.

During motorcade operations in Al-Hillah (RTI compound), the rear security officer observed a silver sedan (suspect vehicle) with two male occupants quickly and aggressively approaching the motorcade from the rear. The security officer immediately deployed verbal and non-verbal (pen flare, hand signals and smoke) warning signs to stop, slow or divert the suspect vehicle away from the motorcade.

According to the report, the suspect vehicle failed to comply with all warning signs and continued to approach the motorcade from the rear. At this time, the rear security officer fired three disabling rounds into the engine compartment in efforts to stop the potential threat.

The suspect vehicle came to an immediate stop. There were no injuries or collateral damage to report. The motorcade continued without further incident.

Sworn Statement

Date
05 June 2006
0945

Time

Location
One-hundred meters north of Karbala traffic circle

I, ________________, hereby make the following statement at the request of ________________, who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

On Monday, June 5th, at 0945, Team __________________ conducted an operational mission to the RTI compound in Al Hillah, Iraq for meetings. I was the left observer in the vehicle of a vehicle motorcade.

Our Motorcade was traveling south on route __________________ when our motorcade came to halt due to heavy congestion in the intersection to the front of our motorcade. At that time the TC of my vehicle ________________ called out that we had traffic to our front and that we will need to create a reactionary gap. I then opened my door and leaned out and started to give visual and verbal warnings to the approaching vehicles to the rear of our motorcade to stop.

The vehicles to the rear stopped immediately, approximately at 60 meters to the rear of our vehicle. I heard over the DS issued radio that other PSD team members where deploying from their vehicles to clear the traffic to the front of the motorcade. At this time I retrieved a smoke canister from the vehicle. Smoke canisters are commonly used by PSD motorcades when stopped in traffic congestion to attract the attention of an inattentive driver, and or to signal traffic to yield and respect the motorcade's reactionary gap.
I saw a silver sedan overtaking stopped traffic and approaching our motorcade from a distance of 1 meters. Due to the speed of the approaching sedan, I was unable to ascertain more specific details reference the occupants of the vehicle. I deployed the smoke canister and threw it to the rear of our motorcade to signal the approaching silver sedan to yield, and transitioned back to my.

I began to acquire a sight picture with my to prepare to deploy disabling rounds at the silver sedan. I saw a pen flare fly by the sedan at approximately meters away, but the vehicle continued to rapidly approach our motorcade. I then lost my field of fire and visual with the silver sedan. I heard three shots and heard the rear observer, advise that the silver sedan had stopped and that he had fired 3 disabling rounds into its grill.

I continued to give hand signals to halt traffic briefly until traffic cleared enough for our motorcade to proceed. We continued to our venue with no further incidents.

No further information at this time.
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

I, ____________________________, served in the United States Marine Corps, from ____________________________.
I was hired by Blackwater Security Consulting, Moyock, North Carolina, where I received Department of State training for operating in a Personal Security Detail in a high threat environment. The vetting course included qualifying with the and the My training also included formations, driving at high speeds, and attacks on principles. I am currently at the regional embassy in Al-Hilla, Iraq. I have been here since Since being assigned to the REO al-Hilla, I was put in charge of Columbian nationals conducting static security around the embassy. My duties include supervising the Columbians in all activities which include personal and vehicle searches.

I also supervise all movements that come into the compound and leaving the compound. I inspect and inventory all the weapons and gear in all the towers around the compound and I assist in the training of the Columbians nationals in different reaction, evacuation drills, and the On March 21, 2006 I was assigned to Team at the regional embassy in Al-Hilla and have been conducting many protective details ever since.

On June 5, 2006 at 0940 hours while manning the position of the Team counter assault vehicle I discharged three disabling rounds from a weapon system into a silver sedan which posed a threat to our vehicle at

While traveling from the regional embassy office in AL-Hilla to the RTI compound our motorcade was traveling south on Route As we were traveling south on Route traffic was pulling to the side of the road and keeping a safe distance from our motorcade. As we approached Karbala circle the motorcade slowed down and stopped 100 meters north of the traffic circle due to heavy traffic. The left and right rear observers were given the command to crack doors to signal traffic to the rear to yield and maintain a reactionary gap.
At this time I began to flash my surefire flashlight to signal for traffic to yield. All the traffic came to halt at a safe distance of 60 meters behind our vehicle. I saw a silver sedan weaving through the stopped traffic that had yielded to the rear of our motorcade. I notified my teammates of the aggressive silver sedan and continued to flash my surefire light at the vehicle to signal for the driver to yield. At forty meters I noticed that the vehicle was occupied by two clean shaven males with a dark complexion, wearing light colored clothing.

At meters the vehicle continued approaching at a high rate of speed, disregarding all visual signals to yield. At this time I fired a pen flare at the silver sedan, while left rear observer deployed a violet colored smoke grenade to signal for the silver sedan to stop.

Due to regular intelligence briefs, I am aware that a commonly employed insurgent tactic is to drive a vehicle laden with explosives into coalition vehicles or personnel and detonate said vehicle. It should be noted that a silver sedan matching the description of the above listed vehicle was recently added to the BOLO list. I knew that if the suspect vehicle were allowed to approach within meters, our motorcade and principal could be within the blast radius if the vehicle were to detonate. Due to this, I fired 3 disabling rounds at the grill of the silver sedan from the weapon system. The suspect vehicle came to an immediate halt and both occupants put their hands up. No injuries were apparent. I immediately notified the vehicle commander and teammates of my use of non-lethal force by firing disabling rounds at the suspect vehicle.

Shortly after, traffic cleared and the motorcade continued to the venue with no further incidents.

End of statement.
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

Page 4 of 4 Pages
On 05 June 2006, at approximately 0940, I, a DSS certified personal security specialist, was the CAV (Counter Assault Vehicle). While transporting principles to R.T.I venue, we were traveling southbound on Route our motorcade was approaching Karbala Traffic Circle. As a I was focused on my sector, which is the road to my front. As the motorcade approached Karbala Traffic Circle, I observed that the motorcade was slowing down due to heavy congestion to our front. At that time I informed the occupants in my vehicle we were going to be stopping. At that time our Vehicle, the Counter Assault Vehicle (CAV), kept a distance of several car lengths from the main body of the motorcade and did not allow approaching vehicles from the rear to violate our reactionary gap. Our left and right observers then cracked doors and used hand and arm gestures to signal approaching traffic to yield to our motorcade.

While still looking forward I noticed that the traffic had come to a complete stop and team members were deployed from the main motorcade to direct and clear traffic so we could start moving again. At that time I heard the sound of a pen flare being deployed and another observer yelling "smoke out". Then I heard a three round burst from our that is mounted in the rear of the CAV. While all of this was happening I was still focused on what was going on to my front.
so I didn't physically see any of this. Soon after the shots were fired, I saw that the traffic situation in our front had cleared and I yelled to everyone that we were moving. At which time the two rear observers in the CAV, got back in the vehicle, closed their doors and we departed the location en route to our planned venue. The movement continued without further incident.

On 05 June 2006, at approximately 0940 hours, I was assigned to Team _[]. I am a Department of State trained personal security detail member / . I was in the last vehicle in a---[vehicle motorcade. I was sitting in the right front seat as the ________]. The Team was transporting principals to R.T.I. venue.

Our motorcade was traveling south on route _______. Approximately 100 meters north of Karbala Circle the motorcade suddenly stopped due to congested traffic in the traffic circle. I heard the Tactical Commander announce that they were going to deploy team members to clear traffic. I saw fellow team members exit the vehicles and move toward the front of the motorcade in an attempt to clear traffic.

My vehicle was approximately [ ] meters behind the ______ vehicle in the motorcade. We were stopping traffic from the rear in an attempt to maintain a _____ meter security perimeter. Both my right and left ________ rear observers had opened their doors. They were using hand and arm signals to stop approaching traffic. Traffic had stopped approximately 60 meters behind our motorcade. I heard the rear observer _______ state that there was a fast approaching silver sedan. ______ said the silver sedan was weaving through...
stopped traffic and was still rapidly approaching the motorcade despite his signaling the vehicle by flashing his surefire light and the left and right rear observers signaling with hand gestures commonly used to signal Iraqi drivers to stop. At that time one smoke device and one pen flare was deployed in attempt to signal the vehicle to stop. The vehicle continued through the smoke and ignored the pen flare that was deployed to signal it to stop. I heard 3 rounds fired. Rear observer reported that the silver sedan was approximately meters from our motorcade and still approaching rapidly when he fired 3 disabling rounds from his weapon system. stated that the vehicle stopped immediately after the rounds impacted the grill. I did not see the rounds impact the vehicle.

I notified the Shift Leader immediately. I asked the rear observer if there appeared to be any injuries. He stated that there appeared to be no injuries. The vehicle was a silver sedan, occupied by two males.

Shortly after the motorcade continued toward the Karbala traffic circle en route to venue. Once we arrived on venue I notified Blackwater Operations Center and gave Ops Chief a situation report of the incident.

Nothing further to report at this time.
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

On 5 June 2006, at approximately 0940, PSD Team ______ Team, departed the Al Hillah REO in order to conduct a PSD mission to the RTI Compound.

The Team was moving south on Rt. ______ in a ______ motorcade, which consisted of ______. Approximately 100 meters north of Karbala traffic circle the motorcade slowed due to heavy traffic. The motorcade eventually came to a complete stop. At that time two team members from the ______ vehicle and two team members from the ______ vehicle were ordered to deploy to the front of the motorcade in order to direct and clear traffic. At this time the Counter Assault Vehicle pulled rear security for the motorcade. The left observer ______ and the right observer ______ from the Counter Assault Vehicle used hand signals and verbal warnings to stop approaching traffic. All traffic to the rear of the motorcade stopped approximately 60 meters away from the Counter Assault Vehicle. Then a silver sedan weaved through the already halted traffic approaching the motorcade. The left and right observers used hand signals and verbal warnings to stop the silver sedan. The silver sedan kept approaching. Left rear observer ______ deployed a smoke canister to signal approaching traffic to yield.
When the silver sedan was approximately ___ meters away the rear observer ___ deployed a pepper flare. The silver sedan kept approaching. When the silver sedan was approximately ___ meters away the rear observer fired a three round burst from his State Department issued ___ at the grill of the sedan in order to disable the vehicle. The vehicle then came to a stop. At that time the Counter Assault Vehicle Commander ___ informed the Shift Leader ___ via ___ radio that the Counter Assault Vehicle had fired shots to disable a vehicle.

Traffic soon cleared and the motorcade was able to continue en route to the RTI Compound.

Once the team arrived on venue the Counter Assault Vehicle Commander ___ notified BW Ops ___ of the incident.

I have verbally interviewed those individuals involved in this incident and have reviewed their written statements. I believe the statements to be complete and represent the perceptions of each individual involved.

I have nothing further to report at this time.
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

On 5 June 06 at approximately 0945, I was traveling in the last vehicle of a vehicle motorcade, of Team in the right rear observer position. Our motorcade was on its way to our venue RTI. We were heading south on route into Karbala circle when we were caught in traffic congestion approximately 100 meters north from the entrance of the traffic circle. Vehicle commander advised us over the radio to stop traffic to the rear of our motorcade to provide a reactionary gap. I exited the vehicle and started signaling traffic with hand and arm signals commonly used to stop Iraqi traffic. We had a lane of traffic stopped approximately 60 meters from our position, when a silver sedan came weaving in and out of traffic towards our position. The vehicle did not heed our hand and arm signals and continued approaching rapidly. The rear security deployed a pen flare at approximately meters from our position and the left rear observer deployed a violet colored smoke canister, both to signal the driver to stop his vehicle, both were ineffective. I was preparing to fire disabling rounds into the grill of the vehicle when I heard three rounds fired by rear observer . Upon deployment of three disabling rounds the silver sedan stopped immediately. I saw that the vehicle was occupied by males, and saw no apparent signs of injury. Both occupants remained inside the vehicle...
We continued to pull security on the threat for a short period of time until we were able to clear traffic and continue to the venue without further incident.

I have nothing further to report at this time.
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

**SYNOPSIS**

On 5 June 2006, a Blackwater PSD team leaving REO Al Hillah, engaged a suspicious vehicle with rounds from an [ ] The driver of the suspicious vehicle was not hurt in the incident. ARSO investigation led to the determination that this was a justified shooting incident.

---CLOSED---
1. On 05JUN2006, RA interviewed the Shift Leader (SL) for the 05JUN2006 PSD movement from REO Al Hillah to the Research Triangle Institute (RTI) compound. According to the team’s vehicle motorcade moving south on route when they started to slow due to heavy traffic and eventually came to a complete stop. At this point in time two members from the lead vehicle and 2 members from the follow vehicle were deployed to clear traffic. While this was happening the Counter Assault Vehicle (CAV) was pulling rear security for the motorcade. The left and right observers in the CAV opened their doors to give visual and verbal warning to stop approaching traffic. Due to his position in the motorcade did not witness the events to the rear, he commented on his actions as a SL and what he heard on the radio.

2. RA interviewed the left rear (LR) of the CAV. restated the heavy congestion and traffic. was commanded by the vehicle commander to open the doors ensure the vehicles to the rear knew to maintain their distance (at this time it was approximately 60 meters). began to use visual and verbal signals for the vehicles to stop/maintain their distance. was in the process of deploying a smoke canister to signal any inattentive drivers to stay back when he saw a silver sedan starting to overtake stopped traffic (a silver sedan was added to the “BOLO” list the night prior reference deployed the smoke at approximately the same time he saw a pen flare being shot out of the rear of the CAV at the approaching sedan. He transitioned to his and began to take aim at the aggressive vehicle, he did not shoot due to the fact the approaching vehicle moved out of his field of fire. continued to give visual and verbal signals for other vehicles to stay back after the shots were fired.

3. RA interviewed the right rear (RR) of the CAV. deployed from the CAV to ensure the vehicles to the rear maintained their distance. stated he saw the silver sedan drive past the other vehicles that were stopped approximately 60 meters to the rear, he heard “smoke out” and almost immediately thereafter saw a pen flare launched from the rear of the CAV. saw the silver vehicle drive at the motorcade after the pen flare had been launched and smoke deployed (he saw the vehicle drive through the smoke cloud). prepared to fire disabling rounds when he heard the well gunner fire at the approaching vehicle. He saw the vehicle come to a stop at approximately 25-30 meters.

4. RA interviewed the well gunner and person responsible for firing the rounds. When the motorcade came to a halt, and the LR and RR to deploy to give their signals for traffic to stop/maintain their distance, he immediately began to use a “Sure Fire” flashlight to signal vehicles not to move. noticed a silver vehicle begin to drive past the stopped vehicles, at this point he prepared to use a pen flare should the driver continue to disregard the signals from the LR and RR. When the vehicle continued to approach the motorcade ignoring the signals he fired a pen flare towards the vehicle. When the vehicle failed to stop after the pen flare he fired three rounds into the grill.

5. Due to the fact that the RSO shop has a good working relationship with the Iraqi Police (IPs), RA contacted them to ascertain if there were any injuries or injuries had reported the incident. The IPs
reported no injuries and was not aware of any incidents involving an American PSD team and the local people. On June 2, 2006 when a Triple Canopy non-COM PSD team was involved in car accident and shooting, I had the IPs bring in the drive of the vehicle that the PSD team destroyed. The IPs were not able to produce any people or evidence from the events that transpired.

6. Based on the facts presented, ARSO concludes that this was a justified shooting incident.
INCIDENT REPORT
This report may be in addition to DS SPOT reporting.

Date of Report: 05 June 2006
Location: Basrah REO, Iraq
Task Order:
Person Releasing Report: Tracy Carroll
Title of Person Releasing Report: TC Project Manager

Date of Incident:
Time of Incident: Aprox. 1036 hours
Contractor Involved: Triple Canopy, Inc.
Detail Location of Incident: EOB compound

Incident Synopsis:

At approximately 1036 hours on 05 June 2006, one round was fired at a motorcycle with 2 males on board who refused to stop after adequate warnings, and who posed an imminent threat to the motorcade. No injuries were noted or reported.

The following is the subsequent of events: (initial time approx)

0954 hours: Motorcade departs the US REO
0958 hours: Motorcade arrives on Venue
1035 hours: Motorcade departs Venue
1036 hours: Motorcade stops in traffic near
1036 hours: Motorcycle is observed making its way around stopped traffic towards the motorcade, and refuses to heed warnings.
1036 hours: Shot is fired and motorcade continues
1040 hours: Motorcade returns to the US REO

Outline injuries if applicable:

None noted or reported

Supervisor Actions to Mitigate Adverse Actions or Prevent Re-occurrence:

Discussions between the RSO, Project Manager, and Deputy Project Manager are ongoing.
Personnel Notified of Incident:

Triple Canopy PM/DPM/ML/RSO/ARSO

Supervisor synopsis of local impact of incident:

Refer to attached reports.

Additional Reports Generated:

See attached statement of
TO: Ivan Wray, Regional Security Officer, US Embassy, Basrah, Iraq

FROM: Protective Security Specialist, Team

SUBJECT: Shooting incident on 05 June 2006

I served in the United States Marine Corps from...

In __________ I attended the WPPS training program with Triple Canopy, and received further training regarding, but not limited to: Protective Security, Vehicle Driving Dynamics, Advanced Weapons Training, and the Department of State's Use of Force and Rules of Engagement. After successfully passing the WPPS Certification, I attended the Department of State's ______ course in ______ and successfully passed the certification.

Upon successful completion of training, I was deployed to the US REO in ______ of ______.

On ______ I was assigned to____ Team, Team ______ at the US REO in Basrah, Iraq. On this day, I was specifically assigned to the Advanced Team as a 2nd Agent in Charge. My primary weapon system on this day was the ______ This weapon was issued to me by the Department of State, and I have had extensive training and experience in the use of this weapon system. My last qualification with this weapon system was in May 2006.

I am also familiar with the Department of State's Rules of Engagement policies as directed under Section III and Section XX. I had recently attended in-service training on the DOS Rules of Engagement in May 2006. I am familiar with the DOS ROE's as they apply to me.

Our mission on 05 June 2006 was to transport 3 Department of State Principals and one Department of State Interpreter to the Basrah Business Center. This mission required us to travel in a_________ motorcade, a few kilometers through Basrah City, where forces hostile to the MNFI operate. The attacks on MNFI and civilians working for the MNFI are common.

During previous intelligence briefings, I learned that a common tactic employed by Anti MNFI forces was the use of a motorcycle to conduct sudden small arms, indirect fire, and grenade attacks on MNFI forces and personnel. As recently as 03 June 2006, reports indicated that insurgent forces on a motorcycle detonated an IED in the Old Basrah Market area, killing at least 27 civilians and wounding many more. Recent reports stated...
both males. I then closed my vehicle door and we continued on with the motorcade towards the venue.

The entire event, from the time I realized that the motorcycle posed an imminent threat to the motorcade, until I fired my 1 (one) round into the motorcycle was no more than 5-10 seconds. I had no time to deploy any other means to signal the motorcycle to stop. I had no other alternative but to fire into the motorcycle to stop its forward momentum and its continuing threatening actions.

All of the above facts are true to the best of my direct knowledge and recollection.

Respectfully,

[Signature]

From: [Name]
Re: Contact @ the area of

On the above date at about 1020 am a shot was fired from the [vehicle] in Team [motorcade]. I, [Name], was the [in that vehicle]. We were turning right onto the [street] when a fast moving vehicle came from the left side. The left rear gunner was [Name] who I hear pop his door and yell at the vehicle and then I heard one single shot was fired. I radio to [Name] the team leader and noticed him that a shot had been fired. We then proceed back to [Team].
To: Regional Security Office

From: Team

On June 7, 2006 at approximately 1024 AM, Team was forced to take a back street from where traffic was heavy while approaching coming out on the main Highway our Limo was running hot so was unable to keep a normal operation speed. Doing so I ordered the lead vehicle to push up and block traffic where they did so and a white vehicle single passenger was moving at a high rate of speed, which when coming out was already danger close. Which the Lead Left Rear had to make a judgment call. Instead of allowing the vehicle to hit the Limo he engaged the vehicle with a single round to the right side front of the oncoming vehicle which from the back of the motorcade I was able to witness all the signs giving by to avoid but the driver did not comply with orders giving. I did witness a flashing light from his weapon as well as hand and arm signals. I also did witness the passenger get out of the vehicle so no damage or injury was inflicted to this person. I called a report into the TOC and pushed on to with out further incidents. END OF STATEMENT
To: Regional Security Officer

From:

On June, 7th 2006 at approximately 1024 hrs, I was left rear in the lead vehicle of a vehicle motorcade. We were traveling into when a white pick up truck with one occupant was traveling towards us at a high rate of speed. As the lead vehicle made the turn I observed the truck was approximately 75 yards from us, I yelled popping door, then automatically popped the door open then gave the hand and arm signals for them to stop. The driver made eye contact and proceeded to drive towards us at that time I used my flashlight on my weapon system to stop the vehicle, he did not comply at this time my muzzle was already up as show of force. At this time I shot a round into the vehicle which caused him to come to a stop. When I witnessed the vehicle stop immediately went back to covering my sector and continued on with the mission. ---

End of Statement

DECLASSIFIED
Subject: COM PSD Team fires one round into an aggressive vehicle

Reporting Office: RSO TOC - Baghdad

Summary: On June 7, 2006, at approximately 1024 hrs, a COM PSD Team engaged an aggressive vehicle with small arms fire (SAF) while enroute from the Ministry of Interior to the International Zone. As the Team approached an intersection the lead vehicle assumed a blocking position to stop oncoming traffic. While in the blocking position, the left-rear gunner, observed a Truck occupied by one Military Aged Male (MAM) driving aggressively towards the motorcade. As the vehicle approached to within 62 meters of the blocking position, the team members gave repeated hand and verbal signals for the driver to stop. The left-rear gunner then attempted to gain the drivers attention with several flashes of his high-powered flashlight, which were ignored by the driver. The vehicle continued towards the convoy in an aggressive manner and when it was within 62 meters the left-rear gunner engaged the vehicle with one well aimed shot from his rifle into the vehicle's grill area. The vehicle then came to an immediate controlled stop within twelve feet of the motorcade. The driver appeared to be uninjured. There was one principal in the motorcade and no COM personnel were injured. The motorcade continued to the International Zone without further incident.

RSO Action: RSO is investigating the shooting; PSD Team members are completing their written statements.
Location: Red Zone, Baghdad, Iraq

Reporte General Adicional:
Use of Deadly Force by Blackwater Tikrit SET PSD Team against unknown Local National (LN) vehicle.

On MSR in vicinity of grid ________________

On Sunday, 11 June 2006, at 0900, Blackwater Tikrit SET PSD Team staged and conducted an operational briefing for the day's mission in direct support of US State Department Provincial Reconstruction Team (PRT) to the Government Building. The brief was conducted per Blackwater Tikrit SET PSD Team SOP and included the overall situation in Tikrit, mission brief and Rules of Engagement (RoE). The intelligence portion of the brief highlighted venue and route specific threats of direct and indirect fire, as well as possible IED's / VBIED's.

The load plan was as follows.

At approximately 1011 hrs, the Blackwater Tikrit SET PSD Team departed COB Speicher en route to The Governorate Building in downtown Tikrit via vehicle motorcade to transport US State Department PRT members to a meeting. The motorcade left COB Speicher and turned right onto MSR __________. At approximately 1021 hrs, while traveling on MSR, __________ observed a white sedan closing on the motorcade from the rear. __________ advised __________ (Shift Leader) that we had a fast moving vehicle to our rear. He stated that he could see it in his mirror.

When the vehicle reached approximately 120 meters from the motorcade, I began shining a 2,000,000 candle power spotlight at the vehicle, and also confirmed with __________ that our rear strobe lights were in fact on. I continued shining the spotlight at the vehicle until it reached approximately __________ meters from the motorcade. At this time, I perceived the vehicle to be a potential threat to the lives of our principals and the PSD team. I advised __________ that I was preparing to fire a pen flare at the oncoming threat, in order to prevent it from approaching the motorcade. When the vehicle reached approximately __________ meters from the rear of the motorcade, I fired the pen flare. The flare bounced off the surface of the road, approximately 30 meters in front of the oncoming threat, and bounced into the median of MSR __________. Despite all previous warnings, the vehicle continued to close distance on us aggressively.

When the vehicle reached approximately __________ meters, I firmly believed this vehicle to be a definite threat, and I sounded off in the vehicle that I was preparing to fire. At approximately __________ meters I fired a 3-4 round burst from my __________ into the grill of the threatening vehicle in order to disable it. After receiving the burst of fire, the vehicle pulled off into the left shoulder of the south bound lane of MSR __________ in a controlled and deliberate manner, and came to a complete stop. As I continued observing the vehicle, I saw what appeared to be a single male occupant exit the driver's door of the vehicle.
An orange VS-17 panel was prominently displayed on the rear of the black motorcade follow vehicle. The vehicle's rear strobe lights were on, which can be clearly seen from over 800 meters during daylight hours. A 2,000,000 candle power spot light was shone out the rear of the motorcade follow vehicle, which can be seen at over 800 meters during daylight hours. A green pen flare was fired out of the rear of the motorcade follow vehicle. A 3-4 round burst of was fired into the grill of the threatening vehicle. A situation report was called into to the Blackwater Tikrit SET Tactical Operations Center (TOC) immediately following the incident.

I, hereby make the following statement at the request of ________, who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department’s Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

On Sunday, 11 June 2006, at approximately 1020, IVA Grid _______ I was driving the ______ vehicle in route to Tikrit Governate. I heard the well gunner, ______, say a fast moving vehicle was approaching from our rear. I glanced into the rear view mirror and witnessed a silver vehicle moving quickly and aggressively towards the motorcade approaching from the rear. I then heard ______, say, he was shooting a flare. I heard the flare pop and I glanced into the rear view mirror and saw a smoke trail that faded out of my line of sight. I then heard ______ say the vehicle was not stopping and he was preparing to fire his weapon. I did not look in the rear view mirror to avoid making my vehicle less stable. I heard a short burst, of 2 or 3 rounds, fired from the ______. I then glanced into my rear view mirror and saw the vehicle was pulling off the road.

I, hereby make the following statement at the request of , who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

On Sunday, 11 June, 2006 as the PSD motorcade (I was in the truck sitting in right rear position) was traveling south on the Tikrit bypass. Our well gunner called out a fast mover approaching our rear at about 100 meters out. He again called out that the same vehicle is still approaching at a distance of about 1 meters and that he is switching to the spot light. Again he called out that the vehicle is still coming and that if he is shooting the pen flare. Vehicle kept coming at a fast rate of speed and again our well gunner called out that the vehicle is within 1 meters and that he is taking a shot at the grill to disable the vehicle. I felt that the vehicle was a threat to us in the vehicle and also to the principles in the limousine ahead of us by the actions displayed and the lack of restraint in moving on the motorcade after all means short of lethal had been applied.

Nothing Follows
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

I,

...enlisted in the United States Marine Corps in...
In [_______], I attended Worldwide Protective Services (WPPS) training and evaluation at the Blackwater Training Center in Moyock, NC. In [_______], after successful completion of WPPS, I arrived in Baghdad, Iraq and was assigned to the Blackwater Tikrit SET PSD Team. In [_______], I returned to Blackwater Training Center, and successfully completed Worldwide Protective Services (WPPS) II training. Since arriving in Tikrit, I have served on the Advance Team, Close Protection Team, and have been assigned as the [_______] for the Motorcade [_______] Vehicle. During this six month period as the [_______], I have not been involved in any shootings while protecting Chief of Mission personnel.

On Sunday, 11 June 2006, at 0900, Blackwater Tikrit SET PSD Team staged and conducted an operational briefing for the day’s mission in direct support of US State Department Provincial Reconstruction Team (PRT) to the Governant Building. The brief was conducted per Blackwater Tikrit SET PSD Team SOP and included the overall situation in Tikrit, mission brief and Rules of Engagement (RoE). The intelligence portion of the brief highlighted venue and route specific threats of direct and indirect fire, as well as possible IED’s / VBIED’s.

The load plan was as follows:

At approximately 1011 hrs, the Blackwater Tikrit SET PSD Team departed COB Speicher en route to The Governorate Building in downtown Tikrit via [_______] vehicle motorcade to transport US State Department PRT members to a meeting. The motorcade left COB Speicher and turned right onto MSR [_______] At approximately 1021 hrs, while traveling on MSR [_______] I observed a white sedan closing on the motorcade from the rear. I advised [_______] that we had a fast moving vehicle to our rear. He stated that he could see it in his mirror.

When the vehicle reached approximately 200 meters from the motorcade, I began shipping a 2,000,000 candle power spotlight at the vehicle, and also confirmed with [_______] that our rear strobe
lights were in fact on. I continued shining the spotlight at the vehicle until it reached approximately 100 meters from the motorcade. At this time, I perceived the vehicle to be a potential threat to the lives of our principals and the PSD team. I advised _______ that I was preparing to fire a pen flare at the oncoming threat, in order to prevent it from approaching the motorcade. When the vehicle reached approximately ___ meters from the rear of the motorcade, I fired the pen flare. The flare bounced off the surface of the road, approximately 30 meters in front of the oncoming threat, and bounced into the median of MSR Tampa. Despite all previous warnings, the vehicle continued to close distance on us aggressively.

When the vehicle reached approximately ___ meters, I firmly believed this vehicle to be a definite threat, and I sounded off in the vehicle that I was preparing to fire. At approximately ___ meters I fired a 3 round burst from my _______ into the grill of the threatening vehicle in order to disable it. After receiving the burst of fire, the vehicle pulled off onto the left shoulder of the south bound lane of MSR ___ in a controlled and deliberate manner, and came to a complete stop. As I continued observing the vehicle, I saw what appeared to be a single male occupant exit the driver’s door of the vehicle, followed by what appeared to be a second male occupant exiting the passenger side door.

Nothing follows

I, hereby make the following statement at the request of , who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting therefrom may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

On 11 June 2006 at approximately 1020hrs while acting as in the follow vehicle of our PSD motorcade, my well gunner fired a 3 round disabling burst from his into the grill of a vehicle aggressively approaching from our rear.

At approximately 0900hrs the Tikrit PSD team staged and conducted an operational brief of the day's mission to transport members of the PRT Team to the Governate Council Building in Tikrit, Iraq for meetings. The briefing was conducted per team SOP and included mission brief, load out plan, rules of engagement and intelligence report highlighting trends in our area of operation. Intelligence trends included route specific threats of IED's, direct fire incidents and possible VBIED's in the Tikrit AO.

The load plan for the motorcade follow vehicle was as follows.

<table>
<thead>
<tr>
<th>Date</th>
<th>Time</th>
<th>Location</th>
</tr>
</thead>
<tbody>
<tr>
<td>11 June 2006</td>
<td>1020</td>
<td>MSR South in the vicinity of 62</td>
</tr>
</tbody>
</table>

Our vehicle (follow) was the vehicle in a car motorcade. At approximately 1010 hrs our motorcade, consisting of vehicles left COB Speicher and turned southbound onto MSR Traffic was moderate to light from the entrance to COB Speicher to the North Tikrit bypass where traffic became light. As the motorcade continued southbound on MSR and neared the vicinity of the above listed grid my well gunner, advised me there was a white vehicle coming up...
behind us at a high rate of speed. I looked into my side mirror and observed a white vehicle in the same lane we were traveling approximately 200 meters behind us. I told to continue to watch the vehicle and inform me of the situation. then told me he was shining the spotlight and the vehicle was not responding so he was going to fire a pen flare. I looked in the side mirror and the vehicle was now approximately meters behind us in our lane and continuing to quickly close distance on our vehicle. fired the pen flare then advised me the vehicle was not responding to the flare. told me the vehicle was continuing to advance then called out to the occupants of the vehicle he was going to fire. I looked in my mirror as fired a 3 round burst into the grill of the threat vehicle to disable it. I estimate the vehicle was approximately meters behind us still in our lane and quickly closing distance when the disabling shots were fired.

When the disabling shots were fired I observed the vehicle slow and pull to the left. I turned around and looked out the back of our vehicle and observed the white vehicle slowly and deliberately pull to the left side of the roadway towards the median and stop. I then observed two occupants exit the vehicle, one from the driver’s seat and the other from the front passenger’s seat. Both occupants appeared to walk to the front of the vehicle.

I turned back to the front and radioed the incident to the Detail Leader and the motorcade continued to the venue without further incident.

Nothing follows.
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

Subject: Tikrit SET PSD Team fires on aggressive vehicle.

Reporting Office: RSO TOC - Kirkuk

Summary: Blackwater PSD fires three rounds into approaching vehicle. No apparent injuries to occupants.

Report:

On 11 June, 2006 at approximately 1021 hrs, a Blackwater SET PSD Team en route from FOB Speicher to the Governorate building in downtown Tikrit encountered an aggressive vehicle. The motorcade was traveling in downtown Tikrit when the follow vehicle well gunner observed an aggressive vehicle approaching the motorcade from the rear. The well gunner used a 2,000,000 candle power spot light in an effort to gain the attention of the driver. The deployment of the light failed and the car continued to advance aggressively on the motorcade. At this time, the well gunner fired a pen flare into the road directly in front of the suspicious vehicle. This also failed to gain the attention of the driver. When the vehicle was within 52 meters of the follow car, the well gunner fired a three round burst from a 63 into the grill of the vehicle. The vehicle then came to a complete stop. Two occupants exited the vehicle without apparent injuries. No COM personnel were injured during the incident.

Subject: 11Jun06 PSD Incident Report

To All,  

On Sunday, 11 June 2006, at 0900, Blackwater Tikrit SET PSD Team staged and conducted an operational briefing for the day's mission in direct support of US State Department Provincial Reconstruction Team (PRT) to the Governor-ant Building. The brief was conducted per Blackwater Tikrit SET PSD Team SOP and included the overall situation in Tikrit, mission brief and Rules of Engagement (RoE). The intelligence portion of the brief highlighted venue and route specific threats of direct and indirect fire, as well as possible IED's / VBIED's.

The load plan was as follows:

At approximately 1011 hrs, the Blackwater Tikrit SET PSD Team departed COB Speicher en route to The Governorate Building in downtown Tikrit via vehicle motorcade to transport US State Department PRT members to a meeting. The motorcade left COB Speicher and turned right onto MSR. At approximately 1021 hrs, while traveling on MSR, I observed a white sedan closing on the motorcade from the rear. I advised (Shift Leader) that we had a fast moving vehicle to our rear. He stated that he could see it in his mirror.

When the vehicle reached approximately 120 meters from the motorcade, I began shining a 2,000,000 candle power spotlight at the vehicle, and also confirmed with that our rear strobe lights were in fact on. I continued shining the spotlight at the vehicle until it reached approximately meters from the motorcade. At this time, I perceived the vehicle to be a potential threat to the lives of our principals and the PSD team. I advised that I was preparing to fire a pen flare at the oncoming threat, in order to prevent it from approaching the motorcade. When the vehicle reached approximately meters from the rear of the motorcade, I fired the pen flare. The flare bounced off the surface of the road approximately 30 meters in front of the oncoming threat, and bounced into the median of MSR. Despite all previous warnings, the vehicle continued to close distance on us aggressively.

When the vehicle reached approximately meters, I firmly believed this vehicle to be a definite threat, and I sounded off in the vehicle that I was preparing to fire. At approximately meters I fired a 3-4 round burst from my into the grill of the threatening vehicle in order to disable it. After receiving the burst of fire, the vehicle pulled off onto the left shoulder of the south bound lane of MSR in a controlled and deliberate manner, and came to a complete stop. As I continued observing the vehicle, I saw what appeared to be a single male occupant exit the driver's door of the vehicle, followed by what appeared to be a second male occupant exiting the passenger side door. An orange VS-17 panel was prominently displayed on the rear of the black motorcade follow vehicle. The vehicle's rear strobe lights were on, which can be clearly seen from over 800 meters during daylight hours. A 2,000,000 candle power spotlight was shine out the rear of the motorcade follow vehicle, which can be seen at over 800 meters during daylight hours. A green pen flare was fired out of the rear of the motorcade follow vehicle. A 3-4 round burst from an was fired into the grill of the threatening vehicle. A situation report was called into the Blackwater Tikrit SET Tactical Operations Center (TOC) immediately following the incident.

We had already tentatively cleared the incident based on the reports. Pat D. is en route to Tikrit to interview the shooters and address other issues.

This is another example why we should adhere to a single DS reporting chain for all WPPS operational activity.

We’ll rectify this at our end.

Thanks, Mike

Subject: RE: 11Jun06 PSD Incident Report

Good statements, and we will definitely add this to our PSD files. However, as a reminder to everyone, when a PSD shooting incident takes place in relation to a SET/PRT or city under a REO’s control, we rely on that REO RSO to make the judgment call as to whether it was a “good shoot” or a “bad shoot.” Mike, we would appreciate your thoughts on this incident for the file as well.

Thank you,

Matt

These duties and responsibilities provided me with the skills and knowledge to ensure that all personnel under my direct leadership and responsibility completed their tour and mission safely and effectively.
I would like to make the following statement on the events that took place on 25 June 2006 at 1044 hrs. The events took place at the intersection of Route 1 and Route 2.

I am currently assigned to Team 3, Bagram, Afghanistan. I hold the position of Weapons Specialist and Door Gunner. The following individuals are also assigned to the CAT vehicle:

We were tasked to escort and provide security for 1 State Diplomat and 1 (one) Interpreter to, from, and at The Governance Center. We departed FOB Warhorse at approximately 1040 hrs. As members of the Counter Assault Team (CAT) we are responsible for occupying and securing any entrance and exit avenues along our route.

Upon exiting FOB Warhorse, the CAT proceeded along Route 1. At 1045 hrs, and myself dismounted from the CAT vehicle in order to secure the road. We moved ahead of the CAT approximately 10 meters. The motorcade was moving slowly to our rear (East of our location). I established security, oriented to the South. There was no traffic proceeding from the South. I then oriented to the North in order to aid in halting the traffic in that direction. I began flagging my weapon in an exaggerated manner as well as flashing my Sure Fire Tactical Light. Three (3) vehicles traveling from the North pulled to the West side of the road and stopped. A Blue Bongo Truck proceeded to drive around the three (3) stopped vehicles, at a high rate of speed. I continued to aggressively flag my weapon and flash my light. I repeatedly verbalized the command "QIF!", Arabic for "Stop".

The Turret Gunner deployed a red Pen Flare in the direction of the Truck. The Truck continued in the Southbound lane at a high rate of speed. I took 4 additional steps into the road in order to silhouette myself to the driver. I continued to flag my weapon and shout "QIF!". The vehicle approached within 10 meters of the CAT Vehicle and I and two (2) members of the Motorcade to include the Limo. I then fired three (3) rounds from my 7.62 round into the front grill of the truck. The truck continued at the same speed. I then fired one more round at the grill then moved upward to the driver's windshield where I fired three (3) more rounds. The truck did not slow and continued past.

The truck came to a complete stop approximately 150 meters to the South of my location. I continued to observe the vehicle and my southern sector. Once we were confident there was no longer a threat, the motorcade proceeded South along Route 1. I observed the Driver of the Truck exit his vehicle and wave his hands. The driver then moved to the West side of the road behind his Truck. I occupied my position within the CAT vehicle and we joined the motorcade along Route 2.

I have work for Team as part of the Counter Assault Team.

The Counter Assault Team is assembled as follows:

I am assigned as when departs a venue the Counter Assault Team is tasked with moving to the intersection.

While exiting Route onto Route at above stated time and date. I was assigned as the and my primary weapon was the Department of State issued in the Counter Assault Team (CAT) Vehicle.

The CAT Vehicle is a US Military HUMMVV, painted Desert Tan with a turret and a bright red, 3' X 3', warning sign that states in both Arabic and English, "Convoy ahead, stay back 100 meters". As the motorcade came to the intersection of route I dismounted the vehicle to help stop traffic. The CAT Vehicle then pulled into the intersection to take the road. A blue bongo traveling at a high rate of speed from the North heading south bound, passed three vehicles that had already stopped on the side of the road. As the bongo passed the other vehicles approximately 1000 meters from my position, I shined my Sure
Fire Light at him. This was an attempt to gain the attention of the driver of the vehicle. I then yelled for driver of the vehicle to stop and I fired a pen flare at the vehicle. The threat vehicle did not slow at all. I then saw and engage the threat vehicle and were standing directly between the CAT vehicle and the oncoming threat. Therefore I could not safely engage the target. The vehicle came to a stop shortly after being engaged. The motorcade then passed us and we pulled away and continued with our movement.

**Action Taken**
(Describe in detail what actions were taken, i.e. deployed pin flares, deployed specific weapons systems, etc.)

<td>Description of Incident</td>
<td>On the 25th of June 2006 I was assigned to the Counter Assault Vehicle with as the door gunner. On this day we were escorting a State Department Official to the Government Center in the city of Baqubah. As we the Counter Assault Vehicle came out of the gate we made our way to MSR Victory. We then dismounted the vehicle. I stopped traffic to the north of my location. The CAT HMMWV pulled up on to the road making itself visible to traffic. There was oncoming traffic traveling south bound. Three vehicles came to a complete stop about 50 meters away. At that point I noticed a blue bongo truck driving aggressively around the stopped traffic at a high rate of speed. The bongo truck also appeared to be heavy, and made no attempt to stop. As the bongo truck passed the stopped vehicles I started giving verbal and hand and arm signals to stop. I began flashing my State Department issued Surefire flashlight at the vehicle in an attempt to gain the driver's attention to stop. The turret gunner fired a pen flare at the bongo, the vehicle continued to drive in an aggressive manner in our direction. The Counter Assault Vehicle has a sign that says stay back 100 meters, in both English and Arabic. The sign was facing in the direction of the vehicle. The threat vehicle refused to comply with all of the warnings (both verbal and visual) to stop and continued to approach. I placed 5 well aimed shots at the front grill area of the threat vehicle when it was approximately ___ meters away. After passing our vehicle the threat vehicle then slowed to a stop. After the incident we continued to the Governance Center with no further incidents.</td>

**Location of Incident**: Iraq
- Intersection of Route 
- and Route 
- Baqubah

**Description of Incident**

I began my military career in

I was hired by Blackwater based on my past knowledge and tactical experience. I have successfully completed all the requirements and training under the guidelines set by the Department of State for Diplomatic Security Services (DSS). I'm currently working for Backwater Security Consulting, a contracting company for the Department of State. I work Principal Security Details based out of FOB Warhorse, Baqubah, Iraq.

On 25 June, 2006 I was part of Team traveling in the Counter Assault Team Vehicle (CAT). The Counter Assault Team's mission upon entering or leaving a venue is to secure the road for the motorcade.

At approximately 1040hrs the motorcade departed the North Gate of FOB Warhorse, Baqubah Iraq. Traveling west on Route , the CAT Vehicle moved ahead of the other vehicles in the motorcade to stop traffic in front of the exit gate.

At the intersection of Route and Route 

- Vicinity Grid the Right Rear Protective Security Specialist and Left Rear Protective Security Specialist and myself, the CAT Vehicle exited the vehicle to stop traffic for the motorcade. When both the North and South bound traffic on Route was halted I called the Tactical Commander over the radio and told him that the intersection was secured.

- North Gate. On the back of the CAT HMMWV is a large sign which reads "Convoy ahead stay back 100 meters" in both the Arabic and English languages.

As the motorcade was approaching the intersection from the east, a heavily laden Bongo truck was traveling south bound on Route at a high rate of speed. The drivers made no attempt to slow
down and went around the stopped south bound traffic that was stopped approximately 50 meters north of our location. The Rear PSS Gunner shot a red pin flare in the direction of the vehicle in an attempt to gain the attention of the driver and halt the vehicle. As the threat vehicle swerved around the halted traffic, I began flashing my Surefire tactical light at the driver, then began yelling 'On Arab location, while waving my weapon up and down. The threat vehicle continued to increase speed toward the motorcade.

When the threat vehicle was approximately meters from my location, I raised my Department of State Issued, and used the issued to aim in on the engine compartment of the threat vehicle. The driver disregarded the verbal and visual warnings that I gave and continued on a fast and aggressive approach toward our motorcade.

The driver of this vehicle refused to comply with all warnings given. Fearing for the lives of my principle, teammates, and myself: And after exhausting all other means to stop the threat vehicle I escalated force to stop the vehicle. At approximately meters from my location, I placed 4 well aimed shots into the front grill area of the vehicle. The threat vehicle made no attempt to slow or stop. I then placed 3 more shots in to the front windshield of the vehicle.

After passing our location the vehicle swerved off the road and came to a stop. The driver exited out of the vehicle and began waving his hands, he appeared to be unharmed.

(i.e. Describe in detail what actions were taken, i.e. describe location in detail, date, time, name of person involved, etc.)

At 0900, the Blackwater Advance team, consisting of [ ] white Suburbans with a total of [ ] PSS, departed COB Speicher enroute to [ ] [ ] Suburban with a total of [ ] PSS were staged at the front gate to provide QRF for the Advance team, while the limo consisting of [ ] was at the Office. At that time I called into ROK TOC that we were departing the COB to [ ]  

They reported to me that on our [ ] route the Southern Bypass was in code. I then called over the radio to the Advance team [ ] that the Southern Bypass was in code [ ] decided to take our [ ] route into the city [ ] At 0910 our point of contact informed our client that [ ] was a no go. I then called [ ] and told him not to take the [ ] route, that we just got word that it was a no go. They decided to continue with the [ ] route. I called the AIC, [ ] and told him to inform our client that all of our routes were code [ ] At 0915, our client then decided to not go, I then called [ ] and canceled the Mission, at that time he was on [ ] and the site looked ok. He departed enroute back to COB Speicher as requested by me. Then at 0920, the client then decided to go with the Army later on when the roads were open. I told the AIC to inform her no. Since she is our responsibility, and since the Advance was already there, I decided to go ahead with the mission since the advance was right there. I called them back and told them to clear [ ] they were only at [ ] They turned around and headed to [ ] I told the AIC to load the client and that we were heading out. At 0928 the team arrived at [ ] once they were there, at approx 0930 [ ] called over the [ ] radio the brevity that the site was hot and not good to go. [ ] called to me and reported that they were taking fire from different directions and they were taking cover. He informed me that they would depart once cleared. No one was reported hurt, no injuries, no shots were fired back. I told them to head back ASAP once they were cleared. At 0940 they loaded up and departed [ ] enroute to COB SPEICHER.

### Action Taken

(Indicate what if any follow-up action is required, i.e. further investigation, notifications, etc.)

1. [ ] told the Advance to depart ASAP back to COB Speicher. I reported it to Big Army and to Kirkuk Ops.

### Tikrit SET Team

- Team DSS Iraq Mission
Subject: Small Arms Fire causes cancellation of Tikrit SET/PRT mission.

Reporting Office: REO Kirkuk – Regional Security Officer

Summary: On June 25, 2006, ~ 0930hrs, the Blackwater Separate Embedded Team (SET) Provisional Reconstruction Team (PRT) advance team came under small arms fire in front of the Tikrit Government building at _______. The team initially took cover behind their vehicles and a large berm until the firing subsided. After about 10 minutes, the firing cleared and the team returned to FOB Speicher without incident. The mission was cancelled and all COM personnel were secured on the FOB. The team did not return fire and the Fully Armored Vehicle (FAV) were not damaged.

The SAF attack in Tikrit follows the US military detention and subsequent release of Sheik Jamal al-Din Abdul Karim Al Dabban in Tikrit. Large crowds had gathered earlier demanding his release.

RSO Action: Movements to the Government building on hold until more site security can be initiated. Awaiting PSD debrief and will pass details for exploitation to RSO Baghdad TOC.

Location: Tikrit, Iraq
Drafted By: Sam Pikula, Watch Officer, RSO Baghdad
I, would like to make the following statement of the events that took place on 27 June 2006 at 1622 hrs. The event took place at grid traveling North on Route prior to Scunian Circle.

I am currently assigned to Team Baqubah, Iraq. I hold the position of Personnel. Within the scope of motorcade operations I am assigned to the Vehicle as the . On this day the following individuals were also assigned to the Vehicle:

We were tasked to escort and provide security for 1 (one) Department of State Diplomat and 1 (one) interpreter, and 2 (two) personnel from the United States Army to/from, and at the Baqubah Governance Center. We departed the Governance Center at approximately 1550 hrs. As members of the Vehicle Team our primary responsibility is to provide coverage and protection. The secondary responsibility is to

As the motorcade approached the incident location a call was made via radio of 3 (three) static vehicles which had pulled onto the gravel shoulder on the left side of the approaching motorcade. Of these static vehicles which will be referred to as vehicle 1 (one), the first vehicle that we passed. The description of the vehicle was a blue van that had pulled significantly off of the road and onto the gravel shoulder. The distance from the edge of the asphalt to the first vehicle was approximately 6 (six) feet. Vehicle 2 (two, middle vehicle) which will be referred to as the “Threat vehicle” was located on the gravel shoulder close to the edge of the asphalt. The description of the “Threat Vehicle” was also a blue van, with tinted windows, containing 1 (one) male occupant. The vehicle’s description match the description given of one of the vehicles that were listed on the mornings Intelligence brief as a “Be On The Lookout vehicle” (BOLO List). The BOLO listed the vehicle as a possible “Vehicle Born Improvised Explosive Device” (VBIED) residing in the Ba’Qubah area. Vehicle 3 (three, last vehicle) was a 4 (four) door orange/grey painted taxi. The vehicles and occupants were visible as they were passed by the motorcade. This section of Route is a “straight away” containing no obstructions which could have hindered the “Threat Vehicles” view of the oncoming traffic.

Approximately behind the vehicle the Counter Assault Vehicle (CAT) was providing rear security. The turret gunner at this point in time was facing south at the 6 (six) O’clock position. As the Follow Vehicle pulled past the “Threat Vehicle” I noticed the rear bumper “dip” on the “Threat Vehicle” consistent with a hard acceleration. I also noticed immediately after the bumper “dropped” that the driver’s side front tire moved to a 45 (forty-five) degree angle toward the asphalt and the vehicle “rocked” as it progressed onto the road at the same angle. The “Threat Vehicle” moved past Vehicle 1 (one), in a linear angle toward the center of the roadway and the oncoming CAT unit. A collision between the “Threat Vehicle” and the CAT vehicle appeared imminent. As the “Threat Vehicle’s” front bumper crossed the centerline of the roadway I fired 2 (two) rounds from the Dept. of State issued into the Left rear corner of the vehicle. This action caused

Person giving statement
the vehicle to abruptly stop, characterized by the front bumper "dipping", and turn in the opposite direction of travel at a slow roll coming to rest a short distance in front of Vehicle 1 (one). In reassessment, the "Threat Vehicle" appeared at this time to be of no further danger to the oncoming CAT vehicle which passed safely without complications.

The motorcade proceeded to the endpoint destination at FOB WARHORSE and arrived at approximately 1630 hrs.
On 06/27/2006 at approximately 16:22 Team 7 was returning from a mission at the Baqubah Governance Center. The motorcade consisted of

The motorcade was traveling North Bound on Route ________ The convoy was traveling North bound in the South bound lanes of ________ (counter-flowing). The convoy was just South of Scunion Circle and was at grid ________ The oncoming vehicles were pulling off and stopping on the west side of the roadway as the motorcade approached them. The Counter Assault Vehicle was approximately ________ behind the Follow Vehicle. Three vehicles had pulled to the side of the road and were waiting for the motorcade to pass. The center vehicle was a blue van. Once the vehicles passed the group of three vehicles the middle vehicle (blue van) quickly accelerated into the roadway at a sharp angle. ________ (Well Gunner of the Follow Vehicle) observed the aggressive move. ________ felt that the blue van was an immediate danger to the Counter Assault Vehicle and its occupants. ________ also observed that the turret gunner in the CAT vehicle was oriented to the South and away from the imminent threat. By ________ experience and the actions of the threat vehicle ________ believed that the vehicle was possibly a Vehicle Bourne Improvised Explosive Device. ________ had no other means of lesser force to use but his primary weapon to disable the threat. ________ fired two rounds with the ________ fired the rounds at the rear left quarter panel of the threat vehicle. The threat vehicle then abruptly turned back toward the shoulder and again stopped. The CAT Vehicle passed the threat vehicle without incident. The motorcade continued to FOB Warhorse without further incident. The incident was then immediately reported to the Chain of Command in Baghdad.
Subject: REO Kirkuk PSD Team fires on aggressive vehicle.

Reporting Office: RSO TOC - Kirkuk

Summary: Blackwater PSD Team fires one round at an approaching vehicle. No apparent injuries to occupants.

Report: On July 3, 2006 at approximately 0845 hrs, a Blackwater PSD Team en route from REO Kirkuk to the USAID Compound in downtown Erbil encountered an aggressive vehicle. The motorcade was traveling north on MSR [Highway] at approximately [ ] . At the time of the incident, the motorcade was stopped at an Erbil police checkpoint due to traffic congestion. As the motorcade was stopped, the left rear observed a red sedan move around stopped traffic into the incoming lane. The vehicle then approached the motorcade. The left rear used hand signals in an attempt to gain the attention of the driver of the vehicle. As the vehicle approached within [ ] meters of the motorcade, the left rear observed two military aged males one armed with an AK-47. The left rear then fired one round into the grill of the vehicle in an effort to stop the vehicle. The vehicle then came to a complete stop. Two occupants exited the vehicle dressed in camouflage fatigues without apparent injuries. The motorcade was then allowed by Kurdish security forces to proceed through the checkpoint without further incident.
RSO Action: PSD members submitting statements.

Location: Erbil Police checkpoint Erbil, Iraq

Drafted by: ARSO Patrick DePalmer, Kirkuk, Iraq
Subject: COM PSD Team Fires on Aggressive Vehicle.

Reporting Office: RSO TOC - Baghdad

Summary: COM PSD fires multiple rounds into an aggressive vehicle.

On 13 July 2006 at approximately 1020 hrs, a COM PSD Tactical Support Team (TST) en route from the International Zone to Ministry of Health encountered an aggressive vehicle. The TST was stopped in a traffic circle when a vehicle with two military age male (MAM) occupants broke out of the stopped traffic, and drove around an Iraqi Police traffic controller. The turret gunner observed the aggressive vehicle approaching the TST and gave hand and verbal signals to get the driver to back off. The driver ignored the signals and the car continued to advance to within 5-10 meters from the vehicle TST convoy. The turret gunner fired two rounds into the grill to stop the vehicle. The vehicle came to a controlled stop approx 5-10 meters from the TST. No injuries were evident. The TST continued to the venue without incident. No COM personnel were injured and there were no principals in the TST convoy.

RSO Action: RSO conducting investigation. Statements will be forwarded separately.

Location: Red Zone, Baghdad, Iraq
I, hereby make the following statement at the request of , who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

I state the following is a summary of my relevant experience in regards to being a witness of this incident.
In ________, I successfully completed Blackwaters DSS high threat training and vetting before deploying to Iraq on _________. I started protective detail work at the Kirkuk Regional Embassy office before moving to one of the QRF teams in Baghdad, Iraq in _________.

On July 13, 2006 at approximately 1015 hours, I was driving the ________, Bearcat for Team ________ while supporting Team ________ in the Medical City area. While traveling northwest from bridge ________, in the vehicle of our detail I observed a grey sedan occupied by what appeared to be two males approaching quickly from our left side despite an IP present who was stopping traffic. The listed vehicle was first observed by me at approximately the 10 o'clock position as my vehicle was about to enter the traffic circle at ________. I continued to sound our siren and veer to the right in order to put as much space as possible between us and the approaching grey sedan. I then heard our up gunner ________, yell “Kiff” followed quickly by two shots fired. END

On Thursday July 13, 2006 at 0700 hours, Tactical Support Team conducted a daily operations Mission Brief to support all teams operating in the red zone for the day. Mission Brief includes: an intelligence brief; routes, times and venue locations of the teams operating for the day; a brief of our movement; and ends with the rules of engagement.

At approximately 1000 hours, after assisting with a vehicle down due to mechanical problems, departed check point in support of to Ministry of Health. As approached the traffic circle of the Iraqi Police on duty halted all vehicles at the traffic circle, at this time the traffic circle was clear of all vehicles which allowed the first and second vehicle of our motorcade to enter the traffic circle. As the vehicle in the motorcade approached the traffic circle a light blue-gray, four door sedan vehicle with two male occupants by-passed the Iraqi policeman and all other stopped traffic at a high rate of speed and towards our vehicles. The four door sedan was given physical and verbal warnings to stop by vehicle turret gunner. The vehicle failed to yield to the verbal and physical warnings and when the vehicle had closed to within meters of the motorcade fired two shots aimed at the grill / hood area of the vehicle. Due to the speed of the vehicle, and the swerve of our driver to avoid the vehicle, I observed the rounds impact the lower windshield area of the sedan, injuries were unknown. After our vehicle swerved to avoid contact with the sedan, the vehicle stopped approximately 5 to 10 meters from our vehicle. Shortly after passed the traffic circle, the Iraqi police approached the sedan, and a crowd of over 50 people formed around At this time continued to the Ministry of Health to support in that known high threat area. We continued on mission without further incident.

Subject: FW: MOI NCC SPOT REPORT: 08-0874 PRIVATE SECURITY COMPANY FIRES ON AMBULANCE NEAR MEDICAL CITY

David,
Could you try to get more info on this please? I'm interested if the ambulance maybe penetrated the bubble around a PSD convoy, hence the reason it was fired on or if the report assumes it was a PSD team. Any further details would be great.
Thanks!
Simon

Subject: COM PSD Team Fires on an Aggressive Vehicle

Reporting Office: RSO TOC - Baghdad

Summary: On 12 August 2006 at approximately 1031 hrs, a COM PSD Advance Team was at the entrance of their venue, the Ministry of Health, when they observed two Military Aged Males (MAM) in a white and red striped ambulance driving aggressively towards the rear of their halted vehicle convoy waiting for the lead vehicle to enter the venue. At approximately 100 meters, the follow and right and left vehicles' team members gave repeated hand and verbal signals, aimed a high powered lamp at the vehicle and opened their doors to expose fluorescent warning signs for the ambulance to stop. The driver ignored these signals and at approximately 62 meters, a team member fired a pen flare but the driver continued his aggressive approach to the convoy. At approximately 62 meters, a Facilities Protection Service (FPS) guard of the Ministry of Health fired one 7.62 mm round at the vehicle from his post at which time the follow vehicle well gunner and the right-rear and left-rear vehicle gunners commenced to fire a total of twelve rounds to disable the ambulance. The team was moving out of the danger area as the ambulance came to an immediate stop 15 meters behind the follow vehicle. The team was unable to determine if the suspect occupants were injured. There were no principals in the motorcade and no COM personnel were injured. The team immediately returned to the International Zone without further incident.
RSO Action: RSO is investigating the shooting; PSD Team members are completing their written statements.

**SYNOPSIS**
On August 12, 2006, at approximately 0955 hours, a Chief of Mission Protective Security Detail, Advance Team, was stopped at the entrance of the Ministry of Health. An ambulance drove towards the rear of their convoy. Team members tried to signal the ambulance to stay away from their vehicles by waiving their arms, shining a bright light and displaying brightly-colored panels. When this failed, the team fired a pen-flare towards the ambulance in an effort to get the driver’s attention. The ambulance continued towards the convoy. According to the team, when the ambulance was meters from the convoy a guard from the Ministry of Health, Facilities Protection Service, fired one round from his rifle at the ambulance. At that point, three PSD team members fired a total of twelve rounds at the front of the ambulance. The ambulance came to a stop fifteen meters from the rear of the convoy.

A short time before this shooting, five Iraqi Police officers were injured by an Improvised Explosive Device and were loaded into an ambulance for transport to a medical facility. This ambulance was subsequently fired-on by a civilian protective security detail. Based on the information available, it is likely that this was the ambulance engaged by the COM PSD team. Reports claim two medics and the ambulance driver were injured in the shooting.

I, ____________________________________________, hereby make the following statement at the request of ________________________, who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

I have served in the United States Marine Corps from

Page 1 of 5
I have been with Blackwater Security Consulting supporting the Diplomatic Security Mission since [redacted]. During my training with Blackwater I have completed WPPS 2 and the [redacted] course in Moyock, NC. Since I have been in Iraq with Blackwater, I have been attached to [redacted]; conducting advance missions and completing TSS (Tactical Site Survey) packets. Our Mission is to

During these advances it is my job as a [redacted] to accurately identify threats, and or possible VBIED’s. While on Team [redacted] we have trained extensively on procedures dealing with aggressor vehicles. At the range while training to shoot out of the vehicle, we practice verbally and visually signaling to stop before engaging the targets. During mission briefs, the ROE and escalation of force SOP’s are read every time before we go on a mission to make sure Procedures are absolutely clear. Approximately three times in the past two months, we have received active intelligence that Ambulances have been used for VBIED’s.
On Saturday Aug 12th 2006, at 1030 staged and conducted an operational briefing for the day's mission to the Ministry Forensic Institute "Morgue" near the Ministry of Health. The brief was conducted in accordance with standard operating procedures and included the overall situation in Baghdad, mission brief and rules of engagement. The intelligence portion of the brief highlighted venue and route specific threats of direct and indirect fire, as well as possible and multiple VBIED's (vehicle borne improvised explosive device). This mission required us to leave the relative safety of the U.S. Military-controlled International Zone and travel for several kilometers through a part of Baghdad where para-military / insurgent forces hostile to the U.S. presence in Iraq routinely conduct terrorist and guerrilla operations. Attacks on American military and civilians are prevalent in this area.

I was positioned in the Left Rear of the Vehicle in a motorcade. This vehicle is equipped with a gun which allows the Well Gunner to the rear. This Suburban is black in color. On the rear door, in big white letters, it says "WARNING - Stay back 100 meters". This is written in both English and Arabic. There were four other personnel in this vehicle. Our mission today was to conduct an Advance for who would be arriving via air. When arriving at the Ministry of Health (MOH) to stage the vehicles and begin securing the area, our motorcade was stopped just outside MOH facing south towards. Our motorcade was conducting a three point turn into the gate which meant we have to remain stopped for a short period of time before all vehicles were in. Our well gunner, called out that an ambulance was approaching from our rear at a high rate of speed. When I turned and looked I confirmed that it was moving fast, and that it didn't appear to be slowing down despite signaling with the spotlight. All other traffic was at a complete stop and the ambulance had passed the stopped traffic and was driving on an open road, so it would have been obviously apparent to the ambulance that a motorcade was ahead. The ambulance was approximately 100 Meters away when the threat was called and acknowledged, realizing that the ambulance might be unaware of our motorcade at this distance, so I cracked my door and stood in the doorway. Adhering to the State Departments Rules of Engagement and Force Continuum I then verbally and physically gave the driver the signal to stop with my hand high in the air, I than heard our well gunner fire a pen flare and saw that the ambulance was still approaching at a high speed. At this point I saw a FPS (Force Protective Service) guard that was standing in the median begin signaling to the ambulance to stop, when the hand signals failed the guard fired his AK variant weapon towards the vehicle. The ambulance continued to approach the rear of the motorcade despite the round fired by the FPS guard. Feeling threatened I fired two well aimed rounds into the front grill of the vehicle after reassessing the situation the
vehicle was within _ _ yards of the motorcade. The vehicle still didn't stop and I fired three more well aimed rounds into the front grill. This time the vehicle came to a slow roll still not stopping for several more feet. By the time the vehicle came to a stop we had entered the MOH and exited out the back gate getting on bridge   _ _ and returned to   _ I did not observe any casualties. Shift Lead, immediately reported the incident to the TOC and the mission was canceled, and we returned to! }-END- _ _
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

I have served in the United States Marine Corps from

In my time with I have the most experience in PSD vehicle and walking formations, as well as lethal and non-lethal means of resolving hostile situations. and also instilled the mindset of always following the proper Rules of Engagement, Continuum of Force, Escalation of Force, knowing what constitutes the use of Deadly Force and reading Temper and Intent of situations.

My PSD experience entails of
We rolled as a vehicle convoy for 6 months and over 500 EOD missions without a single causality of EOD or of my security (combat deployed to Fallujah, Iraq).

On Saturday August 12th, at 0910, staged and conducted an operational briefing for the day's mission in direct support of . The brief was conducted in accordance with standard operating procedures and included the overall situation in Baghdad, mission brief and rules of engagement. The intelligence portion of the brief highlighted venue and route specific threats of direct and indirect fire, as well as possible and multiple VBIED's (vehicle borne improvised explosive device) to include local emergency vehicles. Our mission today was an advance for at the Forensic Institute attached to Ministry of Health. This mission required us to leave the relative safety of the U.S. Military-controlled International Zone and travel for several kilometers through a part of Baghdad where para-military / Insurgent forces hostile to the U.S. presence in Iraq routinely conduct terrorist and guerrilla operations. Attacks on American military and civilians are prevalent in this area.

I was positioned in the spot of the Vehicle in a motorcade. This vehicle is equipped which allows the well gunner to to the rear. This Suburban is black in color. On the rear door, in big white letters, it says "WARNING - Stay back 100 meters". This is written in both English and Arabic. There were four other personnel in this vehicle. On the 12th day of August 2006 at 1030 hours was halted near trying to turn the motorcade into the Ministry of Health for the purpose of conducting an Advance Mission in support of . While halted, from my view point as , all rear traffic was halted at a safe distance using our 15,000,000 candle power spot light and the hand signal for stop. While halted I noticed an ambulance passing all halted traffic at a high rate of speed, I again shined my 15,000,000 candle power spot light directly at the ambulance while giving the hand signal to stop also loudly alerting the left and right door gunners of the possible threat. An FPS guards on the road adjacent to our vehicle and near the entrance to the Ministry of Health was also giving verbal and physical commands for the ambulance to stop.
As the team's Intelligence Representative, I know firsthand from prior Intel meetings of the enemy using ambulances for VBIED attacks. Adhering to the State Department's Rules of Engagement and Force Continuum, I then verbally and physically gave the driver the signal to stop. The vehicle was still approaching at a high rate of speed despite my attempts. I then fired one pen flare at the ambulance, landing it directly in front of the vehicle. Both of the vehicle's door gunners and FPS guards were continuing to give verbal and hand signals to stop. The ambulance was still approaching at a high rate of speed when the FPS guard fired his AK-47 at the ambulance trying to stop the vehicle. The ambulance was still approaching and was not adhering to any of our commands or attempts to stop. Still approaching at a high rate of speed, I then fired two rounds from my DOS issued rifle into the grill of the ambulance trying to stop the vehicle. I reassessed the situation and noticed the ambulance was still approaching so I then fired two more well-aimed rounds into the driver side windshield. The ambulance then came to a slow stop approximately 15 meters from the motorcade. The motorcade then continued to enter the Ministry of Health VIP gate and continued directly to the south gate to exit venue. I did not observe any casualties; the Shift Leader notified the TOC and canceled the mission. Utilizing our route without further incident or injury. —END—
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

I agree that the statements I furnish and any information or evidence resulting therefrom may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

I served in the United States Air Force, ____________.  

In ____________, I was employed by DynCorp International as ____________.  I completed JPSS II at the ____________ and arrived in Baghdad, Iraq, ____________.  I was attached to Team ____________ until my ____________.
employment with Blackwater in [REDACTED] Since [REDACTED], I have been attached to [REDACTED] as [REDACTED]. I have been with Blackwater Security Consulting supporting the Diplomatic Security Mission since [REDACTED]. Since my time with Blackwater, I have been on [REDACTED] where I have been a Door Gunner and [REDACTED]. I conducted PSD missions as well as conducting Advances and Tactical Site Surveys for various Venues in the Baghdad area.

While on [REDACTED], we have trained with aggressor vehicles to practice our escalation of force standard operating procedures. We also train on emergency tactics, to best prepare for any situation that might arise while conducting a mission. I have been in numerous situations where I was able to mitigate the threat without firing a shot.

On Saturday August 12th, at 0910, [REDACTED] staged and conducted an operational briefing for the day’s mission in direct support of [REDACTED] mission to the Forensic Institute attached to Ministry of Health [REDACTED]. The brief was conducted in accordance with standard operating procedures and included the overall situation in Baghdad, mission brief and rules of engagement. The intelligence portion of the brief highlighted venue and route specific threats of direct and indirect fire, as well as possible and multiple VBIED’s (vehicle born improvised explosive device) to include local emergency vehicles. Our mission today was an advance for [REDACTED] at the Forensic Institute attached to Ministry of Health [REDACTED]. This mission required us to leave the relative safety of the U.S. Military-controlled International Zone and travel for several kilometers through a part of Baghdad where para-military / Insurgent forces hostile to the U.S. presence in Iraq routinely conduct terrorist and guerrilla operations. Attacks on American military and civilians are prevalent in this area.

I was the Right Rear Gunner in the [REDACTED] Vehicle, a Suburban, of a motorcade. On the rear door, in big white letters, it says "WARNING - Stay back 100 meters". This is written in both English and Arabic. There were four other personnel in this vehicle. I was armed with a U.S. Department of State issued rifle.

On the 12th day of August 2006 at 1031 hours, [REDACTED] was in route to the Forensic Institute [REDACTED] to conduct an Advance for [REDACTED]. I was traveling in the vicinity of [REDACTED] in a motorcade. The congestion of the area created stop-and-go traffic, making the motorcade extremely vulnerable to a VBIED attack. The traffic trailing the motorcade was adhering to commands to maintain a standoff from our motorcade at about [REDACTED] meters. As the Right Door Gunner, I observed a white ambulance approaching our motorcade at a high rate of speed. The Well Gunner, [REDACTED] shined the 15,000,000 candle power spotlight
at the ambulance. I could see my well gunner and left rear gunner, signaling, with the common hand signal to yield, for the Ambulance to stop. I assessed the ambulance as a possible threat because of his failure to stop or yield to our commands. The vehicle did not slow its approach and had closed to about 10 meters. I assessed the ambulance as a possible VBIED and imminent threat. I also had my door open and adhering to the State Departments Rules of Engagement and Force Continuum I then verbally and physically gave the driver the signal to stop. I observed a non-lethal pen flare fired from the Well Gunner fly directly in front of the ambulance. I could see and hear my left door gunner and well gunners performing the same actions to include a local FPS guards standing on road adjacent to our vehicle. The threat continued to close on the motorcade and with no signs of slowing, now at less than 1 meters. Still approaching at a high rate of speed, a FPS guard fired one round from his AK-47 at the ambulance grill, attempting to stop the threat. As I continued to assess the situation I aimed and fired two well aimed shots to the grill of the ambulance in an attempt to stop the vehicle and threat. I could hear other shots fired from the Well gunner and the Left Door Gunner and I observed rounds impacting the grill of the ambulance. I reassessed the threat and saw that the ambulance still had not slowed down and continued its closure to our motorcade. I fired two more well aimed shots to the driver side windshield of the ambulance to further attempt to stop the threat. I reassessed the situation and observed rounds impacting the grill and the windshield of the vehicle. The ambulance appeared to finally be disabled and slowed to a stop approximately 15 meters from the follow vehicle. I did not observe any casualties. Immediately reported the incident to the TOC as we proceeded to exit the area. The shift leader then cancelled the mission and returned to without further incident or injury -END-
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

On 08/12/06 at approximately 0930, conducted a mission brief at area 01. During the mission brief intelligence was passed that the venue we are advancing was not American friendly and was used by JAM (Jaysh Al-Mahdi). In addition we received a report from the TOC that two IED's had gone off at which is located east of the venue, earlier in the morning. In addition during the mission brief we reviewed the different TTP's, such as ambulances that were stolen and used as VBIED's, against coalition forces.

At approximately 1010 we departed utilizing a modified route by exiting the gate, to conduct an advance on the Forensic Institute in support of. Upon arriving at attempting to enter the venue our motorcade came to a complete stop. Several members of the team reported hearing multiple shots fired in the vicinity of. However, we could not determine where the shots were coming from. While attempting to enter into the venue utilizing the VIP gate, which is located on the East side of the venue, a white and red ambulance driving at a high rate of speed was approaching the rear of the motorcade. Well Gunner announced to the team members inside the follow vehicle that the ambulance was approaching the motorcade at a high rate of speed. perceived it as a threat and employed the use of a 15 million candle watt spot light. The spot light failed to stop the ambulance, so the Door Gunners opened their doors and gave the ambulance a verbal and physical signal to stop, in addition on the doors of the follow vehicle there is a VF-17 panel marker taped to the door panels to give another visual signal to approaching vehicles. The ambulance continued to ignore the all signals from and then fired one flare towards the speeding ambulance in a last attempt to stop the ambulance. An FPS that was assisting the motorcade in entering the venue noticed that the ambulance was not complying with the verbal and physical commands given by the members of the motorcade. The FPS began to give the ambulance hand and arm signals to stop. But with no response the ambulance continued to approach the motorcade. The FPS deemed the vehicle a threat and fired a shot from his AK-47 towards the ambulance. The ambulance continued to approach the motorcade at the same rate of speed. Adhering to the State Department Rules of Engagement and Force Continuum engaged the ambulance firing two rounds each from there State department issued to the grill in an attempt to stop the vehicle. The ambulance continued at the motorcade and two rounds were fired to the driver’s side of the windshield. The ambulance finally came to a stop approximately 15 meters behind the follow vehicle.

At approximately 1035 notified the TOC of the incident and continued into the venue, Ministry of Health informed the TOC to cancel the mission because the venue was now a threat to coalition forces in the area. The motorcade proceeded to exit the venue through the south gate and returned to via our route.

Upon return to (Well gunner) and (LR Door Gunner) (RR door Gunner) reported to the RSO/TOC for debrief and spot report.

No additional property damage was observed. For further information see attached DS Sworn Statements by listed Operator’s involved. –END–
Subject: USAID Erbil PSD team fires on aggressive vehicle.

Reporting Office: RSO TOC - Kirkuk

Summary: DynCorp PSD Team fires one round at an approaching vehicle. No apparent injuries to occupant.

Report: On August 15, 2006 at approximately 0840 hrs, a DynCorp PSD Team, in a motorcade, en route to the Governorate of Sulaymania, encountered an aggressive motorist. The motorcade was traveling east at highway speeds on at approximate grid location A white pick-up truck, driven by a military-aged male (MAM), attempted several times to overtake and enter the motorcade. The left rear (LR) and right rear (RR) of the CAT vehicle attempted to gain the attention of the driver with hand signals followed by flashes from a high-intensity spotlight. When the driver ignored the signals and accelerated to pass the CAT vehicle and enter the motorcade, the RR fired one round into the hood of the pick-up. The shot did not disable the vehicle, and the pick-up continued to pass the motorcade and continued east at a high rate of speed. No injuries were apparent. The shift leader immediately notified the Erbil TOC and the motorcade continued to the scheduled venue.

RSO Action: PSD members submitting statements.
Location: near Sulaymania

Drafted by: ARSO Jeff Rusinek, Erbil, Iraq
Subject: COM PSD Team Fires on an Aggressive Vehicle

Reporting Office: RSO TOC - Baghdad

Summary: On August 17, 2006 at approximately 1235 hrs, a COM PSD Tactical Support Team (TST) en route from Ministry of Interior to the International Zone encountered an aggressive vehicle. The armored vehicle TST was stationary and waiting to clear traffic with sirens blaring when the lead vehicle team members observed at approximately 75 meters to their left rear, a 4-door maroon station wagon driving aggressively off a ramp towards the convoy. The suspect vehicle was riding low with two military aged male (MAM) occupants and was the only vehicle on the ramp. The lead vehicle team used hand and verbal signals and threw water bottles in an attempt to gain the attention of the driver of the vehicle. The vehicle continued an aggressive approach to within meters of the convoy when the lead team fired two rounds into the grill in an effort to stop the vehicle. The suspect vehicle came to a complete stop and the two MAM occupants were observed with raised hands inside the vehicle without apparent injuries. There were no principals in the motorcade and no COM personnel were injured. The TST immediately returned to the International Zone without further incident.

RSO Action: RSO is investigating the shooting. PSD Team members are completing their written statements.
Location: Red Zone, Baghdad, Iraq

Drafted by: Roque Salas, Watch Officer, RSO TOC, Baghdad, Iraq
I, hereby make the following statement at the request of [insert name], who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department’s Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

I, served in the United States Army from [insert dates].
In the Blackwater Training Academy, and received instruction on the roles of each PSD member, and shooting from a moving and stationary vehicle. I have been through WPPS 1 and WPPS 2 and have been deployed in Iraq since. I am currently the for the Tactical Support Team.

On Thursday, 17 August 2006, at approximately 1230, the Tactical Support Team, was traveling on Route between and. The convoy made a right turn, exiting facing southeast at GRID. I was the vehicle. The road makes a right turn and brought our vehicles parallel to the road we wanted to travel. The lead vehicle was able to begin the left merge into traffic but became stopped. There were approximately 8-12 vehicles stopped in front of our convoy. The lead vehicle had its siren on, and was using the air horn to get the attention of the motorists in front of the convoy.

is an elevated section of road (similar to a freeway bridge), where the side road crosses over Route. This means the vehicles coming from the six o'clock of our convoy are coming from above us, and to our left. Our element was stopped, waiting for traffic to clear so we could fully merge left into the lanes of travel. I noticed there was no traffic on the bridge, and I thought this was very unusual as I have been through this intersection numerous times and there had always been traffic on the bridge. I was motioning the traffic in front to move to the right, and looked back to our six o'clock, because the road was elevated, none of the other vehicles could assist with covering the six, or stopping traffic.

I observed a maroon Chevy Caprice station wagon, at the top of the bridge. The vehicle was in the inside lane, closest to our vehicles, and was traveling at approximately 35-40 mph. There were two occupants in the vehicle. The vehicle was coming directly at our stopped lead vehicle from the six o'clock position. The vehicle was approximately 75 meters from our convoy. I threw a water bottle in the direction of the vehicle. The water bottle landed approximately 20 meters in front of the vehicle. I then began yelling “Kiff” and giving hand signals for the vehicle to stop. The rear gunner also threw a water bottle at the vehicle as it continued toward us, and did not slow down. The water bottle landed directly in front of the vehicle. The vehicle did not slow, and seemed to be sitting lower to the ground, as if it was heavily loaded. Because of where we were stopped and the elevated road, the vehicle was almost directly at the rear of our follow vehicle. I believed the vehicle was a vrieb as it appeared to be heavily loaded, sat low to the ground, and was continuing toward our motorcade despite several warnings to stop. I was in fear for my life, and the lives of my team mates, I raised my and fired one aimed shot to the grill of the vehicle. The vehicle did not stop. As I was aiming for the second shot I heard the rear gunner from our lead vehicle fire one shot at the aggressive vehicle.

I then moved my point of aim to the windshield, and observed the vehicle had slammed on its brakes, and was sliding sideways to the left, and away from us. I observed the passenger raise their hands in the “I
surrender” motion and then duck below the dash. The driver also placed his hands up in the “I surrender” position. The vehicle stopped approximately 35 meters from our vehicle. I continued to monitor the vehicle as we merged onto the roadway. There were no marks on the windshield of the vehicle and both occupants appeared to be uninjured. I notified my shift leader of the incident, and we continued back to our vehicle without further incidents.-END-

On Thursday, 17 August 2006, was supporting on their movement back to the IZ from their venue, Board of Supreme Court Audit convoy was traveling off of towards the base of the overpass at using the lights and sirens to clear traffic, the convoy was forced to stop due to impassable traffic at the twelve o'clock in the direction of travel. While the [lead gunners] were clearing traffic to the front of the lead Mamba, a vehicle was approaching the halted motorcade at a high rate of speed from the crest of the overpass. The front and rear gunners on the lead Mamba used their hand signals and verbalized “Kiff” to get the attention of the driver; the driver ignored all signals. The lead gunner threw a water bottle landing 10 meters in front of the accelerating vehicle. The rear gunner of the lead Mamba also threw a water bottle which also landed in front of the aggressive vehicle. The driver of the subject vehicle continued to ignore the gunner’s multiple verbal and visual attempts to get them to stop. Both gunners reported that they were in fear for their lives at the rapidly approaching vehicle and fired 1 (one) round each into the grill of the vehicle in an attempt to stop, what they perceived to be, an imminent threat to their lives and the lives of the team mates. The gunners then reported the shots to the TC, also stating the vehicle had come to a complete stop and no longer appeared to be a threat to [ ]. The gunners also stated that both the driver and passenger appeared to be uninjured. The TC then reported the incident to the Shift Lead, who in turn reported to the TOC via radio. The Shift Leader gave a report of a four door sedan with no injuries. continued on their route covering [ ] as they moved into the International Zone. Both [ ] and [ ] arrived safely in the IZ with no other incidents. -END-

Blackwater Personal Security Specialist, US State Department High Threat Program

As a member of Blackwater Worldwide Personal Protection Service (WPPS), I serve as a team member on the Tactical Support Team (TST).

On 17 August 2006, at approximately 1230, I was working as a member of a Tactical Support Team on Team ______________. I was part of a ______________ motorcade and assigned rear turret gunner of the ______________ vehicle. We had departed our staging area ______________ in support of ______________ and were approaching ______________ traveling in a southeast direction utilizing sirens and flashing lights to warn traffic. As our motorcade passed ______________ coming from ______________ in the direction of ______________, I observed a maroon station wagon approaching at a high rate of speed and heading directly toward our vehicle from my 6 o'clock position. Our lead gunner threw a water bottle in the direction of the vehicle, and the water bottle landed directly in front of the vehicle. At this time I yelled "kiff, kiff, kiff" and gave the visual hand signals to stop the vehicle, which was now approximately ______________ meters away from our stopped lead vehicle. The two (2) Iraqi males ignored the first water bottle that was thrown by the lead gunner. I threw a second water bottle, which also landed directly in front of the vehicle, but the vehicle ignored these warnings and rapidly approached the convoy. I believed the vehicle was a vbied, and I was in fear for my life, and feared for the lives of my teammates. As I raised my weapon to fire a disabling shot at the vehicle, I heard the lead gunner fire 1 (one) round at the vehicle. The vehicle was still moving towards us after receiving the first round impact as I also fired 1 (one) round into the grill of the vehicle. I raised my weapon to the windshield to scan and assess, the vehicle went into a sideways slide and came to a complete stop. Both occupants had their hands raised in the "I surrender" position. The shots were reported to the Shift Leader and we continued on in support of ______________ We arrived at ______________ without further incident.

Person giving statement
SPOT REPORT – 090206-01

SUBJECT: Aggressive Vehicle Approaches REO’s Vehicle Screening Area

REPORTING OFFICE: RSO Basrah, Iraq

SUMMARY: At approximately 1342hrs on September 2, 2006, a vehicle approached the U.S. Regional Embassy Office in Basrah’s vehicle screening area at a high rate of speed and in an aggressive manner. An armed Embassy Office guard attempted to stop the vehicle with verbal, hand, and arm signals once the vehicle was within 50 meters from him. Despite the signals, the driver continued to speed towards the Embassy Office gate without slowing down. As the vehicle closed within 25 meters of the guard, he fired one (1) round into the hood of the vehicle. The vehicle immediately came to a controlled stop, reversed out, and sped away. No injuries to the driver were apparent.

RSO ACTION: RSO Basrah is investigating the shooting. A statement from the TCN guard is being completed. Provincial Joint Operation Center (PJOC) staff members indicated that the incident was not reported to the Iraqi Police (IP).

LOCATION: Regional Embassy Office Basrah

DRAFTED: Basrah RSO Marc Winn

CLEARED: Baghdad DRSO Chuck Lisenbee

INFORME N° 001/MJ BAIRAH 2006.

Señor: Jefe de Operaciones de Triple Canopy

Asunto: El que se indica.

Estando de servicio en las 13.40, salí de seguridad de K-9 a la parte posterior de aproximadamente 100 mts., a la primera calle lado izquierdo; por orden del Supervisor tenía que desviar el transito de los vehículos, para que pueda realizar con tranquilidad K-9 su trabajo.

Mientras realizaba el desvío de los vehículos, de manera sorpresiva y a velocidad se acercaba una camioneta 4 x 4 con lunas polarizadas, haciéndole la indicación que se detuviera, haciendo caso omiso a mis ordenes, pese a haberle hecho las indicaciones mediante voz fuerte y señas. A pesar de todas estas indicaciones prosiguió y encendió sus luces continuó acercandose con velocidad, nuevamente le hice la indicación de detenerse. A este instante yo sentí como si el vehículo me fuera a atropellar. Yo opté por cargar mi arma y realicé un disparo al motor del carro, deteniéndose inmediatamente, haciéndole nuevamente la indicación de retorcer, a lo que esta vez retorció y se alejó del punto. Asimismo continué con mi servicio de seguridad.

Translation:

While on duty at 1340hrs I was providing security for the K-9 element located 100m North of I occupied the left side security position. I was ordered by the supervisor to detour vehicular traffic so K-9 could perform their duties.

As I detoured the vehicles, a 4x4 pick-up commenced to flash its lights at me. I started to give the hand and arm signals and I yelled louder at the vehicle to detour. The vehicle continued to approach me at a high rate of speed. I felt the vehicle was going to hit me. I then chambered a bullet into my and shot into the hood of the vehicle. Immediately, the vehicle stopped and reversed out away from me. There after I continued on my shift at .

Incident Synopsis:
This report is in addition to __________ report for the shooting incident on 2 Sep 06, while supporting a K-9 truck search near __________.

After discussing the incident with __________ and the Guard Force chain of command, my finding and recommendations are as follows.

The REO is receiving tractor trailers loads of wall barriers (T-walls), a total of 6 on this day. The trucks if searched within the __________ area would stop all other traffic from entering or departing the US camp. In order to properly conduct a search of this size of truck and without blocking the gate for up to 30 minutes per truck, it is necessary to push out the search to the vicinity of __________ and divert traffic around this intersection. In order to expedite the process and reduce the exposure of the driver, the TC shift supervisor sets up security __________.

____________ signaled (hand and arm waving) the driver, yelled while the vehicle was approaching. The driver of the vehicle must have seen him, due to the fact that he was flashing his lights at him. __________ was carrying his weapon in the "cold" condition. His weapon didn’t have a round in the chamber, so he had to chamber a round and aim the weapon at the approaching vehicle. He fired one shot that hit the hood of the vehicle. At this time the driver and vehicle came to stop and departed the area.

It was requested that these trucks enter through the __________ or __________ gate. The drivers refuse to enter through the __________ gate due to their fear that they will be ambushed and/or shot at.

Outline injuries if applicable: None

Supervisor Actions to Mitigate Adverse Actions or Preclude Re-occurrence:
We have gone back and requested that KBR have these trucks enter through the gate.

Jeff can you forward to Paul and Bill,

On Wednesday, September 6, 2006 [_____] was supporting [_____] on their movement back to the IZ from their venue, the Adhimya DC located at [_____] was moving to [_____] from [_____] in a South West direction of travel and was to proceed South East from [_____] on MSR [_____] is an intersection containing an overpass running North West to South East, (MSR [_____] and the road running underneath from North East to South West with merge lanes from the surface roadway to the on ramp of MRS. As [_____] approached the motorcade used sirens and air horns to warn the local vehicles of their location. Iraqi Policemen (IP's) at [_____] observed our motorcade, went into the roadway and attempted to stop all North East traffic from proceeding in our direction and from entering the on ramp for [_____]. At this time all traffic began to stop except for gold in color Mercedes sedan. The sedan passed a stopped taxi and proceeded to make a right turn to a South East direction into the merge lane for the MSR [_____] on ramp. The front up gunner of the lead vehicle [_____] began giving verbal and visual signals to the vehicle to stop. The rear up gunner of the lead vehicle [_____] threw one water bottle at the gold Mercedes. The water bottle impacted the roadway directly in front of the gold Mercedes, which did not stop and began to accelerate in a manner that would cause it to impact the Lead Mamba at the intersection of the merge lane and the MSR [_____] on ramp. The suspect vehicle continued to ignore all visual and verbal warnings given by the lead vehicle rear gunner [_____] and the lead vehicle front gunner [_____]. At this time [_____] fired one pen flare at the moving suspect vehicle, striking the driver side door as it came approximately [_____] meters from [_____] motorcade. The vehicle continued to ignore the escalation of force and was closing with the lead vehicle at an angle of approximately 10-15 degrees. The suspect vehicle was now approximately [_____] meters from impacting the lead vehicle at intersection of the merge lane and the MSR [_____] on ramp and had ignored all verbal and visual warnings given by [_____] and [_____] as well as the instructions from the IP's in the intersection. The Vehicle continued to accelerate in the direction of the motorcade. [_____] and [_____] stated that they were in fear for their lives and the lives of their team mates at which time the lead up gunner [_____] fired three rounds into the engine compartment of the suspect vehicle. Simultaneously, the rear up gunner [_____] of the lead vehicle fired four controlled rounds into the engine compartment and then two additional rounds into the driver's side window, when the rounds to the engine compartment failed to stop the vehicle, one of which was observed to strike the upper left corner of the driver window. The suspect vehicle continued to drive toward the lead vehicle as it was being engaged by the two up gunners. At this time the lead vehicle swerved to the left to avoid making contact with the suspect vehicle and went up over the median curb. The suspect vehicle
came to a complete stop several inches in front of the lead vehicle. The two occupants of the suspect vehicle put their hand up in the “I surrender” fashion and did not appear to be injured. The Tactical Commander of ... called out over the team radio on “Push Through, Push Through, Push Through”. Then accelerated in drive through the threat area. As left the area, the rear gunner, ... observed the front right passenger of the vehicle hold up what appeared to be a British flag. As the rest of the motorcade passed the disabled vehicle, the two occupants of the disabled suspect vehicle did not appear to have any injuries. The Tactical Commander of ... then notified the Shift Leader of the shots fired and a short brief of the incident. I then notified the Tactical Operations Center of the incident via radio with a description of the vehicle and that there were no injuries to report. moved back into the IZ and continued with the daily mission. -END-

9/7/2006
Subject: Tactical Support Team (TST) Fires on an Aggressive Vehicle

Reporting Office: RSO TOC - Baghdad

Summary: On 6 September 2006 at approximately 1219 hrs, a Chief of Mission (COM) Tactical Support Team (TST) was proceeding southwest in the right hand lane of a four lane divided street near the Central Train Station located in the Red Zone. Two top gunners in the lead "Mamba" armored car observed a gold Mercedes sedan with two occupants proceeding in a merge lane to the right of the TST convoy in an apparent intercept course with the motorcade. After ignoring arm and hand signals of an Iraqi police officer, emergency sirens, and arm and hand signals of the TST members, the driver still proceeded. A TST member threw a water bottle in front of the Mercedes when it was approximately meters from the convoy. At meters a pen flare was fired at the vehicle which resulted in the suspect vehicle increasing its speed.

When the vehicle was meters from the convoy, both gunners on top of the lead Mamba fired well aimed shots from their into the engine compartment of the approaching vehicle. A total of seven (7) shots were fired into the engine. One gunner fired three (3) shots and the other fired four (4). Due to the change in the angle in which the Mercedes presented itself, one round fired by the second gunner struck the driver's door frame and a second round struck the window of the same door. At this point the
vehicle slowed to a stop and both occupants raised their hands. They remained in the sedan. PSD members in the motorcade follow vehicles reported that neither occupant appeared injured when they drove by. There were no principles in the convoy. No COM personnel were injured. The team continued on their mission without further incident.

**RSO Action:** TST PSD members have completed written statements. RSO is investigating the shooting.

**Location:** Red Zone, Baghdad, Iraq

**Drafted by:** Sam Pikula, Watch Officer, RSO TOC, Baghdad, Iraq

**Cleared:** DRSO Chuck Lisenbee
**SYNOPSIS**

On September 6, 2006, at approximately 1220 hrs, a COM PSD, in Baghdad, fired on a vehicle after determining that the vehicle posed an immediate threat to their motorcade. This use of force was appropriate and within the parameters of DS use-of-force policy. Injuries to the multiple occupants in the threat vehicle was possible, but not observed. End Summary.

The following chain of events is derived from the statements provided by the team members involved in the shooting:

1. As the motorcade approached an intersection in Baghdad, an Iraqi policeman held traffic in order to let it pass. Although most vehicles obeyed the policeman's instructions, a gold Mercedes continued to approach the motorcade. According to a team member, the vehicle had dark, tinted windows, and appeared to ride low in the rear. Both are historical indicators for suicide bomb vehicles.

2. Team members escalated the use of force, beginning with verbal commands to stop. When that did not work, a team member threw a water bottle in front of the oncoming vehicle. When the vehicle continued to approach another team member fired a pen flare which hit the driver's side door of the aggressive vehicle.

3. As the approaching vehicle did not appear stop, and when no other means were available, two members of the PSD team opened fire on the aggressive vehicle, aiming for the engine compartment. The gunner in the lead PSD vehicle then fired an additional two rounds at the driver's window, since the initial rounds did not stop the on-coming Mercedes. The Mercedes finally came to a halt inches in front of the lead PSD vehicle. The occupants of the aggressive vehicle raised their hands against their car's windshield. The front-seat passenger then raised a British flag. The occupants of the vehicle did not appear to be harmed. — Case Closed —
On Wednesday, September 6, 2006, was supporting movement back to the IZ from their venue, the Adhimiya DC located at _______. I, hereby make the following statement at the request of , who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

I served in the United States Marine Corps from.
In __________ I was hired by Blackwater USA and attended WPPS II where I received training in shooting from a moving vehicle. I was also selected to attend the Department of State BFFOC (Basic Field Firearms Officer Course) where I received additional instruction in DoS firearms training methods and Use of Force Policy. In __________ I was deployed to Baghdad, Iraq and was assigned to TST Team __________. 

On 090606 at approximately 12:20 pm I was traveling with __________ as the rear up gunner in the __________ vehicle of a __________ vehicle motorcade. We were traveling in support of __________ team __________ when we approached the intersection at ______ from the east turning south towards ______.

As our vehicle was driving under the overpass I noticed that there was an Iraqi policeman that was stopping the westbound traffic for our motorcade. Just as we cleared the underpass I began to yell “kiff” and give the visual hand signal to stop. The policeman was positioned on a median between the westbound lanes of traffic and the lane that allows traffic to merge onto the southbound feeder road that we were about to turn on.

I could see that a yellow taxi had stopped for the policeman, but an older model, dirty, dark gold Mercedes passenger car disregarded the officer and continued towards the southbound merging lane. I threw a water bottle that landed right in the merge lane just in front of the Mercedes. The vehicle failed to stop and continued at a high rate of speed towards our vehicle. The Mercedes had dark tinted windows and the back end of the car appeared to be weighted down. From training I knew that these were common descriptors in VBIED’s. I knew from prior intelligence briefings that this vehicle matched the description of vehicles on the VBIED BOLO List.

I lowered my rifle towards the vehicle, but it still failed to stop. I felt that my life and the lives of my vehicle crew and those of the rest of my team were in danger. At the same time I heard the lead up gunner fire a pen flare and saw the pen flare hit the Mercedes directly on the driver side door. The vehicle still did not stop. At this time the vehicle was approximately __________ meters from impacting our vehicle. At this time, being in fear for my safety and the safety of my team, I engaged the vehicle with my __________ rifle (DoS issued, __________) I began to fire rounds into the left front of the engine compartment at which time the suspect vehicle kept coming. I then transitioned to the driver side window and fired 2 rounds. I saw at least one of these rounds strike the glass and produce a “spider effect” in the glass. The vehicle slowed and then finally stopped just before striking the front right side of our Mamba. By that time, I was in a position that I could see that the driver and passenger had put their hands up. I continued to look for any possible threats to our convoy and we continued southbound. As we began to move away from the vehicle I observed the right front passenger of the vehicle display what appeared to be a British flag.

At the same time I notified the TC in my vehicle and then over the radio that I had fired at the Mercedes, but that the occupants did not appear to have been injured. We continued back into the IZ and continued on with our daily missions.

-END-
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

I agree that the statements I furnish and any information or evidence resulting therefrom may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

I have served in the United States Army Special Forces.

I have been under contract with Blackwater for the past [X] months. I have worked as a PSS on PSD teams in the South of Iraq and on the TST (Tactical Support Team) as well as with Blackwaters Air Asset.
At approximately 1220 hours, on 6 September 2006, Team _ was approaching the intersection at the North East corner to turn South East. Our vehicles had Fed Kits and Air horns in use to warn traffic of our approach. At that time, I spotted a faded gold mercedes accelerating into a merging lane that put the suspect vehicle in a position to make direct impact with the flank of our vehicle where the merge lane intersected the roadway. I observed the vehicle was being maneuvered in a very aggressive manner. I gave verbal and visual wanings to the vehicle to stop. At a range of approximately __meters I fired one pen flare at the aggressive vehicle. The flare impacted the driver side door of the vehicle, at which time the vehicle continued to accelerate towards our motorcade. At this time the vehicle had closed to approximately __meters of our vehicle. Fearing for the safety of my team, and knowing that the vehicle matched the description of a vehicle on the VBIED BOLO list, I engaged the vehicle with my _ DoS issued, I fired 3 rounds aiming at the engine compartment area in an effort to disable the vehicle, the vehicle continued on a collision course with our motorcade. The rear gunner in my vehicle also engaged with his ___. The lead driver of our vehicle maneuvered the Mamba up onto the curb in an effort to avoid the collision. The two Vehicles came to a stop with only inches between bumpers. Immediately after stopping, the occupants of the Mercedes placed their hands in the windshield. We then pulled forward to separate and clear the intersection. We continued back to the International Zone and continued on with the daily missions.

Spot Report – 080906-01

Subject: [(AIR FORCE) 57] 59

Reporting Office: RSO TOC U.S. Embassy Annex Baghdad Iraq

Summary: On 8 September, 2006 at approximately 1345 hrs, Air Force drove out of the International Zone (IZ) inadvertently past Check Point [________] into the Red Zone. [_________] then became lost. She realized her error and tried to backtrack into the IZ. During this maneuver she was fired upon by unknown persons with small arms fire (SAF). The SAF then broke out the driver’s side window of her soft-skinned Ford Explorer. She escaped the attack and drove to an Iraqi Checkpoint where the Iraqi Police surrounded her and protected her. She called a friend in the IZ who then called the RSO TOC and gave us her number. The RSO TOC then called [________] and tried to determine her location. The Watch Officer sent Blackwater Air and the TST team to search for her while she was on the phone with the RSO TOC. After an intensive search [________], Explorer was located southwest of the IZ on Route [______]. Blackwater air evacuated her to the Combat Army Support Hospital (CASH). Her injuries appeared to be minor at that time. The Army sent out a unit to recover her Explorer.
RSO ACTION: None required.

LOCATION: Red Zone, Route South, Baghdad Iraq

Drafted by: Ron Chavez, Watch Officer RSO TOC
Blackwater Air QRF team make up:

Lead: __________ Wing: __________

Little Bird Flight Lead
Blackwater Aviation, Iraq
Subject: Embassy Motorcade Hit With Small Arms Fire

Reporting Office: RSO TOC - Baghdad

Summary:

At approximately 1440 hours on September 10, 2006, a vehicle Embassy motorcade traveling west on Route[...|was attacked by small arms fire (SAF). The[...]|was hit with at least one round of SAF.

The attackers were believed to be in a compact red sedan that pulled off the roadway ahead of the motorcade as if it were yielding right of way. As the motorcade approached, two men exited the vehicle. Their exact position in relation to the vehicle was obscured by a large cloud of dust caused by the vehicle quickly braking on the dirt shoulder, but it appeared that the men were in the back seat of the sedan and exited to the rear of the vehicle. Because of the dust, none of the PSD members could confirm if the men were armed. As the motorcade passed by, SAF was received in the direction of the red sedan. PSD members heard approximately 30 to 40 rounds of SAF as the motorcade increased speed to pass through the attack site.

One round entered through the rear right passenger door and ricocheted off the armored plating around the door opening before becoming lodged in the foam molding inside the window. The[...], along with the[...]
vehicles, will be returned to the KBR garage tomorrow morning for a complete inspection to determine if additional rounds hit. Although smoke filled the passenger compartment, the vehicle was still operable and able to continue to the scheduled destination near Baghdad International Airport (BIAP).

The principals were not DOS employees and their purpose for travel will be discussed in a classified e-mail when the Baghdad Communication Center opens Monday morning.

D/RSO Chuck Lisenbee was in the well of the lead vehicle and observed the attack. He was en route to BIAP to meet incoming RSO personnel.

**RSO ACTIONS:** RSO Tactical Support Team (TST) was dispatched and RSO Air Wing notified to standby. SRSO Bennett and DS Command Center notified immediately.

**LOCATION:** Red Zone, Baghdad, Iraq

**DRAFTED:** Roque Salas, Watch Officer, RSO TOC, Baghdad, Iraq
**CLEARED:** DRSO Chuck Lisenbee
**APPROVED:** SRSO Randall Bennett
was conducting PSD Motorcade Operation from Camp Cropper. While traveling west in the westbound lane of Route 7 at approximately 80Km per hour we heard 5 to 6 SAFe (small arms fire) in rapid succession (possibly automatic) from the north side of the road before reaching the. One round struck the vehicle on the right side passenger door in front of the window, 3" above the sill line. The round was likely a 'tracer' that continued to burn after impact, filling the passenger compartment with smoke. The round punctured the soft exterior of the vehicle, but was stopped by the armor plating. No muzzle flashes or other indications of a shooter were seen. There was a small red car (unknown make and model) in the area but it is unknown if it was involved. The was able to continue to the venue and complete the mission.

The Protective Security Officer notified me that his vehicle had been impacted, there was smoke inside the vehicle, and that there were no injuries. I ordered the motorcade to "Drive through" and continue with the mission, called the Tactical Operations Center (TOC), via radio, to notify them of the incident and location. The TOC dispatched Blackwater Tactical Support Team (TST) to our location to assist us for the remainder of our mission. At 1800 we departed venue and returned to Base without incident.

PSO told me:

On 10 Sep, 2006 was conducting a motorcade movement to ______ on Route 7. At approximately 1440 hours, in the vicinity of grid ______, I heard and felt a loud thump on the right side of the______. As I looked in the right side view mirror, I could see smoke coming from the panel in between my window and the rear right window. At the same time, smoke also appeared in the back seat of the ______. As I looked back into the right side view mirror, the smoke had cleared up and I could see a hole in the same spot where the smoke was coming from.

Once I heard and felt the loud thump on the right side of the _____ and saw the smoke in my right side view mirror, I turned to our principals in the backseat to tell them to stay down and asked them if they were injured or hurt. They advised me that they were not hurt in any way. I then turned to the driver and asked him if he was injured or hurt, and he responded that he was "okay." I immediately radioed the Shift Leader to tell him that we had taken small arms fire on the right side and that we had no injuries and that the _____ was still good to move, despite some light smoke. Because of the smoke, I looked in the backseat to make sure that there was not a fire and to see if there was an entry hole from any projectile. I could not see either. I continued to talk to keep the principals calm and we proceeded with our missions without further incident. Once safely on venue I again checked the principal's and driver for injury but found nothing.

**PSD INCIDENT REPORT**

**DATE OF INCIDENT:** 09/11/06  **TIME OF INCIDENT:** 0810

---

### Type of Incident

Disabling Shoot Of Vehicle

### Location of Incident

Team was in support of team [ ] to the Ministry of the Interior, team [ ] was following team [ ] from a distance of about 500 meters. While in route to the venue team [ ] approached the intersection of [ ] from the left lane. While conducting a left turn at the intersection a blue four door sedan approached the convoy from the six o'clock position, a single male driver was the only occupant in the vehicle. All traffic was stopped 100 meters behind the last vehicle of the detail when the sedan made a hasty lane change to the right and continued towards the detail passing all other cars stopped behind the follow mamba. Speed of the sedan was moderate to fast. There were no injuries involved in this incident.

---

### Action Taken

After identifying the blue sedan as a threat to the detail, the right rear hatch gunner [ ] gave several hand signals as well as voice commands to the oncoming threat. The left rear hatch gunner [ ] also gave repeated hand and voice commands. The blue sedan with its single male occupant failed to adhere to the commands given by both hatch gunners. After several commands failed to stop the sedan [ ], the right rear hatch gunner while in fear of the safety of himself and the team fired one well placed shot from his [ ] rifle into the front grill of the sedan. After the bullet struck the grill the sedan came to a complete stop and the team continued with the mission. After making the turn I observed the sedan and noted the driver getting out of the vehicle with no noticed injuries. I reported the incident to the TOC as soon as I received a full status report from the team, I also reported the incident to my chain of command.

---

### Follow-Up Required

A verbal statement was given to the TOC investigating officer as soon as the team arrived back to the [ ] staging area. Written statements by all members in the follow vehicle (mamba [ ]) were completed and submitted to the TOC investigating officer on the same day as the incident.

Team
Subject: Army PSD Team Fires on Aggressive Vehicle

Reporting Office: RSO TOC - Baghdad

Summary: On 12 September 2006 at approximately 1000 hrs, a Chief of Mission (COM) PSD Team was proceeding to the Ministry of Electricity (MOE) for a scheduled meeting. The PSD team was traveling northbound on a two lane north/south divided highway in the right hand travel lane. In an intersection south of the MOE, the turret gunner in the follow Humvee observed a silver “Toyota” SUV closing rapidly on the convoy as it proceeded northbound. As the Toyota SUV continued to close on the convoy at a high rate of speed, the following actions were taken by the turret gunner in the follow Humvee: At approximately 100 meters he attempted to gain the driver’s attention with hand signals. At approximately 7 meters the turret gunner attempted to gain the driver’s attention by throwing a bottle of water at the vehicle as it continued to close. Finally, at approximately 16 meters, the turret gunner displayed his firearm in an attempt to gain the driver’s attention and to have him decrease speed so as to maintain a safe distance.

All the aforementioned attempts to gain the attention of the vehicle’s driver failed. As the convoy continued to proceed northbound and when the vehicle closed within 16 meters, the up-gunner on the follow vehicle fired two (2) well aimed shots from his firearm into the engine compartment.

---

Spot Report – 091206-03
of the approaching vehicle. At this point the vehicle exited the travel lane and slowed to a stop on the right hand paved shoulder area. The turret gunner in the follow Humvee reported that due to heavy window tinting in the suspect vehicle, he was unable to view any reaction from the driver. There were four (4) principals in the motorcade at the time of the shooting. No COM personnel were injured. The team continued on their mission without further incident.

**RSO Action:** PSD members have completed written statements. The RSO is investigating the shooting.

**Location:** Red Zone, Baghdad, Iraq

**Drafted by:** Mark Ford, Watch Officer, RSO TOC, Baghdad, Iraq

**Cleared:** DRSO Chuck Lisenbee
WANT TO MAKE THE FOLLOWING STATEMENT UNDER OATH:

On [insert date] at [insert time], the incident occurred at [insert location]. We were sitting in front of the venue waiting for the green light to turn on. As we were waiting, there I looked in my rearview mirror and saw a silver SUV coming down the road behind us. While waiting, the SUV I saw a white bottle and the SUV still kept coming. Then it drove in the street from [insert street name]. After the two shots, the vehicle came to a stop.

Then we continued into the venue. After we did after that. /END OF STATEMENT/

I WANT TO MAKE THE FOLLOWING STATEMENT UNDER OATH:

On 20060912 at 1348, while stopped outside the Ministry of Electricity just southwest of Camp Travis, I observed a silver Toyota SUV approach from the rear approximately 100 meters away on a completely empty road at a high rate of speed. When the vehicle was approximately 20 meters away I used hand and arm signals to attempt to stop the vehicle; the car failed to stop. When the car was approximately 10 meters away I threw a water bottle at the rear window of the vehicle; the car continued at approximately 40 mph. I fired two shots to the grill of the car, the car stopped and we continued into our venue. My vehicle pulled into the venue, the car continued down the road and I lost visual of the vehicle. </tbody>
</table>

**SYNOPSIS**

Summary: On September 12, 2006, at approximately 1000 hrs, a COM PSD team in Baghdad fired on a vehicle after determining that the vehicle posed an immediate threat to its motorcade. This use of force was appropriate and within the parameters of DS use-of-force policy. Injuries to the occupants in the threat vehicle was possible, but not observed. It appears that the PSD team acted in accordance with the established rules of engagement. The turret gunner used incremental escalations of force before finally using deadly force against the approaching Toyota SUV.

- Case Closed -
DETAILS:

On 12 September, 2006, at approximately 1000 hrs, a Chief of Mission (COM) PSD Team was en route to the Ministry of Electricity (MOE) for a scheduled meeting. While the PSD team was stopped at an intersection south of the MOE, the turret gunner in the follow Humvee observed a silver, Toyota SUV closing rapidly on the convoy. As the SUV closed on the convoy at a high rate of speed, the follow vehicle’s turret gunner took the following actions. When the aggressive vehicle approached to within 62 meters the turret gunner attempted to gain the other driver’s attention with hand signals. At approximately 12 meters the turret gunner attempted to gain the driver’s attention by throwing a bottle of water at the approaching vehicle. When the suspect vehicle was approximately 12 meters away, the turret gunner displayed his___ ___ ___ ___ in an attempt to gain the driver’s attention and to have him decrease speed so as to maintain a safe distance.

All of these attempts to gain the attention of the vehicle’s driver failed. When the vehicle closed to within 132 meters, the follow vehicle’s turret gunner fired two (2) well-aimed shots from his___ ___ into the engine compartment of the approaching vehicle. At that point the vehicle exited the travel lane and slowed to a stop on the right-hand, paved, shoulder of the road. The turret gunner reported that due to heavy window tinting in the suspect vehicle, he was unable to view any reaction from the driver. Four (4) principals were in the motorcade at the time of the shooting. No COM personnel were injured. The team continued on their mission without further incident.

Investigator’s Note: There is a discrepancy between the Spot Report and the eyewitness statements. The Spot Report states that the motorcade was moving on the road, while the eyewitness statements indicate that the motorcade was stopped at the time of the shooting. Follow-up interviews with the participants resolved the discrepancy; the motorcade was stopped at the time of the incident. There must have been a misunderstanding on the part of the person gathering information for the Spot Report.

It appears that the PSD team acted in accordance with the established rules of engagement. The turret gunner used incremental escalations of force before finally using deadly force against the approaching Toyota SUV.

Assault on Motorcade

**Location of Incident**

South on [in route to Najaf just past _____ ]

**Description of Incident**

(right rear of the lead vehicle Team [car motorcade], advance detail was en-route to The Government Center in Najaf in support of Team [_____]. While the motorcade was traveling south on [the lead vehicle had past ], and was towards the Government Center. When a IED detonated against the left rear of the lead vehicle. I was working the right rear section of the lead vehicle. The explosion completely disabled our vehicle the driver kept control of the vehicle while the TC looked for a safe location to cross load. All four men inside with vocal confirmation checked on one another. The TC issued directions to Cross load right at this time I exited the vehicle and seen that the axle of our vehicle was destroyed and also that there where a tremendous amount of Iraqi Police around us all of a sudden. I immediately took my [in the CAV vehicle. I then went back and gathered [and proceeded to secure them in the follow vehicle. Once all items where secured and the vehicle being unrecoverable was the also incapacitated. Three of the four men cross loaded in the follow vehicle and one went in the counter assault vehicle. At this point I heard the Shift Leader ordered the team to vac to Camp Duke which is a safe area.]

Once IED went off the order of cross load was given and [_____]. Pushed off the incident point and gather all [_____] and gear and personal.

**Action Taken**

(The Describe in detail what actions were taken, i.e. deployed pin flares, deployed specific weapons systems, etc.)

The BW OPS was immediately notified of the incident. Upon return from mission, a written statement was provided to Senior. DL

**Follow-Up Required**

(Indicate what if any follow-up action is required, i.e. further investigation, notifications, etc.)

The BW OPS was immediately notified of the incident. Upon return from mission, a written statement was provided to Senior. DL

Spot Report-091206-02

Subject: IED Attack on Motorcade – No Casualties or Injuries

Reporting Office: RSO Al-Hillah

Summary: At approximately 0955hrs the lead vehicle of a PSD advance team was struck by an IED approximately 34 miles south of Al-Hillah while traveling south on Route to the Najaf Government Center approximately 15 minutes ahead of the principals’ vehicle. ARSO Eric Jagels was in the left rear position of the vehicle that was attacked. The point of impact was behind the left rear passenger door. The vehicle lost several tires and the explosion caused the windows to blow out. The driver was able to maintain control of the vehicle and move a safe distance to allow cross loading of personnel.

At 1000h the vehicle motorcade with two Chief of Mission (COM) principals arrived on scene to provide support to the advance element. All personnel were accounted for. The lead vehicle was stripped and destroyed on site before the team was evacuated to the primary safe haven at Camp Duke located approximately ten miles north of the attack site. The motorcades arrived to Camp Duke at approximately 1010h where a secondary accountability of personnel was conducted. There were no injuries or casualties reported. During a closer examination of the second advance motorcade vehicle, the PSD team discovered that it was hit with fragmentation which cracked the front windshield and damaged the radiator.
and electrical system. The PSD team deemed it safer to leave this vehicle at Camp Duke.

**RSO Action:** RSO Baghdad deployed two RSO Air Wing helicopters who shuttled personnel from Camp Duke back to REO Hillah. All remaining motorcade vehicles convoyed from Camp Duke to Al-Hilla with RSO Air Wing over watch. RSO Al-Hilla is reviewing Al-Hilla's security posture and procedures in light of this attack and coordinating the recovery of the second vehicle. DRSO Baghdad notified the Command Center immediately. RSO Baghdad notified the Embassy Front Office.

**Location:** _______ Northwest side of Najaf on Route _______ 62

To: Victor Esposito, WPPS Program Manager  
From: Mark Peddy, Regional Coordinator for Iraq WPPS Programs  
Subject: Najaf IED Attack – al-Hillah  
Date: 13 September 2006  

Sir,  

Below is the most currently available information and photographs from the IED attack which occurred near Najaf in the al-Hillah 12 September 2006.  

Vehicle 1 was a total loss and was reportedly recovered by either the IP’s or Iraqi Army. Arrangements are being made for the return of this vehicle to Camp Duke and USG custody today.  

A Captain (US Army) is coordinating the return of this vehicle. The RSO al-Hillah has indefinitely restricted travel so even if the vehicle is returned the personnel will not have access to it until the travel restriction has been lifted. The only photographs currently available are the photo’s retrieved from the AP postings on the internet. (Attached)  

Vehicle 2 was driven to Camp Duke but due to the damage to the radiator and the armored windshield the team determined that it was not sufficiently operational to risk making the return trip and the vehicle was subsequently secured at Camp Duke. The RSO and in-country leadership were notified of this decision and the vehicles location.

Respectfully submitted,

Mark Peddy
Regional Coordinator for Iraq
WPPS Department of State Programs for Blackwater
I, ____________________________, hereby make the following statement at the request of ____________________________, who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

I am a former Marine with eight years of active duty experience. ____________________________ was trained on and tested on the Department of State's use of force policy by both the Marine Corps and the DOS Mobile Security Training Team.

For the past ____________________________, I have worked for Blackwater Security in support of the WPPS program for the Department of State. I have conducted numerous PSD missions, Advances, Tactical Site Surveys, as well as worked on both the Quick Reaction Force and Tactical Support teams. As a member of the Quick Reaction Force and Tactical Support Team I have over a year's experience working in and around the Baghdad area. As ____________________________ for both teams it was my responsibility to maintain proficiency with the Rules of Engagement and Use of Force policies as I had to deal with potential aggressive vehicles/personnel on a constant basis. As a member of an advance element for the past ____________________________, I have participated in establishing the security of numerous venues prior to the Protective Security Detail's arrival. I have trained with simulated aggressive vehicles during training in order to practice the escalation of force in accordance with my team standard operating procedures as well as the State Department policies. Our SOP is to review the Escalation of Force, Rules of Engagement and Rule of Use of Force policies prior to our mission during our operations order.
On the morning of 17 September, at approximately 0950 hrs, as we passed through the heavy stop and go traffic at I heard call out "watch out for the white car!" From my position on the left door of the Follow vehicle I saw the white vehicle had purposefully broken through heavy traffic and proceeded to approach the motorcade in an aggressive manner. After identifying the threat I resumed observation of my sector. As we were making our way forward I lost sight of the white sedan. When the driver had moved forward as far as he could, I heard, the well gunner, state that he was going to fire a pen flare. The pen flare was ineffective in stopping the vehicle and I heard state he was going to shoot. fired a single shot from his I then looked back through the rear glass and saw the vehicle stopped approximately 55 meters behind us, alone, well ahead of all other stopped traffic. The occupant was raising his hands and appeared uninjured. I turned back to my sector to resume my duties.
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

On Sunday, 17 September, 2006, [redacted] was tasked with locating a venue near the area of the Trade Bank of Iraq. The mission was to conduct a Tactical Site Survey of the ITBCI Villa.

The motorcade consisted of [redacted] vehicles. The motorcade was traveling on its route which brought it through [redacted] The [redacted] was in the right front seat of the follow vehicle, [redacted] was driving, [redacted] was in the left rear seat, [redacted] was in the right rear seat and [redacted] was in the well position. As per the team's SOP, the motorcade's lights and sirens were activated to warn the traffic ahead as the team approached the intersection. Also, as per team SOP, the fighting follow's rear facing strobe lights were on for the duration of the movement.

[redacted] is a large traffic circle that connects four different roadways. The team encountered heavy traffic on its approach to the Trade Bank of Iraq. The team entered the traffic circle from the southwest and exited the circle in a northwesterly direction. As the team entered the traffic circle, the Tactical Commander in the vehicle ahead advised that traffic was stopped across all three lanes ahead. This amount of traffic was unusual for the time of day. The route had the team preparing to execute a planned u-turn at a break in the median. The break is approximately 120 meters from the traffic circle. The team was stationary for approximately 3 minutes waiting for traffic to clear to make its turn. As per SOP, the well position used the spot light to warn approaching vehicles of the motorcade's presence. Traffic exiting the circle in the team's direction was stopped approximately [redacted] meters from the motorcade.

As the team was waiting to cross the median the well position observed a white 4 door vehicle, which matched the description of vehicles on the BOLO list for possible Vehicle born Improvised Explosive Devices (VBIED's), intentionally work its way through the stopped traffic and accelerate toward the motorcade ignoring the 15 million candle power spot light and strobe lights that were directed at it. [redacted] yelled, "Watch the white car!" [redacted] then stated he was going to shoot a pen-flare. The pen flare was discharged, striking the windshield of the white vehicle. The driver of the white vehicle refused to stop and continued toward the motorcade. [redacted] yelled for the driver of the follow vehicle [redacted] to attempt to pull up, but traffic ahead prevented any movement. [redacted] stated the car was still coming and to standby because he was going to shoot. [redacted] stated, "I'm going to shoot" twice before engaging the vehicle. At this point the [redacted] in the right front seat, located the white vehicle in the passenger side mirror. The white vehicle was approximately [redacted] meters from the motorcade and the same distance from the rest of the stopped traffic. After hearing [redacted] fire one round from his [redacted] the team leader watched the vehicle start to lose engine fluids and come to an immediate, controlled stop. The team leader observed one bullet hole in the passenger side of the hood. The driver of the white vehicle had his hands on the wheel. The team leader immediately notified the TOC and the Detail Leader of the disabling shot. Additionally, the team leader advised the TOC there were no injuries. After completing the mission, the team passed back through the intersection [redacted] This time the team was traveling in a southwesterly direction. The team leader observed the single male occupant who was driving the white vehicle that was engaged approximately 40 minutes earlier. The driver was looking in the engine area of his vehicle and was unharmed.

See Department of State Sworn statements by [redacted] and [redacted].

[redacted]

Person giving statement
On Sunday, 09-17-2006, I was the ________ of ________ who was tasked with locating a venue near the area of the Trade Bank of Iraq. The mission was to conduct a Tactical Site Survey, of the ITBCI Villa.

As our ________ motorcade entered ________ I noticed that traffic was extremely heavy. We were in the process of trying to cross over the median, when I heard ________ yell, "watch the white car." I was trying to locate the vehicle when ________ stated he was going to shoot a pen-flare. I then heard the pen flare discharge. ________ yelled for our driver to attempt to pull up, but we were stuck in traffic ________ stated the car was still coming and to standby, because he was going to shoot.

At this point, I located the vehicle in the passenger side mirror. After hearing ________ fired one round, from his ________ I immediately watched the vehicle start to lose engine fluids. The single male occupant then brought the vehicle to a stop. I also observed one bullet hole, in the passenger side of the hood.

I immediately notified the TOC and ________ Detail Leader of the shoot to disable. There were no injuries, which was also passed over the net, to the TOC.

After completing our mission, we passed back through the intersection of ________ I observed the single male occupant who was driving the white vehicle that ________ engaged, approximately 40 minutes earlier. The driver was looking in the engine area of his vehicle and he was unharmed.
I, [Name], hereby make the following statement at the request of [Name], who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting therefrom may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

I served in the military from [Date].

I started with Blackwater in [Date] and have been employed by Blackwater ever since.

Throughout my military career I have had numerous classes on the Rules of Engagement (ROE) and the Rules of Use of Force (RUF) and Escalation of Force (EF). I have had further training in these in both WPPS I and WPPS II. Additionally, my team's SOP is to go over the ROE, RUF, and EF in accordance with the State Department policies prior to the team's daily runs.
On Sunday, 09-17-06, at approximately 0950, while stopped at the intersection of [redacted] my team was sitting in heavy traffic. I had a wall of traffic stopped approximately 107 meters back, enforcing a safe zone for the motorcade utilizing my spot light. I observed a white 4 door passenger vehicle matching vehicles on the BOLO list intentionally make its way around the wall of traffic and accelerate towards us. I told the driver of our vehicle to start moving but he informed us that there was no where else for us to move. I attempted to gain the driver of the white 4 door vehicles attention with the spot light. The driver continued towards us, ignoring the 15 million candle power light. I let my team members know I was deploying a pen flare by sounding off with “pen flare” at which point I fired one pen flare at the windshield of the vehicle at approximately 207 meters. The pen flare struck the front windshield, and the vehicle still continued to drive towards us at which point I was in fear for my life and the lives of my team. I fired one round into the left side of the hood at approximately 407 meters with my [redacted] to disable the vehicle. After firing one round into the hood the vehicle came to a controlled stop. There were no apparent injuries to the driver of the vehicle. The driver was the only occupant in the vehicle.

Immediately following the shoot, my Shift Leader [redacted] notified the TOC and [redacted] of the incident.

-END-
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

Kevin,

For your info.

Bill

To All:

On Sunday, 17 September, 2006 I was tasked with locating a venue near the area of the Trade Bank of Iraq (TBI) Villa. The motorcade was traveling on its route which brought it through a large traffic circle that connects four different roadways. The team encountered heavy traffic on its approach to the venue near the area of the Trade Bank of Iraq (TBI) Villa. The team entered the traffic circle from the southwest and exited the circle in a northwesterly direction. As the team entered the traffic circle, they were in the lead vehicle, advised that traffic was stopped across all three lanes ahead. This amount of traffic was unusual for the time of day. The

The angle route had the team preparing to execute a planned u-turn at a break in the median. The break is approximately 120 meters from the traffic circle. The team was stationary for approximately 3 minutes waiting for traffic to clear to make its turn. As per SOP, the well position officer used the spot light to warn approaching vehicles of the motorcade’s presence. Traffic exiting the circle in the team’s direction was stopped approximately 50 meters from the motorcade.

As the team was waiting to cross the median the well position officer observed a white 4 door vehicle, which matched the description of vehicles on the BOLO list for possible Vehicle born Improvised Explosive Devices (VBIED’s), intentionally worked its way through the stopped traffic and accelerate toward the motorcade ignoring the 15 million candle power spot light and strobe lights that were directed at it. "Stop! Get off the road, it’s a bomb!" yelled. "Watch the white car!" then stated he was going to shoot a pen-flare. The pen flare was discharged, striking the windshield of the white vehicle. The driver of the white vehicle refused to stop and continued toward the motorcade. "Get off the road, it’s a bomb!" yelled for the driver of the follow vehicle to attempt to pull up, but traffic ahead prevented any
movement. The stated the car was still coming and to standby because he was going to shoot. I stated, “I'm going to shoot” twice before engaging the vehicle. At this point the driver was in the right front seat, located the white vehicle in the passenger side mirror. The white vehicle was approximately 30 meters from the motorcade and the same distance from the rest of the stopped traffic. After hearing multiple rounds from his vehicle, the team leader watched the vehicle start to lose engine fluids and come to an immediate, controlled stop. The team leader observed one bullet hole in the passenger side of the hood. The driver of the white vehicle had his hands on the wheel. The team leader immediately notified the TOC and the Detail Leader of the disabling shot. Additionally, the team leader advised the TOC there were no injuries. After completing the mission, the team passed back through the intersection of T.J. This time the team was traveling in a southwesterly direction. The team leader observed the single male occupant who was driving the white vehicle that was engaged approximately 40 minutes earlier. The driver was looking in the engine area of his vehicle and was unharmed.

INCIDENT REPORT
This report may be in addition to DS SPOT reporting.

Date of Report: 22 Sep 06
Location: Basrah FOB, Iraq
Task Order: 007
Person Releasing Report: Jeffrey Huber
Title of Person Releasing Report: Project Manager

Date of Incident: 22 Sep 06
Time of Incident: Approx. 1220
Contractor Involved: Triple Canopy, Inc.
Detail Location of Incident: U.S. Embassy Compound

Incident Synopsis: On 22 Sep 06, at approximately 1220 FOB Basrah Palace began receiving indirect rocket fire. The compound warning system was then activated, and personnel responded to the impact site. Accountability of all personnel was taken.

2 rockets impacted on the Basrah Palace Compound. 1 rocket landed on the Romanian sector and 1 rocket impacted on the US compound. The round landed in the ____ area and impacted on ____ killing the occupant immediately.

TC responded to the area to assist and secure the area. TC medical personnel responded to the scene and reported the casualty while TC, squad of Peruvians and canine teams searched the area for additional casualties and secured the area. When 100% camp accountability was confirmed, personnel search was stopped.

Damage reported, KBR single trailer destroyed and minor damage to surrounding trailers

Clearing Operations for the remainder of the camp began at 1300, and were completed at____

All Clear sounded at ____. All hands were restricted to essential movement only.

Outline injuries if applicable: 1 Fatality, DOS staff member (contractor), Julio Garcia

Supervisor Actions to Mitigate Adverse Actions or Preclude Re-occurrence:

Personnel Notified of Incident: Regional Security Officer, Triple Canopy Project Manager, LMPO, RSO Baghdad

Supervisor synopsis of local impact of incident: TBD, down sizing of camp

Additional Reports Generated: None
Subject: REO PSD Vehicle Accident

Reporting Office: RSO Al-Hillah

Summary: On September 24 at 0732hrs, a Blackwater PSD motorcade from REO Al-Hillah was involved in a traffic accident approximately 2.5 kilometers north-east of the REO compound. The motorcade was comprised of a vehicle QRF performing a reconnaissance run. The vehicles were moving along an improved roadway at approximately 50 mph.

Approximately four minutes after departing the REO compound, the second vehicle in the motorcade, a Suburban, was struck head-on by a non-descript sedan driven by a male subject. The impact caused the sedan to spin 180 degrees and burst into flames. The Suburban's airbags deployed rendering the vehicle inoperable. All personnel and equipment were cross-loaded into the remaining vehicles. The down vehicle was locked and abandoned at the scene. The motorcade immediately returned to the REO where all personnel were accounted for. Two Blackwater personnel sustained injuries in the accident. One team member has already been cleared to return to work and the second member sustained a knee injury. He required evaluation in Baghdad. Preliminary reports indicate that the individual driving the sedan was killed as a result of the impact.
RSO Action: RSO Al-Hillah contacted Iraqi Police who cordoned the area around the accident scene. RSO coordinated with U.S. Military assets and KBR Al-Hillah to commence recovery operations. All scheduled motorcade operations have been cancelled for the remainder of the day.

I, turret gunner for the HUMMV, Team____ on 24 SEP 06 while traveling north on route Jackson the TC ordered the convoy to counter flow due to the amount of traffic and static vehicles on the right side of Route_____. A red car traveling at a high rate of speed, passing traffic that was yielding to our motorcade. The red car failed to yield and continued at a high rate of speed towards our motorcade. I gave verbal and physical hand signals to get attention of the driver of the red vehicle to slow down and yield to our motorcade. I then pointed the____ at the red vehicle. The driver then slammed on the brakes and swerved to the right passing the lead vehicle then swerved to the left hitting the SUV in the front. Team____/SUV went into the median and the red car immediately went into flames. Due to the impact with SUV the red vehicle slid into the shoulder of the southbound land. The Lead HUMMV immediately stopped traffic, and setup security on the 12 o'clock position. I then heard shots to my rear when I turned around to see who was shooting I saw____ shooting in to the SUV, he was shooting the ____. I could hear more popping coming from the red vehicle. Once all our personal was evacuated we turned around and headed back to the REO.

<td>Description Incident</td>
<td>I, _ _ driver, _ _ for Team _ _ traveling north on Route _ _ in a _ _ vehicle motorcade when it was involved in an accident. At the time of the incident my vehicle was second in the convoy behind the lead vehicle. The motorcade was counter flowing _ _ Traffic was yielding to our motorcade, when two LN vehicles traveling side by side at a high rate of speed. I observed a red opal in the right hand lane, in our direction of travel, cut in front of another LN vehicle. At this time the red opal failed to yield to any signals from the lead vehicle and continued toward our motorcade. The driver of the red vehicle lost control and began to fishtail left-hand side of the road. I felt at that point that the vehicle wasn't a danger to me since he was off the road. The red opal then turned to the left and cut in front of the SUV which caused the impact of both vehicles. I didn't have enough time to make adjustments to avoid the impact and traveling approximately 40 MPH. Once my vehicle and the LN vehicle made contact, my driver side airbag deployed. I next heard my passenger asking me if I was ok, and then I heard another voice at the passengers' door also asking if both of us were ok. We then started to evacuate the _ _ vehicle into the Bearcat, grabbing all _ _ Once we were loaded into the Bearcat we departed the scene of the accident and proceeded to drive back to the REO.</td>

RSO Baghdad
24 September 2006

Spot Report – 092406-03

Subject: COM PSD Team Fires on Aggressive Vehicle.

Reporting Office: RSO TOC- Baghdad

Summary: On September 24, 2006, at approximately 0950 hours, RSO TOC was notified that a COM PSD had engaged a local national vehicle with deadly force. The COM motorcade consisted of a support vehicles. As the COM motorcade approached and began to enter from the west, a grayish/blue four-door minivan with clear access to the motorcade, approached at a high rate of speed on the same side of the median barrier. The rear gunner in the assault vehicle attempted to stop the driver using verbal and hand signals. The lone occupant and driver ignored the warnings from the rear gunner situated approximately meters away and continued towards the motorcade. The rear gunner shot two round’s into the hood and lower windshield area of the mini-van at approximately meters. The driver of the vehicle came to an immediate controlled stop and appeared to be uninjured. No injuries or additional property damage were reported during the incident. The PSD motorcade continued to its destination without further incident.

RSO Action: RSO is investigating the shooting; PSD Team members are completing their written statements.

Location: Red Zone, Baghdad, Iraq

CLEARED: DRSO Chuck Lisenbee
To All, On 23 September 2006 at 1700 conducted a mission brief for the following day's missions. The mission brief included a rundown of teams operating in the red zone, venues they would be visiting, the Vehicle load plan for the day, and the pre-mission briefing time for the next morning.

On 24 September 2006 at approximately 0810 hrs, conducted a pre-mission brief. The brief included any changes to previously briefed information, the Rules of Engagement per the Mission Firearms Policy and Escalation of force. Routes and relevant venues were briefed by the Tactical commander and an intelligence and Threat brief was given by the Intelligence Analyst. Due to increased attacks by anti-coalition forces in our area of operation and the advent of the Ramadan holiday, the threat level was considered to be elevated. departed check point to stage in the area of the Ministry of Interior to stay near the venue of En-route to our staging area encountered unusually heavy traffic. maneuvered through the traffic using warning lights, sirens, verbal and visual commands from the turret gunners to clear a path through the traffic. As was East-bound from approximately 100 meters west of all vehicles had moved to either side of the roadway and stopped to allow our motorcade to pass, with the exception of a grey in color minivan occupied by a single male subject. As the lead vehicle of our motorcade approached the vehicle it began to move forward from a stopped position toward the lead vehicle. The front gunner of the lead vehicle yelled in Arabic, "kiff" to the driver and used hand signals motioning for the van to move left and stop. When the van continued to move toward the lead vehicle threw two water bottles at the vehicle, both of which struck the vehicle's hood. The vehicle slowed down and almost came to a stop. As the front turret position passed the vehicle, which was approximately meters to the north of the lead vehicle, focused his attention back to his primary sector of security, the 12 0'clock position. At this time the lead vehicle rear turret gunner, who had observed and the gray vehicle's actions, observed the vehicle again begin to move toward the lead vehicle. At this time verbally and with hand signals warned the now moving minivan to stop. At this time the minivan aggressively made an approximate 90 degree turn directly toward the rear of the lead vehicle and proceeded to accelerate. At this time the vehicle was approximately meters to the north and meters to the west of the lead vehicle knew that a similar tactic had been recently used by anti-coalition forces where a small van type bus VBIED was driven from the side of the road into a passing motorcade and detonated in fear for his life and the lives of his teammates fired two rounds from his in fear for the engine compartment of the vehicle. The first round was observed to strike the hood of the vehicle and had no apparent effect on vehicle or the driver, the second round impacted low in the center of windshield, just above the cowling. Upon impact of the second round the van slightly veered away from the lead vehicle and proceeded north across the roadway causing the second vehicle of our motorcade to make aggressive
evasive maneuvers in order to avoid colliding with the van. The minivan came to a stop on the south side of the roadway now on the right side of the motorcade. As the vehicle passed, I noticed the single male occupant/driver had his hands over his head and did not appear to be injured. I continued to the Ministry of Interior and staged for continued support of Chief of Mission teams operating in high threat areas of the red zone.

I, __________________________, hereby make the following statement at the request of ARSO R. GIBERT, who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting therefrom may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.
I, ___________ was on today's date assigned to the lead vehicle rear turret position of ___________ Motorcade. Prior to departing the International Zone the team was briefed that there had been increased attacks in our area of operation and that the attacks were expected to escalate with the beginning of Ramadan.

At approximately 0945 hrs, ___________ motorcade encountered several congested traffic in the vicinity of ___________ was traveling in an easterly direction from ___________ towards ___________. Approximately 100 meters to the west of ___________ the speed of our movement was greatly diminished because of the severely congested traffic. The lead up gunner, ___________ and I were directing traffic to the left hand side of the road to allow our motorcade passage on the right. The motorcade was also using sirens and air horns to alert traffic as we approached. At this time I observed ___________ giving verbal and visual hand signals to a gray in color minivan, ___________ I observed the van to ignore ___________ commands at which time ___________ threw two water bottles at the vehicle, both of which struck the vehicle in the hood. I then observed the vehicle slow almost to a stop slightly canted toward the south side of the roadway. As the vehicle began to move past my position, I made eye contact with the driver and gave him verbal and visual commands to stop. While maintaining eye contact with me, the van made an abrupt turn of approximately 90 degrees and began to accelerate toward me. At this point the vehicle was approximately ___________ meters to the south of our motorcade and slightly behind our motorcade. At that time, while maintaining eye contact with the driver, I again signaled the hand signal to stop and yelled "KIP". The driver did not respond. At this time I began bringing the muzzle of my ___________ down on the vehicle. The driver continued to make direct eye contact with me and continued to accelerate. At this time, knowing that a similar tactic had been recently used by anti-coalition forces, where a motorcade passed a small van type bus at which time the bus was driven into the motorcade and detonated, and in conjunction with my previous knowledge, experience, training, and the escalation of force already used, I perceived the vehicle as an immediate and deadly threat to the members of ___________. Fearing for my life and the lives of my teammates, I fired two rounds from my Department of State issued ___________ rifle. The first round impacted the hood of the vehicle and had no effect on the vehicles movement. As the vehicle continued to move forward accelerating and moving closer to me, I fired the second round aiming higher up on the hood of the vehicle. This round impacted low in the center of the windshield just above the hood cowling area. After the impact of the second round, I observed the nose of the vehicle to dip as it slowed and the vehicle veered slightly away from me. The driver of the van was looking directly at me until just after the second round impacted the windshield of his vehicle. As the vehicle veered, it avoided making contact with rear of the lead vehicle by less than three meters. The vehicle then passed through our motorcade causing the second vehicle in the motorcade to make an aggressive and abrupt turn in order to avoid making contact with the vehicle. I then observed the van come to a stop on the north side of the roadway. At this time I notified the Tactical Commander of my use of force and I heard it reported to the RTOC via radio, ___________, continued on to the area of the Ministry of Interior to stage for further mission support.
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

I, ____________________________, hereby make the following statement at the request of ARSO R. GIBERT, who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

I am currently employed as an Independent Contractor for Blackwater as a PSS/HTP assigned to TST till present.

On 24 SEP, 2006, I was working as a member of a Tactical Support Team on Team __________________. I was part of a motorcade assigned as the __________________ for the second vehicle in the motorcade. We were heading East from ____________ in heavy traffic approaching ____________. While watching my sector, I noticed a two toned gray and dark colored van repeatedly ignoring verbal and visual commands from the lead vehicle turret gunners. I observed several water bottles thrown from the lead vehicle front turret gunner impact the suspect vehicle. I observed the suspect vehicle to continue to make aggressive movements toward the lead vehicle as if were attempting to align itself to make contact with the rear of the lead vehicle of our motorcade.
I observed the rear gunner in the lead vehicle repeatedly give hand signals and verbal warnings. The van was acting very erratically when suddenly it lurched forward at approximately a 90 degree angle, heading directly towards the rear of the lead vehicle. I then observed the rear gunner fire two rounds from his [hand] into the vehicle. As the second round impacted the suspect vehicle, the van veered away from the lead vehicle and missed making contact with the rear of the lead by less than 5 meters. The vehicle continued through our motorcade crossing in front of my vehicle causing my vehicle to make aggressive evasive maneuvers in order to avoid making contact with the van.

As my vehicle passed the now stopped van, I observed the occupant appeared to be un-harmed. When I observed the van aggressively accelerated toward the lead vehicle, I believed the vehicle was a VBIED attempting to detonate on the lead vehicle of our motorcade and I was in fear for my life and the lives of my teammates.

On 24 September 2006, I was the lead gunner for the vehicle of the motorcade. I was the rear gunner for the lead vehicle. At approximately 0945 hrs, I was traveling east bound in heavy traffic approaching our route to our staging area at the Ministry of Interior. Approximately 100 meters to the west of I observed a grey mini van to our twelve o' clock that would not move out of our path. The vehicle appeared to be attempting to impede our progress. After repeated blasts of the horn, and the vehicle being struck with several water bottles, the vehicle began to move to the north side of the roadway and reduce its speed. As our motorcade began to pass the vehicle, it had moved approximately meters to the south of, and somewhat parallel to our vehicle. As our vehicle pulled even with the van, it began to move toward our motorcade. At this time I again gave the driver verbal and visual commands to stop. The driver ignored my visual hand signals and verbal commands to stop (yelling "Kiff"). At this time I threw two additional water bottles at the vehicle, both of which struck the vehicle in the hood. The vehicle again began to stop. At this time the vehicle was behind my position and I observed the rear turret gunner looking at the vehicle. At this time I returned to my sector of security and the vehicle was then picked up by the rear gunner. I then heard yell Stop and Kiff (stop in arabic) followed by the sound of two shots. I looked back to assess the situation and observed the van coming to a stop on the north side of the roadway. I then returned to my sector of security. The mission was continued without further incident.

To All,

On 24 September 2006, at 1700 conducted a mission brief for the following day's missions. The mission brief included a rundown of teams operating in the red zone and the venues they would be visiting, the Vehicle load plan for the day, and the pre-mission briefing time for the next morning.

On 25 September 2006 at approximately 0850 hrs, conducted a pre-mission brief. The brief included any changes to previously briefed information, the Rules of Engagement per the Mission Firearms Policy and Escalation of force. Routes and relevant venues were briefed by the Tactical commander, and an intelligence and threat brief was given by the Detail Intelligence Analyst. Due to increased attacks by anti-coalition forces in our area of operation and the advent of the Ramadan holiday the threat level was considered to be elevated.

departed the International Zone for the area of

This was done in order to stay near the venues of

and

En-route to our staging area encountered unusually heavy traffic, since the start of Ramadan heavy traffic has been an ongoing obstacle. maneuvered through the traffic using warning lights, sirens, verbal and visual commands from the turret gunners to clear a path through the traffic. As proceeded North West bound our motorcade encountered more traffic traveling in the same direction. At this time do to the amount of North West bound traffic, threat information and intelligence passed in the preceding four days in reference to improvised Explosive Device (IED) and Vehicle Born Improvised Explosive Device (VBIED) threats in the area.

At this time the traffic was unusually light traveling southbound. As the lead vehicle of our motorcade approached the intersection of the front up gunner,

threw several water bottles into the intersection to warn vehicles of our approach.

was also utilizing warning lights, sirens and air horns to alert traffic. The intersection at is usually controlled by Iraqi Police (IP's) or Iraqi National Guard (ING's). As approached the intersection it was observed that there were no IP's or ING's in the intersection.

As lead vehicle entered the intersection noticed a dirty white four door sedan operated by one single, middle aged male subject who was maneuvering aggressively on the North West side of the stopped vehicles approximately 20-25 meters North West of the lead vehicle. At this time shouted “Kiff” (stop in Arabic) and "stop" made direct eye contact with the suspect while simultaneously showing him the hand signal to stop. At this time the suspect vehicle began moving slowly forward toward the lead vehicle. At this time threw a water bottle at the suspect vehicle hitting the front left side of the vehicle. At this time noticed the Suspect driver to have a tight grip on the steering wheel and still looking directly at the lead vehicle. The suspect vehicle was now accelerating at a high rate of speed in the direction of the lead vehicle still staring at the lead vehicle. With the current threat level, training, experience and known tactics used by insurgents believed that the vehicle was a VBIED that intended to impact the lead vehicle of motorcade and detonate. in fear for his life and the lives of his teammates, fired two rounds from his Department of State issued rifle striking the vehicle in the hood. Simultaneously, the lead vehicle driver abruptly swerved to avoid making contact with the suspect vehicle. Apparently disabled, the suspect vehicle rolled to a gradual stop approximately five meters from the lead vehicle. At this time the motorcade accelerated and moved to the far right side of the roadway to avoid the disabled
vehicle. At this time all up gunners covered their sector of security for the possibility of a secondary attack.

At this time, cautiously continued north towards  and to our staging area of continued to provide tactical support for Chief of Mission teams operating in high threat areas of the red zone. —END—

Sworn Statement

Date: 25 September 2006
Time: Approx. 11:00
Location: [Redacted]

, hereby make the following statement at the request of , who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department’s Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting therefrom may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.
On 25 September 2006, I was assigned to the lead vehicle front turret position for Tactical Support Team (TST). I was traveling North West on Hifa Street approaching in direct support of Advance Team. Since the beginning of Ramadan, has noticed that there has been a marked increase in motor vehicle traffic and that the traffic has been driving with a more "aggressive attitude".

I was aware of several vehicles born improvised explosive devises (VBIED'S) and improvised explosive devices (IED's) that had been recently detonated in this area. As we moved closer to the intersection I noticed that there were no Iraqi Police (IP's) in the intersection, this was unusual as there are always IP's in this intersection controlling traffic.

When we were approximately meters from I threw 3 water bottles into the intersection to warn traffic of our approach. was also using warning lights, sirens and air horns to warn traffic approaching the intersection of our presence. As we approached I stopped all vehicles to my 3 O' clock, 9 O'clock and 12 O'clock by shouting, stop, kiff (Arabic for stop) and waving hand signals to stop. As we cautiously entered the intersection all vehicles were stopped and allowing us to pass through the intersection. At this time I noticed an off white dirty, four door sedan weaving through the stopped traffic and moving aggressively towards the intersection from the northwest. I observed that this vehicle matched the description of a vehicle briefly as a possible VBIED in the intelligence brief portion of our pre-mission brief. At this time the vehicle began to maneuver around razor wire and barricades in the roadway, which were used by IPs to funnel traffic. I immediately yelled kiff and gave a hand signal to stop. The aggressive vehicle continued driving towards our motorcade. At this time the vehicle was approximately meters from our motorcade. I immediately made eye contact with the driver, shouted kiff again and simultaneously threw a water bottle at the vehicle. The water bottle impacted the front right of the four door sedan. The driver of the suspect vehicle made direct eye contact with me and I noticed he had a tight grip on the steering wheel as he turned the steering wheel towards the lead truck and aggressively accelerated passed all of the stopped traffic and attempted to drive into the lead vehicle. At this time I believed that the suspect vehicle was intending to ram my vehicle and detonate. At this time the vehicle had closed to within meters of my vehicle. At this time being in fear for my life and the lives of my teammates, I fired two well aimed shots from my State Department issued into the engine compartment of the vehicle. The suspect vehicle appeared to lose power and rolled to a stop approximately 5 meters from the lead vehicle, which had to forcefully swerved to the right to avoid being struck by the vehicle. At this time I reported the shots to my Vehicle Commander and TCT (Tactical Commander) and he relayed it back to my shift leader. My shift leader immediately contacted base and reported the incident. We continued to our stage area, the vicinity for our follow on missions.

Sworn Statement

Date: 25 September 2006
Time: Approximately 5:20 PM
Location: 62

I, hereby make the following statement at the request of , who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.

Upon completion of the course I became an Independent Security contractor with Blackwater. In of , I was assigned to team (a PSD team) here in Baghdad and operated as such executing multiple missions on numerous venues through out metropolitan Baghdad. In late I switched to Tactical...
On September 25, 2006 at approximately 1020 local time, I was driving the lead vehicle of a motorcade. Traffic had been hectic since we left the green zone as it has been since the start of Ramadan. When our motorcade was approaching a traffic intersection, the up gunner had thrown water bottles to clear the intersection ahead as there were no Iraqi Police present. At that time all traffic stopped and the intersection was clear. As I was entering the intersections I saw out my drivers side window that a white/cream colored four door vehicle from the early 80’s was passing all the stopped traffic on the left side of the intersection. At that time I could hear giving verbal warnings, which turned into shouting warnings. I saw that the vehicle was not stopping and started to veer away from the direction it was coming from. I observed that at least 2 water bottles were thrown at the vehicle, the first striking the pavement in front of the vehicle and the second impacting the vehicle. At this time I could see the driver was the sole occupant of the vehicle and that he was looking directly at our truck. At this time I believed the vehicle was a possible Vehicle Born Improvised Explosive Device (VBIED) and was in fear for my life. I immediately veered right as far as I could without colliding with either another vehicle or the concrete barriers. At this time I heard two shots fired. I observed the rounds impact the hood area of the suspect vehicle. I immediately hit the accelerator to get us out of the intersection incase the vehicle detonated. As I was driving away I could see that the driver appeared to be uninjured.

On 24 September 2006, at 1700, conducted a mission brief for the following day's missions. The mission brief included a rundown of teams operating in the red zone and the venues they would be visiting, the Vehicle load plan for the day, and the pre-mission briefing time for the next morning.

On 25 September 2006 at approximately 0830 hrs, conducted a pre-mission brief. The brief included any changes to previously briefed information, the Rules of Engagement per the Mission Firearms Policy and Escalation of force. Routes and relevant venues were briefed by the Tactical commander, and an intelligence and threat brief was given by the detail Intelligence Analyst. Due to increased attacks by anti-coalition forces in our area of operation and the advent of the Ramadan holiday the threat level was considered to be elevated.

Departed the International Zone for the area of and En-route to our staging area encountered unusually heavy traffic, since the start of Ramadan heavy traffic has been an ongoing obstacle. Maneuvered through the traffic using warning lights, sirens, verbal and visual commands from the turret gunners to clear a path through the traffic. As proceeded North West bound from our motorcade encountered more traffic traveling in the same direction. At this time do to the amount of North West bound traffic, threat information and intelligence passed in the preceding four days in reference to Improvised Explosive Device (IED) and Vehicle Born Improvised Explosive Device (VBIED) threats in the area on Haifa Street.

At this time the traffic was unusually light traveling southbound. As the lead vehicle of our motorcade approached the intersection of the front up gunner threw several water bottles into the intersection to warn vehicles of our approach. was also utilizing warning lights, sirens and air horns to alert traffic. The intersection at is usually controlled by Iraqi Police (IP's) or Iraqi National Guard (ING's). As approached the intersection it was observed that there were no IP's or ING's in the intersection. Lead vehicle entered the intersection noticed a dirty white four door sedan operated by one single, middle aged male subject who was maneuvering aggressively on the North West side of the stopped vehicles approximately 20-25 meters North West of the lead vehicle. At this time shouted "Kiff" (stop in Arabic) and "stop". Made direct eye contact with the suspect while simultaneously showing him the hand signal to stop. At this time the suspect vehicle began moving slowly forward toward the lead vehicle. At this time threw a water bottle at the suspect vehicle hitting the front left side of the vehicle. At this time noticed the suspect driver to have a tight grip on the steering wheel and still looking directly at the lead vehicle. The suspect vehicle was now accelerating at a high rate of speed in the direction of the lead vehicle still staring at the lead vehicle. With the current threat level, training, experience and known tactics used by insurgents, believed that the vehicle was a VBIED that intended to impact the lead vehicle of motorcade and detonate. In fear for his life and the lives of his teammates, fired two rounds from his Department of State issued rifle striking the vehicle in the hood. Simultaneously, the lead vehicle driver abruptly swerved to avoid making contact with the suspect vehicle. Apparently disabled, the suspect vehicle rolled to a gradual stop approximately five meters from the lead vehicle. At this time the motorcade accelerated and moved to the far right side of the roadway to avoid the disabled vehicle. At this time all up gunners covered their sector of security for the possibility of a secondary attack.

At this time cautiously continued north towards and to our staging area of continued to provide tactical support for Chief of Mission teams operating in high threat areas of the red zone. -END-
I, ____________________________, hereby make the following statement at the request of ____________________________, who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.
I graduated from Blackwater DoS class____and assigned to Tactical Support Team____in Baghdad, Iraq. Provided a quick reaction force to respond and support PSD teams working in Baghdad area. Have been assigned different responsibilities to include, but not limited to, admin representative, supply representative, turret gunner, and driver.

At approximately 1020 on 25 Sept 06, the second day of Ramadan in Baghdad,____was headed northbound from____to the area of____. We were in support of____ who was also north bound on Route____, a road that ran parallel to our route. It was briefed just 1 hour 30 min. prior that the area we where about to go through was a high threat area. The area of____Bridge____and the eastern bank of the river, had been attacked 11 times in the last 15 days with everything from small arms fire and mortar attacks to Vehicle Born Improvised Explosive Devices (VBIED) and Explosively Formed Projectiles (EFP’s). In addition to that, it was also briefed that the Ramadan season has traditionally been a month where attacks where greatest and this year would be no different. The day prior, 24 Sept 06, the first day of Ramadan, we had witnessed this first hand. We had a number of teams in the red zone we where providing support for that day. Explosions were heard throughout the city streets and roads where overcrowded with people. Traffic was backed up on almost all our routes due to the increase in Improvised Explosive Device (IED) activity and certain main MSR’s where closed. We where moving with extreme caution through this area and turret gunners where briefed to be on high alert. Also during that brief 1 hour 30 min prior, we where given a report from the intelligence analyst to be on the lookout for a few individual vehicles that had been reported to have been carrying weapons or VBIED’s.

As____approached the 4 way intersection known as____from____, I,____noticed there was a cream colored 4 door Ford sedan that fit the description of the vehicle we had been warned about at the morning brief just prior to our departure. The suspected vehicle was merging from our left and appearing to try and merge into our lane as we continued straight to the 12 o’clock position at the intersection. I commanded to the lead turret gunner to get the suspected vehicle to stop so that we could continue through the intersection. The lead turret gunner,____made verbal warnings, as well as giving the suspected vehicle hand signals to stop.____followed that up with a water bottle and the vehicle seemed to be coming to a slow roll. However, as the lead vehicle of____continued through the intersection, the suspected vehicle turned its wheels to the right and accelerated in an aggressive manner and was now coming at the motorcade directly to our left at a 9 o’clock position approximately____meters away. It was then that the lead turret gunner engaged with two____rounds to the hood of the suspected vehicle.____At this time I lost sight of the vehicle.____was able to move through the dangerous intersection without harm. No injuries to the passenger of the suspected vehicle to report.
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

Subject: COM PSD Team Fires on Aggressive Vehicle.

Reporting Office: RSO ERBIL

Summary: At approximately 1435h on September 27, 2006, ARSO Erbil was notified that a COM PSD had engaged a local national vehicle with deadly force. The COM motorcade consisted of [redacted] vehicles. As the COM motorcade approached the Erbil outer circle while proceeding north on Route [redacted] from Kirkuk, a silver-colored sedan with clear access to the motorcade, approached the motorcade at a high rate of speed. The rear gunner in the tail vehicle attempted to gain the attention of the driver by utilizing an escalation of force to include spot light, verbal signals, hand signals, and pointing his weapon at the vehicle. The driver of the sedan ignored the warnings.

As the vehicle closed in on the motorcade at approximately [redacted] meters, the rear gunner fired one round with his [redacted] rifle into the grill of the sedan. The driver of the sedan swerved right and continued to close in on the motorcade. The PSD member riding in the right rear position of the assault vehicle opened the vehicle door and pointed the weapon at the vehicle. The sedan then came to an immediate controlled stop on the right shoulder of the road. The driver and one occupant appeared to be uninjured; there was no noticeable damage to the sedan. No injuries or additional property damage were observed as a result of the incident. The PSD motorcade continued to its destination without further incident.
RSO Action: ARSO Erbil was notified at 1440h, who then notified Kirkuk RSO, Baghdad DRSO and Baghdad TOC. Erbil Operations notified the Kirkuk TOC at 1440. PSD Team members are completing their written statements. RSO Kirkuk is investigating the shooting.

Location: Erbil, Iraq

I, ______________________________, hereby make the following statement voluntarily to Zach Z. Little, who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service.

I was in the Counter Assault Team (CAT) Vehicle, in the Minivan, approx. 100 yards behind the follow vehicle. In the vehicle, also, were [names] and myself, Right Rear.

At about 1437, just prior to [time], called out a Post invader coming up. At the time, I was looking out my door (Right Side). When I looked to the rear of our vehicle, saw a silver, small, 4 door vehicle quickly coming up towards our vehicle. [Name] had a flashlight in his left hand pointed towards the vehicle. I looked back to my right side of the vehicle, making sure that nothing else was heading from that direction.

Page 1 of 3 Pages
I looked back towards the rear to see the on coming vehicle going towards our left. It was approx. 6000' from us.
I heard the sound of the vehicle without stopping, swervred towards our right side, still moving.
At that time I opened my door & pointed my weapon towards the vehicle & placing it on seat.
The vehicle came to a screeching halt.
No further incidents from the vehicle or ours, after that.
The individual driving the vehicle did not appear to be harmed.
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

I, __________________________________________, hereby make the following statement voluntarily to Zach Zittle, who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service.

I was driver of ___________ CAT Sub. Prior to ______, approx 150 meters one shot was fired to disable threat by ___________. As driver, I had hazard lights on, blue emergency lights in grill on. ________ called out fast move from rear, I used the horn to sound our presence. I saw a grey four door vehicle approaching from rear passing other vehicles at rapid speed. I used the spot light moving it left to right in an attempt to signal the vehicle, as I heard him call out to the car to stop. The car did not stop and continued at a high rate of speed. At this point I began pursuing driving in an attempt to block for the rest of the convoy approx ________ meters in front of us. I then fired the shot, looked in the rear view mirror and saw the vehicle come to...
A stop.

On the back of our vehicle, it is clearly stated "Stay Back 100 feet. That the window was also open (which allowed [ ] to be clearly seen as he muzzled his bared teeth)."
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

I, _______________, hereby make the following statement voluntarily to
ZACH ZITTEL, who has been identified to me as a Special Agent of the
U.S. Department of State, Diplomatic Security Service.

I WAS LEFT BEHIND FOR THE CAT (FIGHTING FOLLOW).
WE WERE WITHIN THE CITY LIMITS OF ERBIL, ON THE
ROAD JUST PRIOR TO TRAFFIC FLOW WAS
LIGHT TO MODERATE, BUT SOMEWHAT MODERATE TO HEAVY
AT INTERSECTIONS. WE HAD OUR SIREN GOING TO ALERT
ALL VEHICLES OF OUR PRESENCE. THE INCIDENT HAPPENED
AT AROUND 1437 HRS.
AND WAS CONSTANTLY MOTIONING VEHICLES THAT APPLIED
TO CLOSE, TO BACK OFF USING A FLASHLIGHT AND HAND THAR
SIGNALS THROUGHOUT THE TRIP. FROM MY Vantage point
ALL VEHICLES ADHERED AND TOOK APPROPRIATE ACTION
EXCEPT THE VEHICLE IN QUESTION. THIS VEHICLE, WHICH WAS
A 4-DR SILVERISH IN COLOR COMPACT-SUB/COMPACT CAR,
DID REGARDLESS ALL WARNINGS MADE BY THE WELL + REARS.
I used his flashlight more than enough times, then upgraded to both flashlight and verbal commands. I would also have to crack my door numerous times when the vehicle would try to shift to the left side. Since I had my area of responsibility also, my focus was the vehicle in question, along with any other vehicles. Moments prior to the shot taken I looked to my left, taking notice of [ ] continue use of his light, while hearing him yelling to "back off" and moving him away. We had also began muzzling the vehicle by this time. It was a split moment when I saw the vehicle accelerate forward, closing the distance within [ ] when the single shot was taken. The vehicle slowed and pulled to the right and came to a stop. We proceeded to our destination.
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

I, ______________, hereby make the following statement voluntarily to Zach Little, who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service.

On 27 September 2006, I was riding in the well in the CAT vehicle. At or around 1437, I was holding traffic back with a flashlight at that time a silver car accelerated past several cars and continued towards our vehicle. I then used hand and arm signals, verbal, including the flashlight, to warn off the driver. He kept accelerating within 1 meter. I fired one shot into the grill of the car to disable the vehicle. The vehicle then pulled off to the right side of the road. There appeared to be no injuries.
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

Spot Report – 092806-03

Subject: K-9 Advance PSD Support Team Fires on an Aggressive Vehicle

Reporting Office: RSO TOC - Baghdad

Summary: On 28 September 2006 at approximately 1030 hrs, a Chief of Mission (COM) PSD K-9 Support Team was providing advance security in front of the Tobschi Juvenile Detention Facility waiting for the principal motorcade to arrive. A member of the PSD Advance Team was standing next to the center median of a two-lane street running east and west in front of the detention facility and was diverting traffic prior to the arrival of the motorcade. To the west of the venue, a white four-door, mid-sized car of unknown make executed a left-hand turn, increased speed to approximately 30 miles an hour, and proceeded in the right-hand lane traveling east toward the venue and the advance team member.

At approximately 125 yards the PSD Advance member raised his arm displaying the “Kif” (STOP!) hand signal multiple times and shouted for the vehicle to halt. At approximately 100 yards the advance member raised his carbine, aimed at the oncoming vehicle and stood in the edge of the oncoming lane of the street. The vehicle did not slow and maintained its course. At approximately 75 yards the advance member fired two well aimed shots into the radiator of the sedan at which point the vehicle pulled to the side of the street and stopped.
The driver exited the vehicle and raised the hood to inspect the damage. The driver was not injured. The PSD Advance Team then continued on with their mission without further incident. Principal arrived safely to the venue.

**RSO Action:** Team members have completed written statements. RSO is investigating the shooting.

I, [Name], hereby make the following statement at the request of [Name], who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department’s Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting therefrom may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.
In mid-September, I attended and successfully passed the Department of State weapons systems re-qualifications course and was contracted as a detail team member to the Department of State Mission Regional Embassy Office at FOB Courage in Mosul, Iraq until mid-October.

In late-September, I was contracted to the Department of State Mission Regional Embassy Office in Kirkuk, Iraq as a detail member and remaining at Kirkuk until being transferred to Baghdad WPPS mancamp at the end of the month.

On the morning of 28 September 2006, myself and fellow team members were assigned to the Advance Detail Team for a mission to the Tobschi Juvenile Detention Center. We arrived at the venue, which was in a heavily populated commercial type district. Myself with and cleared the drop zone and the area within the perimeter walls of the venue which would accommodate only about three to four SUV's. Due to the limited parking space within the compound, our team was to post outside in the street and divert any and all vehicular traffic entering our immediate area.

All three PSS vehicles were positioned on the split roadway with the exception of the vehicle drivers, all personnel were dismounted and assumed overwatch security positions covering our 9, 12 and 3 o'clock sectors in the street in front of the venue. Any vehicle that approached within plus meters from our position was diverted using hand signals to take the side streets at 9 and 3 o'clock positions. At about 10:30 am, I was covering our 3 o'clock position and observed a white mid sized four door vehicle occupied by a single adult local male driving towards our position and the vehicle resembled the description of a vehicle listed as a possible Suicide Vehicle Born Improvised Explosive Device (SVBIED). This vehicle and driver were approximately 125 meters away when first observed. As the vehicle closed with my position, I stepped further out in the middle of the roadway directly into his lane of traffic and being in full view of the driver, in full PSS kit and helmet, motioning at least three times, with my left hand held high using the local hand signal commonly used to stop his vehicle. The hand signal used was the joining of all hand fingers pointed upward and directly at the driver. At this time, the driver still continued towards our position. I then raised my rifle at the driver, giving the driver an additional physical warning to stop. The driver continued towards us. Based on my two and one half years of experience working in Iraq and knowing the common tactic's used for SVBIED's using a sole occupant and the driver failing to stop or even slow down, and the knowledge that since the advent of Ramadan, SVBIED attacks have sharply risen, and that we were in a high threat area of Baghdad, I was fearing for my life and the lives of my team members and were mostly dismounted. As the vehicle closed to...
within approximately [ ] meters, I fired two rounds from my issued [ ] carbine into the grill of this vehicle.

Upon firing the two rounds, the vehicle immediately pulled sharply to the right and slowed. The vehicle continued to the far side of the roadway and coasted past my position. The sole occupant, the driver, after a couple of minutes went by, exited out of vehicle and opened up the engine compartment. It was observed that the vehicle was leaking some type of fluid onto the roadway apparent to the two rounds striking the grill and radiator compartment.

No other action was taken and no apparent injuries were observed. Shortly afterwards, DSS team [ ] arrived on venue and Advance team [ ] and [ ], departed the venue to the mancamp.

End of Report
I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.

On Thursday, 09-28-06, with attached K-9 element, was the Advance Team for at the Tobschi Juvenile Facility. Prior to departure, a pre-mission brief was conducted. The morning Intelligence report was briefed along with the current “be on the lookout” (BOLO) list. The Use of Force Continuum and Rules of Engagement were read at the brief.

arrived on venue at around 0930 and established security at the venue. During the initial assessment, it was determined that the parking lot was too small to hold all the vehicles. Tactical Commander, advised to move their vehicles into the roadway upon reaching the intersection off.

The roadway in front of the venue is a T-intersection. All other side roads are blocked with piles of dirt and trash. was going to be traveling east towards the venue, which was the only route in and out of the venue. Upon reaching a checkpoint approximately 4-6 minutes away from the venue, team members were to move their vehicles into the roadway to effect traffic control points in order to ensure a safe and clear route to the venue entrance. instructed team members to stop and redirect traffic coming in from the east and south. Traffic coming in from the west was to be let through to allow clear movement to a cut at which they could counter flow to the venue. This command would be given when observed coming toward the venue.

Shift Leader was inside the venue maintaining contact with the facility Warden. After hearing advise base that they had reached directed the Advance Team to move their vehicles out into the roadway to establish traffic control and to free up the venue parking lot.

was watching his sector to the west from the intersection where would turn left into the venue. He observed a white passenger four door car, occupied by one male driver, drive towards TCP. saw the white passenger car enter the main roadway from a side road, approximately 125 meters away from his position in front of the venue. attempted to stop the vehicle because the only direction for the vehicle to travel was towards or the opposite direction towards stepped into the roadway so the driver would clearly see him, as he was yelling for the vehicle to stop, gave verbal and visual hand signals to stop, however, the vehicle still continued to approach the dismounted team. then pointed his Rifle at the vehicle, from approximately meters away, but the vehicle still continued to approach the team. being in fear for his life and the life of his fellow teammates, fired two controlled shots from his into the grill of the approaching vehicle.

was also posted in the intersection with had previously waved 2-3 other vehicles through the intersection already and he also observed the white passenger vehicle approaching his position from the west. using hand and arm signals, began waving the vehicle through his TCP as briefed. He then observed, yelling at the driver and giving hand signals to stop, told to let the vehicle pass through, but continued to try and stop the vehicle.
yelled at [Redacted] in an attempt to get him to let the vehicle through, but then saw [Redacted] bring his rifle to the ready position. Then fired two rounds into the grill of the car. Closed the distance to [Redacted] in order to deescalate the situation. Stopped firing and the vehicle slowly rolled through the intersection and stopped. The driver was uninjured and he exited the vehicle which was then pushed out of the roadway.

[Redacted] also observed this incident from their positions. The rest of [Redacted] heard the shots fired but did not witness the incident.

Shortly after the shots were fired, [Redacted] stated they had a visual on the venue. Directed [Redacted] into the venue and escorted the principals into the venue without incident.

After the drop was made and the principal was located inside, the Shift Leader from [Redacted] briefed [Redacted] Shift Leader ( [Redacted] ) about the shooting incident. Once [Redacted] had adequate security set at the venue, attempted to radio [Redacted] about the incident but was unable to make contact. [Redacted] recovered his team and began navigating back to the International Zone.

Immediately after arriving at [Redacted] and after being debriefed, the Shift Leader notified the TOC via telephone and the [Redacted] Detail Leader ( [Redacted] ).
Sworn Statement

Date

Location
Tobschi Juvenile Facility

I, ____________________________ , hereby make the following statement at the request of ____________________________ , who has been identified to me as a Special Agent of the U.S. Department of State, Diplomatic Security Service. I understand that this statement is made in furtherance of an official administrative inquiry regarding potential misconduct or improper performance of official duties and that disciplinary action, including dismissal from the Department's Worldwide Personnel Protective Services contract, may be undertaken if I refuse to provide this statement or fail to do so fully and truthfully. I further understand that neither my statements nor any information or evidence gained by reason of my statements can be used against me in a criminal proceeding, except that if I knowingly and willfully provide false statements or information, I may be criminally prosecuted for that action under 18 United States Code, Section 1001. I agree that the statements I furnish and any information or evidence resulting there from may be used in the course of disciplinary proceedings, which could result in disciplinary action, including dismissal.
After providing an [redacted] search of the Tobschi Juvenile Facility with [redacted] search and support of [redacted] the morning of 28 September 2006 with fellow [redacted] it was determined that the venue was too small to accommodate both Advance and PSD elements of the mission. Due to the size of the venue it was requested that the [redacted] vehicle, along with other [redacted] vehicles be used as a vehicular blockade outside the venue perimeter on the roadway.

[redacted] directed where the vehicle would best work for assisting with traffic control of local traffic until [redacted] arrived. [redacted] along with other members of [redacted] Advance Team were outside the venue directing/diverting local traffic from the area. While in the driver's seat, I noticed out of the driver's window that [redacted] had begun to present himself to a local vehicle traveling towards the area. [redacted] was seen displaying the stop command with his hand. I heard that [redacted] was giving verbal commands and observed him shoulder his [redacted] displaying his weapon as an escalation of force. The vehicle failed to stop, slow, or change direction and two shots were fired into the front/grill area of the vehicle as it continued. At that point I continued to scan the area assessing the safety of the area and visual contact of the vehicle was lost. I also noticed that PSD member [redacted] took cover assessing
the situation as was approaching the venue. Tactical Commander and Shift Lead determined the venue was secure allowing to proceed.

I hereby swear or affirm that the information contained in this statement is the truth to the best of my knowledge.
